April 16, Tuesday, 6:00 p.m.	Easter holidays end
May 22 to May 29	Examinations
June 1, Saturday	Commencement

SUMMER SCHOOL

June 10, Monday, 8:00 a.m.	First session begins
July 19, Friday	First session ends
July 22, Monday, 8:00 a.m.	Second session begins
August 23, Friday	Second session ends

THE PURPOSE OF MILITARY TRAINING AT THE CITADEL

The Citadel is a liberal arts military college. While the college is justly proud of the war records of its sons and will always expect them to respond in national emergencies, its chief purpose is to prepare men for civil pursuits by giving them a sound education reinforced by the best features of military training.

Military training teaches the value of a methodical and orderly approach to tasks, of physical and mental fitness, and of alertness and self-confidence. It teaches how to command and how to obey, how to organize and coordinate, and how to achieve and maintain morale and discipline. Most important of all, it instills the conviction that sacrifice is preferable to compromise with principle, and that truth, honor, and integrity are the bases of character.

The effectiveness of academic education is enhanced by the concurrent development of military excellence. Citadel graduates in many vocations throughout the world attest the value of the rigorous regimen of the classroom, barracks and drill field.

Many desirable characteristics emanate from sources other than scholarship. College men are sometimes more profoundly influenced by tradition than by scholarly lectures. For this reason, The Citadel adds the code of the cadet to its academic training. The symbol of this code is the proudly-worn uniform, a constant reminder that alma mater expects of every son not only the knowledge and culture of a scholar, the public spirit of an enlightened citizen, and the honor and integrity of a gentleman, but also the courage and prideful bearing of a military leader.

ORGANIZATION

BOARD OF VISITORS

General E. A. Pollock, USMC Ret., Chairman, '21 (1968)	Beaufort, S. C. (P. O. Box 861)
Colonel J. M. J. Holliday, Vice Chairman, '36 (1972)	Galivants Ferry, S. C.

FACULTY

General Hugh Pate Harris, U.S.A., Retired

B.S., United States Military Academy

President

General Mark Wayne Clark, U.S.A., Retired

B.S., United States Military Academy; Dr. Pol. Science, Universities of Naples and Vienna; D.C.L., Oxford; D. Sc., University of Florence; LL.D., Oberlin College, Pennsylvania Military College, Universities of Southern California, San Francisco, South Carolina, Akron, and Loyola; Litt. D., Clemson University

President Emeritus

Major General James William Duckett

B.S., The Citadel; M.S., University of Georgia; Ph.D., University of North Carolina

Dean of the College

Colonel Wallace Ervin Anderson

B.S., The Citadel; M.S., University of Kentucky; Ph.D., University of Michigan

Academic Dean

Colonel Robert Waller Achurch

A.B., College of Charleston; M.A., Ph.D., University of North Carolina

Professor and Head, Department of English

Captain Dwight Adams

B.S.E., Henderson State Teachers College

Assistant Professor of Physical Education

Colonel Robert Spencer Adden

B.S., The Citadel; M.B.A., University of Pennsylvania; Ph.D., University of North Carolina

Professor and Head, Department of Business Administration

Major Larry Holbrook Addington

A.B., M.A., University of North Carolina; Ph.D., Duke University

Assistant Professor of History

Captain David Henry Adrian

B.S. in B.A., Municipal University of Wichita

Assistant Professor of Aerospace Studies

Captain Bruce Winslow Aldrich

B.A., University of the South; M.A., University of South Dakota

Assistant Professor of Modern Languages

Captain Harold Brice Alexander

B.A., The Citadel; M.A., Duke University

Assistant Professor of English

Major Roy Lenard Anderson, Jr.

Associate Arts, Fullerton College; B.S., M.S., University of New Mexico

Associate Professor of Aerospace Studies

Colonel Charles Leroy Anger

B.S., M.S., Ph.D., University of Virginia

Professor and Head, Department of History

Major Salvatore Alfred Arcilesi

A.B., The Citadel; Ph.D., University of Virginia

Assistant Professor of Political Science

Captain Franklin Bascom Ashley

B.A., Newberry College; M.A., University of South Carolina

Assistant Professor of English

Lieutenant James Milton Attaway

B.A., The Citadel

Instructor of Political Science

Major Jep Harmon Bailey

B.S., The Citadel; M.A., Duke University

Assistant Professor of Physics

Captain Robert Edward Baldwin

B.S., The Citadel; M.S., University of South Carolina

Assistant Professor of Biology

Major Alva Ray Ballentine

B.S., M.S., Ph.D., University of South Carolina

Associate Professor of Chemistry

Captain Earl Franklin Bargainnier

B.A., The Citadel

Assistant Professor of English

Lieutenant Colonel Roger Stillman Bender

B.S., Yale University; Ph.D., Harvard University

Professor of Physics

Colonel Earl John Berryhill, USAF, Retired

B.S., Texas Agricultural and Mechanical College; M.A., University of the Philippines

Assistant Professor of Education

Colonel James Douglas Blanding

A.B., The Citadel; M.A., Ed.D., Peabody College

Professor and Head, Department of Education

Lieutenant Colonel George Semmens Boase

B.S., M.S., Purdue University

Associate Professor of Chemistry

Captain William Maner Bostwick
Instructor in Physical Education

Major Daniel Oliver Bowman
B.S., Furman University; M.Ed., University of South Carolina; Ph.D.,
University of Georgia
Associate Professor of Education

*Lieutenant Malcolm Michael Brennan, USNR
B.S., Georgetown University; M.A., Catholic University
Assistant Professor of English

Captain Johnny Gilbert Brewer
B.S., M.S., Ph.D., University of Georgia
Assistant Professor of Chemistry

Major Chaford Acquilla Brown
B.S., M.S., University of South Carolina
Associate Professor of Mathematics

*Captain Robert Samuel Brown
B.A., M.A., University of Alabama
Assistant Professor of Modern Languages

Captain James Albert Browning
B.S., M.S., University of Georgia
Assistant Professor of Chemistry

Lieutenant Colonel Arthur Edward Buckley, USA, Retired
B.S. in C & B.A., M.S. in C & B.A., University of Alabama
Assistant Professor of Business Administration

Major Donald Cleveland Bunch
B.S., The Citadel; M.S. in I.M., Georgia Institute of Technology
Assistant Professor of Business Administration

Captain James Cozby Byrd, Jr.
B.S., University of South Carolina; M.A., Emory University
Assistant Professor of Physics

*Captain Francis Xavier Byrne
B.S., Loyola College; M.S., Trinity University
Assistant Professor of Physics

Lieutenant Colonel James Berry Carpenter, Jr.
A.B., Southwestern at Memphis; M.A., Vanderbilt University
Associate Professor of English

*—On leave of absence.

Lieutenant Colonel Malcolm Lander Causey, Jr.

B.S. in C.E., The Citadel; M.S., Harvard University; P.E. (South Carolina)

Professor of Civil Engineering

Major James Darwin Chandler

B.S., United States Military Academy; M.E. in C.E., Texas Agricultural and Mechanical College

Assistant Professor of Military Science

Major Carroll Thomas Clark

B.S., University of Virginia; M.S., Georgetown University; Ph.D., University of Virginia

Associate Professor of Chemistry

Lieutenant Colonel Leaton Clark Cofield

B.S., Northwestern State College; M.S., Phillips University

Assistant Professor of Military Science

Captain Arthur Nicholas Corontzes

A.B., University of South Carolina; M.L., Emory University

Assistant Professor, Catalog Librarian

Colonel Ira Whitehead Cory, U.S.A., Retired

B.S., United States Military Academy; M.S., University of Pennsylvania

Associate Professor of Electrical Engineering

Lieutenant Commander John Stanford Coussons, USNR

B.A., Louisiana College; M.A., Louisiana State University

Assistant Professor of History

Captain Marcel Maurice Crespil

B.A., University of Paris; B.A., University of South Florida; M.A., Florida State University

Assistant Professor of Modern Languages

Captain George Leon Crumley

B.S., M.S., Kansas State Teachers College

Assistant Professor of Mathematics

Captain Gordon Richard Darmody

B.A., Union College; M.Ed., Sam Houston State Teachers College

Assistant Professor of Physics

Lieutenant Colonel Thomas Finley Debnam

B.S., M.S., University of Virginia

Associate Professor of Business Administration

***Colonel Joseph William Dellastatious**

B.S., M.S., University of Missouri

*Professor and Head, Department of Physical Education***Major Lynn Vernon DeMille, USA, Retired**

B.A., M.A., University of South Carolina

*Assistant Professor of Modern Languages***Captain Joseph A. Devine, Jr.**

A.B., Georgetown University; M.A., University of Virginia

*Assistant Professor of History***Captain Charles James Dillman**

B.S., The Citadel; M.S., Pennsylvania State University

*Assistant Professor of Physical Education***Lieutenant Colonel John Robert Doyle, Jr.**

A.B., Randolph-Macon College; M.A., University of Virginia;

M.A. Bread Loaf School of English

*Professor of English***Captain Robert Braden Dunmire**

B.S., Thiel College; M.S., Florida State University

*Assistant Professor of Chemistry***Lieutenant Colonel Charles Eugene Durkee**

A.B., Defiance College; M.Ed., University of Pittsburgh

*Assistant Professor of Chemistry***Colonel Leaman Andrew Dye**

A.B., M.A., University of Rochester; Ph.D., Cornell University

*Professor of Mathematics***Major Donald Leon Fairchild**

B.A., Hope College; M.A., Vanderbilt University

*Associate Professor of Political Science***Captain Vann Jackson Faulk**

B.S. in E.E., The Citadel

*Assistant Professor of Electrical Engineering***Major Frank Lynn Feigl**

B.S., Indiana University; M.A., Ball State Teachers College

*Associate Professor and Acting Head, Department of Physical Education****Captain Elbert Conner Flowers, Jr.**

B.A., M.A., Vanderbilt University

Assistant Professor of Political Science

*—On leave of absence.

Captain John Forrester

B.S., United States Military Academy

Instructor of Aerospace Studies

Major Leonard Henry Fortunato

Associate Professor of Business Administration

Lieutenant Colonel Charles L. Zolner

B.A., University of Oklahoma

Acting Professor of Military Science

*—On leave of absence.

The Old Location and the New

The history of The Citadel may be divided into two parts. In the first, extending from December 20, 1842, when the legislature of South Carolina passed an act providing for the establishment of the college, to September, 1922, the institution was located on Marion Square. This open space of about ten acres has long been the middle of historic Charleston. In the second, extending from 1922 to the present, The Citadel has been situated about two miles northwest of its former location on a beautiful campus of about one hundred acres between Hampton Park and the Ashley River.

The Origin of the Name

The Citadel derived its name from the building in which it was first housed. Erected with state funds as an arsenal some years after the frustration of the Denmark Vesey slave uprising of 1822, this sturdy old fortress, which still dominates Marion Square, was called The Citadel. It was garrisoned first by Federal, then by state troops until they were replaced in March, 1843, by the twenty students who comprised the first Corps of Cadets. These cadets served as guards for the state's arms as they pursued a course of study designed to make them useful citizens in time of peace as well as war.

With its sister school, The Arsenal, established at the same time in Columbia, the state capital, The Citadel was a part of what came to be known as the South Carolina Military Academy. In 1845 regulations governing the institution subordinated The Arsenal to The Citadel and thereafter The Arsenal trained only freshmen. The Arsenal burned in 1865 and was never reopened.

The first period of the college's existence on Marion Square lasted until 1865. During this period high standards of intellectual accomplishment and military discipline were maintained, and enrollment was increased to 145 cadets by January 1, 1864.

The Citadel in the Civil War

The founders—men like Governors Richardson and Hammond and General D. F. Jamison, who was later to preside over the convention at which the South Carolina Ordinance of Secession was signed—had foreseen that the state might soon need men with military training. When the trouble long brewing between the North and the South erupted in war, the record of Citadel alumni and cadets vindicated the foresight of the founders. Of the 224 alumni living at the time of the Civil War, 193 wore the Confederate grey, all but twenty as commissioned officers and four as generals. Thirty-nine were killed in battle, and four died in the service. On January 9, 1861—before the firing on Fort Sumter—cadets of the Corps manned the guns which drove back from the entrance of Charleston harbor the *Star of the West*, a steamer sent by the Federal government to relieve the fort. Made a part of the military organization of the state by legislative act of

January 28, 1861, the Corps of Cadets helped emplace and guard artillery on James Island, did guard duty in Charleston, and on December 6-9, 1864, near the war's end, suffered several casualties in an engagement with Union troops at Tulifinny Creek near Yemassee Station, while helping to defend the Charleston and Savannah Railroad.

Very shortly afterwards came years of eclipse for The Citadel. From February 18, 1865, when a Union force marched into Charleston, until April, 1879, the buildings on Marion Square were occupied by Federal troops, and the operation of the college was necessarily suspended.

The Reopening after the Civil War

The second period of The Citadel's existence on Marion Square began on October 2, 1882, with an enrollment of 185 cadets. Though the Corps no longer served as arsenal guard, the military system of the antebellum years was in all other respects continued. The reopening of the college was the culmination of efforts begun by alumni in April, 1877. At their request Governor Hampton appointed a Board of Visitors in 1878, and in January, 1882, the state legislature passed a bill providing for the re-establishment of the college and appropriating money for the repair of its buildings and for its maintenance.

In the forty years that passed before The Citadel moved to its present site, the physical plant was enlarged, part of the cost being defrayed with money collected in 1888 from the Federal government for rent and for damages sustained during the years the buildings were occupied by Federal troops. The enrollment was increased, and the curriculum was made more flexible.

In 1910 the name of the college was changed to The Citadel, The Military College of South Carolina. In 1918, during the administration of Mayor T. T. Hyde, the City Council of Charleston offered the state the present site of the college—a tract of about eighty acres of high land and a hundred acres of salt marsh. Early in 1919, the State Legislature accepted the offer and appropriated money for the erection of the first buildings.

The Greater Citadel

In the fall of 1922 the college began operating at its new location. There were then only a few buildings on the campus. In the intervening years many have been added to those originally constructed (See Grounds and Buildings, page for a complete description of the present campus), and enough salt marsh has been reclaimed to give the college a campus of more than one hundred acres.

Changes in the curriculum and in the nature of the student body have paralleled those in the physical plant. In the last year at the old location it was possible for a student to major in only three fields during his junior year: chemistry, civil engineering, and physics. In his senior year the student was then able to major in these or biology-chemistry or English. Now students may choose from the

following, all of which offer major work for at least the junior and senior years: biology, business administration, chemistry, civil engineering, education, electrical engineering, English, history, mathematics, modern languages, physical education, physics, and political science.

The Student Body

In the nature of the student body there have been significant changes. One is that it has grown much larger. In 1921-1922 there were fewer than 300 cadets in the Corps. In 1947-48, when the student body was the largest the college ever had, there were 2,271 students enrolled including cadets and veterans. Nearly 3,500 veterans of World War II and the Korean Conflict, most of whom were civilian students, attended the college under Public Law 396, popularly known as the G. I. Bill. The program for veterans ended in September, 1960. All students are now members of the Corps of Cadets. Since June 20, 1950, women have been admitted as students, although only to summer sessions. They may also enroll in The Citadel Evening Program which was originated in January, 1966.

The growth of the Corps is further reflected in the fact that, while there were 700 Citadel graduates and ex-cadets in the armed forces in World War I, there were about 6,000 alumni and ex-cadets on active service in World War II. Of these, 280 died for their country. Some 1,500 were on active duty during the Korean Conflict, 450 of whom were in combat and 26 of whom gave their lives. Virtually all graduates on active duty have been commissioned officers.

Memorials to the Makers

Persons prominent in the history of The Citadel are memorialized in campus structures. For example, the largest barracks is named for Colonel James Padgett, member of the Board of Visitors for many years, and Colonel J. P. Thomas, its longtime chairman. The other barracks are named for Andrew B. Murray, philanthropist whose generosity made possible the construction of a barracks and several other buildings; Major General Evander M. Law, C.S.A., Citadel 1856, educator; and Major P. F. Stevens, Citadel 1849, superintendent from 1859 to 1861. The dining hall is named for Colonel Asbury Coward, Citadel 1854, superintendent from 1890 to 1908; the liberal arts classroom building for Brigadier General Ellison Capers, C.S.A., Citadel 1857, Episcopal Bishop of South Carolina and chancellor of the University of the South, Sewanee; and Major F. W. Capers, superintendent from 1852 to 1859; the military science building for Brigadier General Micah Jenkins, C.S.A., Citadel 1854, founder of King's Mountain Military School; the physical education building for Hugh S. Thompson, Citadel 1856, twice Governor of South Carolina 1882-1884, Assistant Secretary of the U. S. Treasury 1886, and commissioner of the U. S. Civil Service 1890; the stadium, acquired by the college in 1963

and seating 22,500 spectators, for Brigadier General Johnson Hagood, C.S.A., first honor graduate, Class of 1847, Governor of South Carolina, 1880-1882, and chairman of the Board of Visitors at the time the college was re-established after the Civil War; LeTellier Hall, for Colonel L. S. LeTellier, for many years head of the Department of Civil Engineering and later acting president of the college; the largest academic building, for Colonel O. J. Bond, president from 1908 to 1931; the chapel, for General Charles P. Summerall, former Chief of Staff of the United States Army, Citadel president from 1931 to 1953; and the new activities building for General Mark Wayne Clark, president emeritus of The Citadel.

Good Signs for the Future

In recent years The Citadel has received four of the most generous gifts ever made to the college. The first gift, public announcement of which was made on August 31, 1953, was the bequest by Joseph D. Aiken, of Charleston, South Carolina, of \$750,000. The other two gifts, both made by United States Senator Charles E. Daniel, of Greenville, South Carolina, and his brother, Mr. R. Hugh Daniel, of Birmingham, Alabama, were the Thomas Dry Howie Memorial Carillon and the sum of \$50,000 for scholarships. The scholarship gift was announced on October 9, 1954. On December 5, 1954, the Carillon was dedicated to the memory of Major Howie, of the class of 1929, who died heroically in the fighting at St. Lo, France, on July 17, 1944. (See Grounds and Buildings, page 30 for description of the Carillon. The fourth gift, amounting to \$200,000, was bequeathed to the college by Major General Harry K. Pickett, U. S. Marine Corps (Retired), class of 1911, who died March 19, 1965.

General Clark, a distinguished soldier who followed General Summerall as president, commanded the U. S. Fifth Army in Italy and the United Nations forces in Korea, and was president of The Citadel from March 19, 1954 to June 30, 1965. Under his leadership the enrollment steadily increased until the maximum barracks capacity of 2,000 cadets was reached in 1957. Since then enrollment has remained at 2,000. Admission requirements and academic standards continually improved under a program of selectivity.

Succeeding General Clark was General Hugh Pate Harris, who became The Citadel's twelfth president on July 1, 1965. The third, four-star retired Army general to be president of The Citadel, General Harris served in many significant combat, administrative, and educational positions while on active duty. The highly-decorated general's last assignment before coming to The Citadel was as Commanding General, U. S. Continental Army Command, with headquarters at Fort Monroe, Virginia.

Location

The Citadel is located on a one-hundred-acre campus in the north-western part of the city of Charleston. The view to the west and south across the Ashley River, which skirts the campus, is typical of the Carolina Low Country scenery. From the east, the campus is entered through Hampton Park, a show-place of flowers, trees, terraces, and sunken gardens. From the north and south, the entrances are through residential areas of the city.

Buildings

The buildings, both in design and location, follow the carefully prepared plan of the original architects. Architecturally, the buildings follow the Spanish-Moorish style of the original campus in the heart of the city. All major structures, such as barracks, academic and administrative buildings, chapel, armory, student activities building, and library-museum, border the large parade ground, which forms the center of the campus.

Bond Hall

Bond Hall, the main building on the campus, contains in the central part the administrative offices of the college, and the offices of the Association of Citadel Men. In the large wings are academic departments, laboratories, and classrooms of Chemistry, Physics, Electrical Engineering, Business Administration, and Education.

Capers Hall

Capers Hall is a classroom building housing the Departments of English, History, Mathematics, Modern Languages, and Political Science.

LeTellier Building

LeTellier Hall contains the Department of Civil Engineering with its classrooms, laboratories and library.

Jenkins Hall

This building contains offices of the Commandant, his staff, and the faculty of the Military and Aerospace Studies Departments who teach the Army and Air Force Reserve Officer Training Corps Programs. The building also contains storage areas for weapons and military supplies, a lecture room with a capacity of 250, and ten classrooms, each with a capacity of 45. Also included is the Board of Visitors room.

The Armory

The Armory is used for indoor drills, athletic contests, dances, and other activities and functions at which large crowds are assembled. The main area has a floor surface of thirty thousand square feet, and a ceiling clearance of sixty-five feet. The steel balconies will seat approximately 2,400 spectators.

An annex at the rear of the Armory contains the swimming pool,

with pressure filters and sterilizing and heating apparatus to assure cleanliness and to provide year-round use.

The Chapel and Carillon

The General Charles Pelot Summerall Chapel, on the east side of the campus, faces the row of barracks which forms the western boundary of the parade ground. The cathedral-like proportions of the Chapel with its fine pipe organ and splendid memorial windows of stained glass create an atmosphere of religious piety befitting its purpose.

To the north of the Chapel is the Major Tom Howie Carillon, a gift of two Citadel alumni, the late Senator Charles E. Daniel and his brother, Mr. R. Hugh Daniel, in memory of the famous "Major of St. Lo," a classmate of the donors.

Barracks

The four dormitories, or barracks, of brick and concrete construction, are rectangular with paved interior courts enclosed by galleries. Rooms accommodate two or more cadets and are equipped with hot and cold water.

Coward Hall

Conveniently located behind the barracks is the cadet dining hall, with a seating capacity of two thousand. Constructed of concrete and tile, this building is fully equipped with modern facilities for storing, preparing, and serving food. Dining-room floors are terrazzo; the kitchen floors are of quarry tile, and all wainscots of glazed brick, so that sanitation is easily maintained. New and up-to-date equipment is installed in the kitchen, and the three dining rooms and the steward's offices are air conditioned.

The Mary Bennett Murray Hospital

The college infirmary conforms with the most modern standards of equipment and personnel. The college surgeon is aided by a head nurse and her assistants.

Alumni Hall

This building is used for sports and recreational activities. On the ground floor are athletic lockers, showers, and equipment rooms. There is a gymnasium on the second floor.

Thompson Hall

This building contains the Physical Education offices and classrooms as well as a drafting room and two classrooms of the Civil Engineering Department. It also has athletic, dressing and shower rooms and facilities for housing visiting varsity teams.

Mark Clark Hall

This is the student activities building. On the first floor is a large central lobby, on one side of which is a well-appointed reception room and on the other side and rear, a post office, canteen, barber shop, billiard room, and bowling room of six alleys. On the second floor

an auditorium with a seating capacity of one thousand can be used for dances and other large gatherings. The cadet store, television room, game rooms, large club room with kitchen facilities, and offices of the Dean of Cadet Affairs are also on the second floor. On the third floor are a court room for the Cadet Honor Committee, three conference rooms, a dark room for camera hobbyists, and editorial rooms for campus publications. Apartments for distinguished guests of The Citadel are also on this floor.

Memorial Library

The Citadel Memorial Library commemorates Citadel men of all wars who gave their lives for their country. This building combines the best features of efficient and aesthetic library planning. It provides an excellent location for the student not only to study for his classroom work, but also to familiarize himself with the literature which will give him an appreciation of reading as a part of his cultural heritage.

Every effort has been taken to make this building not only an educational bulwark but a place of inspiration as well. This inspirational program includes eight murals depicting the history of The Citadel and epitomizes the part that The Citadel and her sons have played in the life of the state and the nation. There is also a President's Room which features portraits of the superintendents and presidents of The Citadel. The Gallery of Distinguished Alumni honors those alumni who have made outstanding contributions to mankind. The Rare Book Room combines elegance and practical planning to provide safe housing for valuable items in a place of beauty. In this room are books dealing with The Citadel and its history.

The main collection of over 90,000 books, bound periodicals, documents, and pamphlets is easily accessible to all students in the open-stock arrangement. These supplement the books in the Reference Room and provide an excellent means for the student to enhance his education. Each year more than 5,000 volumes are added to this already excellent collection.

The library subscribes to more than 650 current periodicals and to newspapers from the principal cities of South Carolina and the nation. Most of this valuable research material is preserved for future use by either microfilming or binding. The library has the latest equipment for the reading of all types of microprint publications.

Supplementing the books in the main library are collections of technical books in departmental libraries located in the Chemistry and Civil Engineering Departments. All books on the campus are catalogued and included in the catalogue at the main library.

The building, exclusive of the lounge areas, will seat 450 students. Provision has been made for seminar and conference rooms for both faculty and cadets. Built to shelve 250,000 volumes, this

library will be adequate for many years and provides space for an excellent college collection.

The Mark Clark Archives of World War II

General Mark W. Clark's generous donation of his personal and military papers has made possible the establishment of a research center at The Citadel. The collection is invaluable as an original source of documents relating to World War II. It has received nationwide attention from other archival institutions and historians.

Some 60,000 manuscripts, 40,000 photographs and many movie films, tape recordings, newspapers and newspaper clippings as well as artifacts are now included in the collection.

The purpose of the archives is to process, preserve, and catalogue the material so that it may be made available for research. It will be housed in the Memorial Library adjacent to the museum area of that building.

Museum

The Citadel Memorial Military Museum, occupying the third floor of the Library-Museum building, provides a setting in which objects and articles related to the school's proud history can be preserved and displayed. The museum is adapted to a program of changing exhibits to supplement and support the academic program.

Included in the museum program are plans for a well-rounded collection which feature a complete series of Citadel uniforms from the time of the school's founding to the present, a representative collection of American military uniforms, including those of the Confederacy, a representative collection of American military weapons, and a collection of pictures and documents recording every aspect of Citadel history. Success of the museum program depends to a great extent upon the support of alumni and friends of The Citadel.

Begun in 1956 as a cadet activity, it has achieved its present status as a result of continuing efforts by cadet volunteers and the enthusiastic support of General Mark W. Clark.

Much of the responsibility for the operation of the Museum rests with members of the Cadet Museum Committee who assist, under the supervision of the Museum Director, in such important operations as cataloguing the collection, historical research, exhibit construction, and cleaning and preservation of articles in the collection.

As its collection grows and its permanent exhibits are constructed, the Museum will play an increasingly important role as guardian of The Citadel's proud heritage.

The Seraph Monument

H.M.S. *Seraph*, the submarine memorialized in the *Seraph* Monument, has a uniquely distinguished record, and many of her most fascinating exploits involved Americans. Embodied in this memorial

are the *Seraph's* fore hatch, steering and plane wheels, her ship's bell and badge, and her periscope.

Seraph is best remembered for her role in the secret entry into North Africa of Gen. Mark W. Clark when he headed a spy team which made a clandestine rendezvous with Free French leaders there in the critical days of 1942 immediately prior to Allied landings on the North African coast.

During the same year this submarine successfully accomplished another secret mission that mystified the German enemy. In this episode she was the vessel that permitted French Gen. Henri H. Giraud to elude the Germans who had surrounded him in Southern France and to escape to aid the Allied cause. Since Giraud was at odds with the British, he insisted that he would make his escape only on an American submarine. No such vessel was then in the Mediterranean, so an American Naval officer was placed in technical command of the *Seraph*. For a time she had two captains and operated under two flags, the American and Royal Navy Ensigns which fly above the monument to commemorate this unusual co-operation between two nations.

Among the *Seraph's* many other historic missions was a gigantic ruse which saved thousands of Allied soldiers' lives in World War II. A book entitled *The Man Who Never Was* describes this adventure, and a motion picture was based on the book. Another book, *The Ship That Had Two Captains*, deals primarily with the Giraud adventure.

Utilities

The steam plant, laundry, machine shop, carpenter shop, paint shop, electric shop, warehouse, grounds shop, vehicle repair shop, and utility yard are located in the northwest portion of the campus. The tailor shop and the print shop are located at the rear of Padgett-Thomas Barracks.

Boating Facilities

Located on the east bank of the Ashley River, The Citadel has taken advantage of the splendid opportunities offered by the Charleston harbor and the local rivers for an almost year-round program of boating activities and water sports. The Citadel Yacht Basin has piers, slips, a floating dock for mooring boats, and power equipment for lowering and raising small craft into and out of the basin. A marine railway, hoist, boat shed, and locker and tool room provide facilities for the care and maintenance of boats owned by cadets and those provided by the college, which include a fleet of Lightning Class sailboats, outboards, and other types of watercraft. Of particular pride to the college is the fifty-foot motor cruiser *South Wind* and the sixty-five-foot yacht *Panchara*. All boating activities are under the auspices of the Yacht Club and are supervised by an experienced director.

GENERAL INFORMATION

Educational Standing

The Citadel is a fully accredited senior college. It is a member of the Southern Association of Colleges and Secondary Schools and of the American Council on Education and is on the approved list of the Association of American Universities.

The Civil Engineering Department is accredited by the Engineers' Council for Professional Development. The Department of Chemistry is accredited by the American Chemical Society.

Reserve Officers Training Corps

The Citadel is justly proud of the record of its Reserve Officer Training Corps (ROTC). Each year The Citadel is awarded the highest rating of the Department of Defense. Further testimony to The Citadel ROTC program is the outstanding record that Citadel graduates have made as commissioned officers in the U. S. Army. They have consistently earned the respect and admiration of their comrades in arms. General Mark Clark, President Emeritus of The Citadel and recently returned from an inspection trip of South Vietnam, reports that the young Citadel graduates serving in that country are adding still another chapter to the rich traditions of their Alma Mater.

A large number of Citadel graduates are commissioned each year in the Regular Army. It is a tribute to The Citadel, the caliber of its cadets, and the Army ROTC program that last year more cadets from The Citadel were awarded regular army commissions than from any other ROTC unit in the nation.

Prospective cadets who desire a military career should investigate the Army's new ROTC scholarship program. Both four year and two year scholarships are awarded each year on a competitive basis. Additional information concerning the procedures for applying for these scholarships and their value can be obtained by inquiry to the Professor of Military Science at The Citadel.

Army ROTC graduates receiving reserve commissions serve two years on active duty in the Army. Those seniors who are designated Distinguished Military Students and, in addition, successfully graduate as Distinguished Military Graduates are offered a Regular Army Commission and will serve a minimum of three years on active duty. Army ROTC seniors who qualify may participate in the light aircraft pilot training program.

Selective Service

Cadets accepted for formal enrollment in Army or Air Force ROTC are, by special provisions of law, exempted from registering for Selective Service. (Requirements for formal enrollment are listed under Department of Military Science and Department of Aerospace Studies.) Those cadets who have already registered with the Selective Service and

are formally enrolled in The Citadel ROTC program are exempt from induction by such enrollment, and the Military Science and Aerospace Studies Departments will notify draft boards of these exemptions. However, both conditions continue only so long as the cadet is formally enrolled and the Military Science and Aerospace Studies Departments are obligated to inform local Draft Boards when such status changes.

Cadets of draft age (18 years or above) who fail to qualify for formal enrollment and/or who are removed from formal enrollment, are *responsible for registering* for Selective Service. The Citadel Registrar will send Selective Service Form 109 to such cadet's Selective Service Board informing the Board of the cadet's Student Status.

Marine Corps Program

The Marine Corps offers commissions to a limited number of college students through the Platoon Leaders' Class Program. The general requirements for enrollment in this program are:

Be enrolled in college as a freshman, sophomore, or junior; be majoring in a field other than premedicine or pre dentistry; maintain at least a "C" average in college; be a citizen of the United States; and agree to serve on active duty for a minimum of three years.

Training is conducted during two six-week summer sessions at the Marine Corps Schools, Quantico, Virginia. Commissions are awarded upon graduation from college in either the ground or aviation components.

The Marine Corps Officer Selection Officer makes frequent visits to The Citadel during the school year to interview interested cadets.

U. S. Service Academies

Since The Citadel is not a preparatory school, it has no courses specifically designed to prepare students to enter the national military, naval, and air academies at West Point, Annapolis, and Colorado Springs, although several cadets complete a year at The Citadel and then go to one of the national academies.

Religious Influences

The Citadel is non-sectarian, but its high objectives cannot be achieved unless its educational program is founded on a solid religious life. Divorced from the spiritual aspirations of the individual and of the group, education is likely to destroy greater values than it creates. The basic purpose of education is to integrate its curricula with character-building activities and a normal religious life to the end that young people may be not only more efficient but better motivated by a sense of duty and obligation. Thus, in an atmosphere of tolerance and mutual respect, every cadet is encouraged to maintain his ties with the religious group to which such association may be made most fruitful.

It is significant that the college in planning its building program included a cadet chapel which in size, dignity, and beauty would be a fitting reminder to all cadets that education must be founded upon

spiritual strength. This building, imposing and churchly, always accessible, is dedicated to no denomination or creed, but is a shrine of religion, of patriotism, and of remembrance in which any group of good will and seemly purpose may hold services and feel at home in doing so.

In keeping with the religious emphasis at The Citadel, a full-time chaplain is available to all cadets for counseling, guidance, and spiritual advice. Colonel Sidney R. Crumpton, retired Army chaplain, assumed his duties on February 1, 1962.

At nine o'clock each Sunday morning a general Protestant religious service is held in the Summerall Chapel, the Episcopal Service in Bond Hall, and the Jewish Service in Mark Clark Hall. At 7:40 a.m. Low Mass is observed for the Roman Catholic Cadets in the Chapel.

Each Sunday evening at seven o'clock, a short but impressive Vesper Service is held in the Chapel for those desiring to attend. Five minute Morning Devotions are conducted by the cadets each morning, Monday through Friday at 7:45. Though the attendance is voluntary, the number attending is most gratifying. In addition to these services, each Wednesday evening a Bible Study and Prayer Service is held for those cadets desiring to attend.

Special services are held for Episcopalians on Ash Wednesday and Good Friday and the special early masses on holy days of obligation for Roman Catholics. During the Advent season, and shortly before the beginning of the Christmas furlough, a great carol service is held. Annually, parallel religious emphasis week programs are conducted under four auspices—those for Protestant cadets, the Newman Club for Roman Catholics, the Hillel Club for the members of the Jewish faith, and the Greek Club for the Orthodox group. These programs, led by outstanding speakers, are intended to bring into clearer relief a sense of the dignity and manliness of the religious life.

In all the services thus conducted and in the other influences which the college brings to bear on its cadets, the casual and perfunctory is avoided. Cadets are encouraged to regard contacts with their church as vital to their education and development, the act of worship as a deeply significant experience that should be accompanied by dignity, reverence, and gratitude. Thus, on Sunday mornings one may view the impressive ceremony of battalions of cadets, each marching from their respective barracks across the drill field and converging on the chapel, and will sense no evidence of mere routine in their attitude. On the contrary, in this spectacle and in the service that follows, there is a fine manifestation of respect and reverence for this hour as the most significant of the entire week. The college realizes that these services, and the underlying religious life of which they are the outward manifestations, must be more than a mere gesture. Otherwise young men will find, as their intellectual horizons widen and they come into possession of the uncertain techniques of lay learning, that there is a temptation to abandon religious teaching as a guide and to

substitute "reason" for faith as the ultimate guide. From this peril, education must protect itself by constantly reminding young people that education builds and enriches life not by abandoning religious faith as outmoded, but by accepting it as the source of truth and understanding.

The inscription on the front of the chapel is "Remember now thy Creator in the days of thy youth."

Religious Groups

For Episcopal cadets there is a student parish, "St. Alban's at The Citadel"; for Roman Catholic cadets, The Citadel Newman Foundation; and for each other group an appropriate club. These meet on Monday evenings for instruction by the chaplain or spiritual advisor, and social functions are planned in cooperation with civilian young people's groups of similar churches in Charleston. Denominational chaplains from the major religious faiths in Charleston act as spiritual advisors to the cadets of their groups. Every cadet is encouraged to participate in the Monday night denominational meetings, so that students may leave The Citadel stronger in their faith than before they entered.

The Citadel Religious Council

The purpose of the Religious Council is to direct the course of religious activities at The Citadel under the President and with the supervision of the College Chaplain. The planning and supervision of all the religious programs of the year come under the direction of this council.

Placement Bureau

The Citadel Placement Bureau is operated for the purpose of arranging interviews between graduating seniors and prospective employers. To implement this service, resumes on senior cadets are made available to employers and follow-up records of employment are maintained.

THE HONOR SYSTEM

The honor system, of, by, and for the Corps of Cadets, came into being in September 1955. Since that time it has become an integral part of the training received by a cadet. The purpose of the honor system is to inculcate honor into each cadet so that he instinctively conducts himself in an honorable manner.

The guiding principle of the honor system is the Honor Code, which says simply "A cadet does not lie, cheat, or steal." These are three of the four violations, the fourth being failure to report a case of lying, cheating, or stealing.

The honor system is enforced by a Cadet Honor Committee made up of twenty-one members of the First Class who are elected by the three lower classes during the second semester of their Second Class year. The Honor Committee investigates all honor violations reported

and conducts trials as necessary. Conviction by the Honor Court requires a unanimous secret vote of "guilty" by members of the court. In case a cadet is found guilty by the Honor Court and the President approves the findings of the court, he is permitted to resign from the college.

The Honor Committee keeps current and distributes an honor manual which describes the honor system and its workings in considerable detail.

General

The Commandant of Cadets commands and administers the Corps of Cadets and its daily routine of duties. He grants leaves and other privileges provided by regulations and is charged with the maintenance of discipline over all students attending The Citadel. The department exercises supervision over barracks, controls the Officer in Charge and the cadet guard, and keeps the President of the College informed of matters pertaining to the conduct and discipline of the Corps of Cadets.

The Citadel is a military college, and it is therefore essential that a high standard of discipline be maintained. Through a system of merits and demerits, a record is kept of the conduct of each cadet. This record influences his military standing. Privileges of cadets who fail to respond to ordinary corrective measures are curtailed. Any cadet exceeding the allowed limit of demerits for the year will be dismissed.

By instruction and example cadets are taught to be neat in person and in uniform. Daily inspections of rooms insure cleanliness and good order. Through individual personal contacts and group meetings, cadets are encouraged to uphold the traditions of The Citadel and the standards of honor, integrity, and courtesy which are an outstanding mark of the cadet and gentleman.

System of Management

Leadership, initiative, and character are developed by placing upon cadets the stimulating responsibilities of command within the organization of the Corps of Cadets.

All cadets live in barracks. From reveille to taps, every hour of the cadet's time is accounted for. The regular habits of study and living thus formed, the attention to duty, obedience to authority, and love for order inculcated are considered among the most valuable features of the military education. While some of the graduates enter the military profession, hundreds in all walks of civil life attest to the high value of the training received at the institution.

The daily routine is regulated by the *Cadet Regulations*, generally known as "The Blue Book."

The Fourth Class System

The purpose of the Fourth Class System at The Citadel is to lay the foundation, early in a cadet's career, for the development of those qualities of character and discipline implied in the mission of The Citadel as a military college—to produce young men with alert minds and sound bodies who have been taught high ideals, honor, integrity, loyalty, and patriotism; who accept the responsibilities which accompany leadership; and who have sufficient professional knowledge to take their place in a competitive world.

These personal qualities must be deeply ingrained in the individual so that neither time nor troubles will erase them from his personality. The system demands more than a letter-of-the-law com-

pliance with the customs and traditions set down for the Fourth Classman's conduct. The tradition of The Citadel cannot be maintained by men who will do no more than is required of them. Self-discipline and self-evaluation develop men whose integrity and sense of duty cause them to serve selflessly beyond the prescribed limits of their tasks.

The Fourth Class System is both difficult and demanding. It represents an abrupt change from the life normally experienced in the home, and encompasses the entire period of a cadet's first year at The Citadel. It is administered impersonally, but at the same time exhibits the individual understanding necessary to effective leadership. It requires a full measure of mental preparedness and physical endurance.

The system by nature is arbitrary on the surface. It demands prompt and unquestioning obedience to authority through the use of a collection of customs and traditions. However, each of the elements or customs has a specific purpose of furthering a cadet's development.

The system is patterned after those used at our service academies and includes standing at a rigid position of attention (bracing), turning square corners when walking, undergoing neatness inspections before formation, learning various items of Fourth Class knowledge, working on approved company details such as minor chores incident to keeping their own area of barracks in order, and submitting to a variety of minor restrictions concerning the use of certain campus grounds and facilities, the wearing of the uniform, and the general conduct of a Fourth Classman.

Cadets who are unable to meet the desired standards or violate one or more of the customs are subject to corrective action. This can range from a verbal reprimand to walking tours on the quadrangle of barracks. Other disciplinary measures include restriction to limits of campus, confinement to rooms, undergoing special inspections, and participating in special constructive physical training periods like those employed by the U. S. Armed Services. In extreme cases, any cadet freshman or upperclassman who is unable to conform to the military way of life may be brought before a suitability board to determine his fitness to continue at The Citadel.

The various measures described above are designed to test a cadet's mettle and to determine his motivation for cadet life. Their value lies in developing a cadet's ability to perform his duty successfully under trying and stress-producing conditions.

Hazing is not a part of the Fourth Class System and is not condoned. The suffering of degradation, humiliation, and indignity does not foster the rapid development of these qualities sought in Fourth Classmen.

At The Citadel, where the system is administered by upperclass cadets and where all the cadets live together in barracks, the presence

of individuals who are obsessed with the idea that indignities and humiliation are part of a student's education cannot be and is not tolerated. No cadet is wanted in the Corps who does not subscribe voluntarily to the regulations which absolutely bar hazing. All members of the third, second, and first classes are required to sign a statement that they understand the meaning of hazing and promise that they will not engage in hazing in any form during their connection with The Citadel. The occasional upperclassman who misuses the system is dealt with severely.

It is to be emphasized that the Fourth Class System is a formidable challenge to any young man. The decision to enter The Citadel must be preceded by a conviction on the part of the prospective cadet and his parents that he has the mental and physical characteristics appropriate to the system, and that he possesses a willingness to undergo the system's rigors with a determination to see it through and to reap its benefits.

Although the system is demanding and difficult, the rewards are considerable. They more than justify the effort. At recognition by the Corps in June, a better man emerges—one who is mentally, morally, physically, and spiritually prepared to accept the reins of leadership which will ultimately be his at The Citadel and in the world.

Hazing

Every cadet entering the third or higher class will be required to subscribe to the following promise:

"Hazing is defined as striking, laying hands upon, treating with violence, or offering bodily harm to a cadet who has been connected with the college for less than one year; or other treatment of a harassing, tyrannical, abusive, or humiliating nature; or requiring a fourth-class cadet to perform any personal service whatever for a member of the third, second or first class.

"I fully understand the meaning of hazing as above defined and hereby promise that I will not engage in hazing in any form during my connection with The Citadel."

Allowances of Demerits

When any cadet accumulates more than 130 demerits in his First Class year, 150 in his Second Class year, 170 in his Third Class year or 200 in his Fourth Class year, such cadet shall be declared deficient in conduct and reported immediately to the President for dismissal. Cadets repeating the Fourth Class are allowed but 170 demerits.

Customs and Courtesies

"Customs and Courtesies," a 37-page booklet published at The Citadel, is designed to provide cadets with a compact manual of good deport-

ment. This manual is used as the textbook in a course in deportment given under the supervision of the Commandant of Cadets.

After explaining clearly the value of a knowledge of the correct way of conducting oneself in social contacts, the booklet presents detailed information on such matters as personal appearances and dress, correct speech, table manners, introductions, calling cards, calling, social correspondence, overnight visits, and punctuality.

Automobiles

Cadets of the first, second and third classes, proficient academically and in conduct for the preceding semester, are granted the privilege of having cars and parking them in assigned class parking areas on the campus. The privilege may be withdrawn on loss of good standing. Cars must be registered with the Adjutant. Evidence of legal state registration must be shown and all registrants will be required to have a minimum of bodily injury liability insurance, \$10,000 per person, \$20,000 each occurrence and property damage liability insurance, \$5,000 each occurrence. Parking permits in the form of stickers will be issued to each registrant on the day he brings his car on the campus. Stickers will be affixed permanently on the left-front and the rear bumpers of the car.

Fourth classmen (freshmen) are not permitted to have cars on the campus.

Emergency and Special Leaves

By applying for permission for their sons' entry to The Citadel, parents voluntarily relinquish control over them to the authorities of the college, and it is expected that they will not ask for leaves for their sons except in emergencies. In every case the reason for the leave should be stated and the decision left to The Citadel authorities whether the circumstances warrant the approval of the application. This must be done before leaves will be approved.

The paragraphs which follow are extracted from regulations for the Corps of Cadets of The Citadel.

27.04. EMERGENCY AND SPECIAL LEAVES: a. Emergency leave may be granted only upon the request of the parent or guardian in the event of death or critical illness of a member of the cadet's immediate family. Duration of this leave will be predicated upon distance and time required. The immediate family includes parents, grandparents, brothers, sisters, and the permanent resident members of the family.

b. Special leave may be granted upon the request of the family or guardian in the event of the marriage of a member of the cadet's immediate family or golden wedding anniversary in the cadet's family.

c. Cadets may be granted special leave for such unusual business

affairs as cannot be arranged by correspondence, but require the presence of the cadet in person, in which case applications from parents or guardians stating the circumstances are required. In all cases, the final decision must rest with the authorities of the college.

41.08 CADETS FORBIDDEN TO ARRANGE FOR MEDICAL SERVICES: Except in emergency occurring on leave and requiring immediate medical attention, a cadet will not arrange for or receive professional treatment from doctors or specialists without permission of the Surgeon. Applications for any special leaves required for such treatment will be submitted to the Commandant and referred to the Surgeon.

41.09 SPECIAL MEDICAL AND DENTAL SERVICES: Dental work, special examinations of the eyes, etc., should be looked after during the Summer, Christmas, or Easter furlough periods. Special leaves will not be granted for these purposes. In cases of emergency, there are competent specialists and ample facilities in Charleston to take care of any medical or dental needs of cadets. In matters of health, the regular Surgeon of the College will advise the proper course to be taken. In case the service of a local dentist, oculist or other specialist is deemed necessary, the request therefore will be submitted to the Surgeon, who if he approves the request, will make all necessary appointments for the cadets.

Week-End Leave

Generally, week-end leaves are authorized in the numbers shown below:

Class	First Semester	Second Semester	Total for School Year
First	4	4	8
Second	3	3	6
Third	2	2	4
Fourth	0	2	2

The Commandant of Cadets will assume that all cadets have permission to avail themselves of this privilege unless notified to the contrary in writing by parents or guardians.

Furloughs

Suspension of work for ten days, including Christmas Day and New Year's Day, is required by law. Normally furloughs are granted at Christmas, at Easter, and upon completion of the Second Semester.

DEPARTMENT OF CADET AFFAIRS

Cadet affairs are those activities in which cadets are involved when outside of the classroom. Their purpose is to provide for each cadet the choice of engaging in one or more of the sponsored activities in order to assume his Citadel community responsibility in an area of his liking and capability.

When new cadets report to the college, all are at once put in uniform; and, as far as possible, all artificial distinctions based on wealth, position, or influence are minimized, and the cadet is encouraged to achieve his place by individual merit.

Although all cadets live under practically identical conditions and are rated by the same standards, cadet affairs offer a wide range of opportunities for each to develop in accordance with his individual needs and aptitudes. Elsewhere in this bulletin the various activities that are open to cadets are described.

Committees of the Corps of Cadets

The President's Advisory Committee was inaugurated for the purpose of keeping the president and the Corps of Cadets working in congenial relationship.

The Cadet Honor Committee is made up of first classmen and the group upon whom rests the actual administration of the Honor System of the Corps of Cadets.

The Cadet Orphanage Fund Committee is directly in charge of all phases of its program. The objective is to give the children of the Charleston orphanages a better Christmas. The committee collects donations from cadets, finds out the needs of the children, makes the purchases, and wraps and tags the presents by name. On the last day before Christmas furlough the cadets form a motorcade to visit each of the orphanages to present the gifts in person. This program was organized in 1952.

The Cadet Activity Advisory Committee has the mission of advising the Cadet Affairs Dean on all activities under the jurisdiction of that office. The committee pays particular attention to the auxiliary enterprises which include the cadet canteen, the barber shop, the billiard room, the bowling alleys, and the servicenter.

The Ring and Invitation Committee

The Ring and Invitation Committee of the First Class is charged with the responsibility of purchasing the class rings and the commencement invitations of the class. Specific regulations govern the design and specifications, the award of the contract for manufacture, the ordering, and the wearing of the ring. The committee is in charge of the ceremonies conducted when the first classmen receive their rings.

Social Events

All Citadel dances are under the sponsorship of the Standing Hop

Committee, an organization elected by the cadets from the student body. The duties of this committee are to set dates for the dances, provide bands, and coordinate all plans for the hops held for the Corps.

The Citadel hops are the highlights of the social activities of the cadet. As dances are strictly for and by cadets, few invitations are issued to civilians. The formal hops held annually are the Homecoming Hop, First Class Ring Hop, the Corps Day Hop, and the Commencement Hop. Although these dances are formal, by tradition corsages are not worn by the cadets' dates. In addition to the formal dances, several informal dances are held throughout the year. Often the cadet orchestra, "The Bulldogs," plays for these dances. Other than the allocation from the Cadet Activities Fee for athletics, the next largest allotment of funds is made to finance these formal and informal hops and other social functions. Every cadet is privileged to attend the social activities held.

The College Hostess

The Citadel hostess, Mrs. A. E. Dufour, serves as social advisor for students. Her office is located in the reception room of Mark Clark Hall. Under her supervision dancing classes are conducted and informal tea dances are held in the auditorium on weekday afternoons. At the time of formal hops, she arranges for overnight accommodations in private homes for the ladies from out-of-town and plans for refreshments and the care of personal effects at the hops. She keeps the reception room open and maintained in good taste for the use of cadets and their guests from 9:00 a.m. until retreat daily. The hostess serves the students constantly in the discussion and solution of their personal problems.

The Fine Arts Series

Now looking forward to its third season, The Citadel Fine Arts Committee will continue its efforts to make available a program which will be both entertaining and instructive. During the first two years of the series, cadets have been able to attend a fully staged Shakespearean play, a concert by a Metropolitan Opera mezzo-soprano, and a dramatic presentation of the poetry of Robert Frost. They were also treated to a performance by a dance group from Spain and another from Korea, Ruth Slenczynska at the piano, and Mishel Piastro and the Longines Symphonette, and Sabicas, known as "El Rey de la Guitarra Espanola." The series for next year will present new artists and performances of a kind not yet offered.

Publications

The Brigadier is published semi-monthly by a staff of cadets. It serves as the campus newspaper and is financed by an allotment from the student activities fee, augmented by the revenue from subscriptions and the sale of advertising space.

The Shako, the literary magazine, is published three times a year. It is supported by an allotment from the student activities fee.

The Sphinx is published annually by a staff of cadets. This publication serves as a semi-official record of the year. By means of copy and photographs, the faculty and staff, student classes, military organizations, athletic activities, social affairs, and other student programs are portrayed vividly to preserve a record of student life for posterity. *The Sphinx* is financed by an allotment from the student activities fee and the sale of advertising space.

The Guidon, the cadet handbook, is published annually by a staff of cadets. The handbook contains a complete description of the activities of the college, college history, customs, duties and responsibilities of cadets and deals with other phases of cadet life. It is particularly helpful to entering freshmen. The publication is financed by the allocation of a portion of the student activities fee. It is distributed to all students at the beginning of the college year.

Activities Coordinated by the Department

Many of the cadet activity organizations of real importance in the educational training process function under the academic, the military, or the athletic departments with which they are separately and directly related. The department seeks to assist in the coordination of the following categories: The literary and discussion groups, the professional clubs and societies, musical organizations, and certain other organizations.

Literary and Discussion Groups

Five student societies offer opportunities for discussing subjects of cultural interest and for developing proficiency in public speaking: the Calliopean Literary Society, the Polytechnic Literary Society, the International Relations Club, the English Club, and the Round Table.

The Calliopean Literary Society sponsors forensic interest including radio speaking, intramural and intercollegiate debating, and oratory. Membership is open to all students.

The Polytechnic Literary Society, organized in 1847 and reactivated in 1965, undertakes each year an active program of formal intercollegiate and intramural debate on the national college topic. The purpose of the society is to promote sound inquiry into questions of current national import as well as to develop excellence in public speaking. Members of all four classes are invited to join.

The International Relations Club is devoted to the study of contemporary world economic and political problems. Membership is restricted to those students especially interested in government and politics.

The English Club is an organization of students interested in English. Professional writers are heard and problems of literary interest are discussed.

The Round Table is a discussion group with a limited membership. Elections are made from lists prepared by the faculty of those students with marked intellectual interest.

Professional Clubs and Societies

The following professional clubs and chapters of national professional societies are to be found at The Citadel: Knox Chemical Society; Pre-medical Club; Student Chapter, American Society of Civil Engineers; Student Chapter, American Institute of Electrical and Electronic Engineers; Sigma Pi Sigma, national honor society in physics; Student Chapter, Society of American Military Engineer; Student Chapter, American Ordnance Association; Economic Honor Society; Association of the United States Army; Beta Iota Chapter of Pi Sigma Alpha, national political science honor society; Phi Alpha Theta, national honor society in history; Spanish-American Club; Student Chapter, American Road Builders Association; Student Section of American Institute of Physics; Student Education Association of South Carolina.

Music

The cadet orchestra, under the direction of Major Leon Freda, furnishes the music for informal dances.

The Citadel Chapel Choir, under the direction of Mr. Vernon W. Weston, serves as the choir at chapel services and gives programs in Charleston churches.

The Citadel Band, under the direction of Major Leon Freda, provides the music for parades, reviews, and other official ceremonies.

Both the Drum and Bugle Corps and The Citadel Bagpipers are integral parts of the Band. Lieutenant L. J. Grant-Alexander is the Pipe Major.

Other Organizations

There are several important cadet organizations that do not come under a specific classification. The following should be mentioned as having distinctive functions in cadet life: The Summerall Guards (first classmen), the Bond Volunteers (second classmen), the junior Sword Drill, Sons of the American Revolution, Alpha Phi Omega (scouting), the Camera Club, and the regional cadet clubs.

Recreational

The Citadel Yacht Club

The Citadel Yacht Club membership consists of all members of the Corps of Cadets, faculty, and staff. There are no dues connected with the membership, and preference is given to cadets in the use of club facilities.

The club fleet consists of a fifty-four foot cabin cruiser, twelve small sailboats, six outboard motor boats, and several other miscellaneous craft. These craft are all available to cadets without charge, and instruction is available for all cadets by experienced cadets of

The Citadel Sailing Team. Intramural sailing competition is conducted among qualified small boat handlers. This program enables any cadet to become proficient in a sport which he can carry over into later life.

Yacht Club facilities consist of a club house, storage area for small boats, dockage, marine railway, sail loft, and work area for maintenance and repair of small boats. Cadets may use the facilities of the Yacht Club for privately owned boats, to include storage for a small fee.

The Rod and Gun Club

The Rod and Gun Club is a new and growing club on campus. All four classes are permitted to participate in its activities. The club room, in the rear of the Armory, provides a convenient place for meetings, contains personal lockers, and a gun rack facility which was constructed by cadet members. Several organized hunting and fishing trips have been realized, and a growing number of outdoor activities is expected.

The club has available an automatic trap range. A shot-shell re-loader provides members a weekly shoot at a low cost. The main objectives of the club are to extend an appreciation for good sportsmanship and to increase the enjoyment of outdoor activities.

The Citadel Sports Parachute Club

The Citadel Sports Parachute Club is opened annually for voluntary membership. The applicants are normally freshmen who are challenged by the excitement and vigors of this fast-growing sport. Written parental permission is required to become a member.

The Citadel Sport Parachute Club has successfully competed with clubs all over the country. This year they have already won one third place, one second place, and two first place trophies in competition.

The Citadel Flying Club

The purpose of The Citadel Flying Club is to stimulate, encourage, and promote interest in aviation and flying among the Corps of Cadets. The club owns and operates two Piper J-3 aircraft, which are available for instruction at a reasonable fee and also for cross country flights by qualified cadets. All flying is performed in strict compliance with regulations of the Federal Aviation Agency and the club. Membership is open to all cadets and is gained by application and approval by a majority of the active members. Permission of a minor cadet's parents is required for membership.

Facilities

Mark Clark Hall

Many of the cadet affairs are housed in Mark Clark Hall, The Citadel's student union building. This handsome and spacious structure was dedicated on May 31, 1957, and was completely furnished and equipped for the opening of the 1957-1958 session. The Board of Visitors of The Citadel named the structure Mark Clark Hall to honor

General Mark Wayne Clark, president emeritus. Mark Clark Hall was constructed and furnished at a cost exceeding \$1,000,000 from tuition fees paid by cadets; no State appropriation was required to defray this cost. The facilities which are provided are listed as follows:

First Floor	Second Floor	Third Floor
Reception Room	Lounge & Club Room	<i>Sphinx</i> Staff Office
Hostess Office	Kitchen	<i>Brigadier</i> Staff Office
Cadet Depository	Cadet Store	<i>Shako</i> Staff Office
Cadet Canteen	Alcove Lounge	<i>Guidon</i> Staff Office
Barber Shop	Auditorium	Honor Court
Post Office	Television Room	Projection Booth
Billiard Room	Executive Offices	Dark Room
Bowling Alley	Fund Raising Office	Game Room
		10 Guest Rooms
		Catholic Chaplain's Office and Chapel

Full use is made of all these facilities. Cadets, alumni, and friends of The Citadel are proud of the fine edifice which contributes much to stimulate interest and participation in extracurricular activities.

The Beach Club

The Colonel Robert R. McCormick Beach Club of The Citadel, located on The Isle of Palms, was dedicated on November 30, 1958. It offers to cadets unparalleled opportunity for enjoyment of sun, sea, and surf. The beautiful, two-story club house is on a five-acre tract overlooking the Atlantic. The club was named to memorialize a great American soldier, editor and philanthropist, Colonel Robert Rutherford McCormick, whose gift to The Citadel made possible the construction of the facility.

The Beach Club is for the use of cadets, staff, faculty, and their guests only.

The simple, necessary rules and regulations for the use of the club state that drinking or the possession of alcoholic beverages is prohibited; cadets must be in complete uniform when arriving and leaving. Swimming suits or appropriate civilian clothes are worn at the club; swimming is authorized only when life guards are on duty; no bathing suits may be worn in the main upstairs room, but they may be worn on the porches; cadets will limit visitors to three, except when visiting families are guests. Violations are handled by the Cadet Beach Club Committee.

The Beach Club hours vary with the seasons of the year and are set to accommodate the needs of the cadets and summer school students. Parts or all of the facilities may be reserved for group functions.

The Beach Club is well equipped for parties. On the second floor, in addition to a large screened porch, is a modern kitchen and a general purpose room with huge open fireplaces at each end. The

ground floor contains an apartment for the resident custodian and the bathhouse area.

On the property stands an enclosed barbecue and grill area which offers protection from the elements for parties suited for these facilities. An oyster roast grill and four shuffleboard pads are located outside. In the wooded area around the beach house grills are located, each with picnic table and running water. The area is floodlighted to facilitate nighttime parties for small groups.

Auxiliary Enterprises

The Citadel owns and operates all auxiliary enterprises under the supervision of the Department of Cadet Affairs. These enterprises are in existence primarily to provide appropriate and timely services for the convenience of the Corps of Cadets. The net profits from each enterprise are deposited in the Mark Clark Hall Fund. This fund is used exclusively to foster and support other phases of cadet life as directed by the President of The Citadel.

These enterprises are the barber shop, billiard room, bowling alleys, cadet canteen, service station, and automatic vending machines. The auxiliary enterprises are under the direct management of Major Harvey F. Brand.

Service Station

The Citadel Servicenter, located north of the Armory, fills a real need for convenient vehicle service. The service station hours are regulated to accommodate the needs of the cadets, faculty, staff, and other employees of The Citadel. The prices charged those eligible to use the services are reasonable, and the station is fully equipped.

Faculty Chairman of Athletics: Col. D. S. McAlister
Director of Athletics: Col. Edward L. Teague
Assistant Director of Athletics: Capt. Henry M. Read
Secretary, Brigadier Club: 1st Lt. A. V. Hogan
Sports Publicity Director: 1st Lt. William E. Hallman

Coaches

Football Head Coach: Jimmy D. Parker. Assistants: Harold M. Steelman, Robert E. Gatling, D. C. Henry Witt, Chalmers M. Port, L. Oval Jaynes, Don Murry.
Basketball Head Coach: Melvin K. Thompson. Assistant: Edward Thompson
Baseball: Chalmers M. Port
Track, Indoor Track: Dwight Adams
Tennis: Donald C. Bunch
Golf: Bob Gatling
Rifle: E. A. Fox
Wrestling: Don Murry
Swimming: Ronald A. Reilly
Soccer: Frank O. Frohlich
Cross-country: Dwight Adams

The Citadel is a member of the National Collegiate Athletic Association and the Southern Conference. The Southern Conference is made up of nine institutions: The Citadel, Davidson College, Furman University, George Washington University, University of Richmond, Virginia Military Institute, West Virginia University, the College of William and Mary, and East Carolina College. The Citadel sponsors twelve teams in intercollegiate athletics, both varsity and freshman. The twelve sports are football, basketball, swimming, wrestling, indoor track, baseball, outdoor track, rifle, golf, tennis, cross-country, and soccer.

Facilities for well-rounded development in athletics are provided for all cadets and are constantly being improved as the program expands. Home football games are played in Johnson Hagood Memorial Stadium, which seats over 22,000 spectators. The Citadel Armory is used not only for varsity basketball but for intramural basketball and recreational games. The seating capacity for varsity basketball is approximately 4,500 with ample seating for all cadets in bleachers and seats surrounding the main court. Home baseball games are played on the Washington Light Infantry Field, which is located in the southwest area of the campus. The varsity and freshman wrestlers have a large wrestling practice room which is located in the basement of Alumni Hall, and all official matches are held in the Armory. The swimming pool has six lanes and is of regulation length for official intercollegiate meets. It is ranked as one of the outstanding pools in the Southern Conference. There are six well-kept, all-weather

tennis courts on the campus for varsity tennis use and for the convenience of all cadets. Golf facilities are available to Citadel cadets at the local courses. Indoor and outdoor rifle ranges are available for varsity competition as well as for training and recreational use by all cadets. Willson Field, a large area on the extreme north end of the campus, provides space not only for two practice football fields but also a quarter-mile track which has a 220-yard straight-away. Track and field events in official competition are held on this field. It is also used for intramural activities when not in use by varsity teams.

All intercollegiate athletic teams are handled by experienced and competent coaches who take every precaution for the physical conditioning of the teams under their care. A carefully supervised training room is open all year for the care and treatment of athletes on all twelve teams.

The Citadel is justly proud of the intercollegiate record of all the teams representing the military college on the different fields of athletic competition, but is aware of the fact that not all students can compete in intercollegiate athletics, so that every measure is taken to provide adequate facilities for healthful athletic participation for all cadets.

GENERAL JAMES W. DUCKETT

Dean of the College

COLONEL WALLACE E. ANDERSON

Academic Dean

Personal Requirements

An applicant for admission to The Citadel must:

- be a male, at least five feet in height, and physically qualified for R.O.T.C.

- be at least sixteen and less than twenty-one years of age at the time of his entrance.

- be unmarried. No married person will be admitted as a cadet. If a cadet marries, he will be discharged immediately. Each cadet must certify in writing each year (as required by the college authorities) that he is not married.

- have no record of conviction of a criminal offense showing poor moral character.

- provide evidence from his school authorities and personal references that he is of good moral character and possesses the potential and the personality to conform to the ethical standards and the strict discipline of cadet life at The Citadel. The Citadel reserves the right to require of any applicant a written certificate to this effect signed by at least two graduates of The Citadel.

Educational Requirements

An applicant for admission to The Citadel must be a graduate of an accredited high school. This basic requirement for admission to the Freshman Class derives from the college admission requirements prescribed by the Southern Association of Colleges and Schools, of which The Citadel is a member. The standards of the Association require "the satisfactory completion of a four-year course of not less than fifteen units in a secondary school approved by a recognized accrediting agency, or in a secondary school that is a member of this Association, or the equivalent of such a course as shown by examination."

The required high school subjects are:

- four (4) units of English

- three (3) units of Mathematics, two (2) of which must be Algebra. For physical science and engineering majors, the third unit must be Plane Geometry.

- one (1) unit of History.

Entrance Examinations

All candidates for admission to The Citadel are required to take the College Entrance Examination Board Scholastic Aptitude Test (SAT). The Mathematics Achievement Test is required for candidates majoring in engineering or the physical sciences. The Citadel strongly recommends that both the English Composition and the Mathematics Achievement Tests be taken by all applicants, because, in the event an applicant's SAT scores or high school grades are considered too low, these achievement tests may then be required.

In order to apply for these tests, the applicant must write directly to College Entrance Examination Board, P. O. Box 592, Princeton, New Jersey, for its Bulletin of Information and application blank.

These tests are normally offered at locations throughout the United States and in some foreign countries in December, January, and March. An application to take these tests must be submitted to the College Entrance Examination Board at least one month prior to the date of the desired tests.

If an applicant lists The Citadel on his College Entrance Examination Board application as one of the colleges in which he is interested, his test scores will be sent to The Citadel approximately thirty days after the tests are taken. Therefore, since The Citadel desires to begin making final decisions on applications in February, an applicant for admission to The Citadel should complete the required entrance examinations no later than mid-January.

Admission Procedure

Formal application for admission to The Citadel must be submitted by parent or guardian on the blank application form provided on request by The Registrar, The Citadel, Charleston, South Carolina.

A non-refundable application fee of \$10.00 must accompany each application.

Applications for admission should be submitted early in the prospective cadet's senior year in high school. In addition, the applicant should make early arrangements to take the required College Entrance Examination Board tests, and to have those test scores sent to The Citadel. The Registrar will obtain the applicant's high school record directly from his school.

The Citadel will advise the applicant of subsequent procedural actions as they are required.

A reservation fee of \$50.00 is required of all new cadets accepted for enrollment (in the regular session at The Citadel), payable within fifteen (15) days after notification of acceptance by the Registrar. This reservation fee will be applied to the first installment of regular college fees; it is not refundable to new cadets who cancel their reservation after July first. It should be emphasized that each applicant who is approved for enrollment must undergo a thorough physical examination, the results of which must be reported on the physical examination form provided by The Registrar at the time of notification of academic acceptance. Final acceptance is contingent upon the results of this physical examination.

Applicant's Weekend Visit to The Citadel

The Citadel strongly recommends and urges each applicant to visit the campus for a weekend during the school year, after January first.

Because of the military aspects of The Citadel's unique program, it is *very important* that each applicant endeavor to take advantage of this opportunity.

For a nominal charge, the applicant eats his meals in the cadet dining hall and lives in barracks with the Corps of Cadets. He is thus able to observe cadet life in general and to discuss its specifics

with both freshman and upper-class cadets. In addition, through the medium of an interview with an officer of the Commandant's staff, the applicant may further discuss his desire to attend The Citadel, and the college may achieve an evaluation of the applicant away from his home environment.

Details of this weekend visit program are sent to each applicant immediately following receipt of his formal application. It is requested that the applicant notify The Adjutant, The Citadel, Charleston, S. C. 29409, at least two weeks prior to the specific weekend he chooses for his visit.

If a weekend visit is not feasible or impossible because of distance or other difficulty, arrangements will be made by The Citadel authorities for the applicant to be interviewed by a Citadel graduate in his locality. The Committee on Admissions reserves the right in particular cases to require an applicant to make a visit to The Citadel and to be interviewed on the campus.

Admission Policy

The Citadel Committee on Admissions gives equal consideration to all applicants who meet the personal and educational requirements for admission. No single factor controls acceptance of an applicant. The Citadel seeks to enroll well-rounded, mature students whose motivation and educational achievement indicate that they are prepared to do college work with reasonable probability of success. Therefore, the Committee on Admissions bases its decision concerning each applicant on an overall evaluation of the following:

a) High School Record (courses, grades, class standing). The high school record tends to indicate an applicant's motivation, study habits, and scope of interest thus permitting an evaluation of his educational potential and preparedness to do college work. Particular attention is given to the grades achieved in such college preparatory subjects as English, mathematics, science, history and foreign languages.

b) College Entrance Examination Board test scores. An applicant's test scores on the College Entrance Examination Board's Scholastic Aptitude Test and Achievement Tests receive considerable emphasis. Although test scores represent only one factor in the determination of an applicant's acceptability, they tend to indicate his educational development with respect to his contemporaries and therefore they permit a reasonable evaluation of his actual preparedness and potential to do college work.

c) Recommendations.

The personal evaluation of an applicant by a high school official, normally the principal or the guidance counselor, must include a positive recommendation that the applicant is prepared, educationally and emotionally, to enter college. This recommendation is of great importance to the acceptance decision because it represents judgments on ability and maturity which derive from considerable experience

with and observation of the applicant during his most formative years.

The recommendations of an applicant's personal references augment and reinforce the high school official's evaluation and are therefore indispensable. They provide the Committee on Admissions with information relative to the applicant's background, personal characteristics and reputation, and provide additional judgments of his readiness and suitability to enter college.

d) Weekend visit by applicant to The Citadel.

The report of an applicant's interviews with academic and military personnel of The Citadel is considered essential to thorough evaluation of his overall attitude toward entering college, particularly toward his entering The Citadel.

In general, The Citadel seeks to determine acceptability through a thorough evaluation of each applicant's character, maturity, motivation, readiness for college, amenability and obedience to authority, emotional stability and potential as a contributor to cadet life. Where any of these factors are in question, the college will obtain additional information by means of any of the following: additional interviews with the applicant; interviews with parents and/or members of his community; requiring the applicant to write a special report on such subjects as his goals in life, his reason for his choice of The Citadel and/or the reasons supporting his choice of major field of study; requiring the applicant to submit to a special test designed to examine in detail any aspect of the applicant's character or potential.

Advanced Placement and Credit

The Citadel awards advanced credit and advanced placement where appropriate to applicants who score four or five on Advanced Placement Examinations given by the Educational Testing Service in the eleven fields of study listed in the 1966-68 Course Descriptions in the College Entrance Examination Board's Advanced Placement Program. The examination paper of a candidate scoring three will be reviewed by The Citadel academic department head concerned with the field of study, and advanced placement may be given with or without credit.

It is Citadel policy to give mandatory advanced placement in a language to those entering cadets who have completed two or more years of a language in high school. For example, an entering cadet who has had two or more years of language study in high school and who wishes to continue with that language at The Citadel will be advanced to the sophomore or second year course in that language. Satisfactory completion of the sophomore language course may then satisfy The Citadel's two year languages requirement. (The Citadel catalogue should be consulted to ensure that the language taken is the language required by the chosen curriculum.) Advanced placement does not entail advanced credit; the by-passed semester hours of Freshman or first year language must be filled with electives. An entering cadet who does not wish to continue study of a foreign lang-

uage for which he has presented two high school credits may elect to begin a new language in which he has had less than two years of previous instruction.

In subjects other than language, advanced placement may be granted upon recommendation of the academic department head concerned. His recommendation would be based upon evidence, usually derived from an interview with the entering cadet, of proper preparation and achievement to assure success in the advanced course. In such cases, no credit is awarded for the by-passed course or courses; electives would be required to make up for the by-passed semester hours.

Initial Acceptance, Transfers and Withdrawals

New Cadets are admitted only in September.

It is the general policy of the college not to accept transfer students.

If a cadet finds it necessary to withdraw from The Citadel during the college year or does not wish to return to The Citadel the September following any college year, a written request for an honorable discharge must be sent by the parent or guardian to the Registrar. It is the general policy of The Citadel to not grant discharges between the completion of examinations and commencement exercises or at the beginning of a furlough.

EXPENSES

The Citadel, a state supported institution, is operated on a non-profit basis. The cost of operation is underwritten with fees collected from students and appropriations made by the General Assembly of South Carolina. Non-residents of South Carolina are required by law to pay a larger portion of the cost of their education than is required of South Carolinas. This differential is \$550.

The Dean of Financial Affairs and Comptroller is the chief business and fiscal officer of the institution. All correspondence concerning these matters should be directed to Colonel J. F. Bosch, Jr., Dean and Comptroller.

Fees

The college fees shown below in the Schedule of Payments are required to be paid by all students. The college reserves the right at any time to adjust fees to meet the current cost of operation should it become necessary. Registration, Tuition and College Fees are not refundable. Auxiliary Services Fee is refundable on a pro-rated basis.

Payments

The academic year at The Citadel is divided into two semesters. Fees are paid in four installments - two each semester. The installments are due and payable as shown in the schedule below. Bills will be rendered to the parents or guardians approximately one month prior to the date the installment is due. All remittances should be by money order or check, made payable to The Citadel and mailed to Colonel J. F. Bosch, Jr., Comptroller.

Late Payments

All college fees must be paid by the dates indicated in the schedule below. A penalty of \$5.00 for the first day and \$1.00 per day thereafter until all fees have been paid will be assessed each student for failure to pay any installment on the date it is due. Also failure to pay an installment or any part thereof subjects the cadet to being dropped from enrollment at The Citadel under the College Regulations. If it is inconvenient or impossible to pay the installments as shown in the schedule, arrangements should be made with your local bank or other financial institution to handle deferred payment financing.

Schedule of Payments for South Carolina Students

Date Due	Fresh- men	Sopho- mores	Juniors	Seniors
†Reservation Fee:

Footnotes on Schedules of Payments and Expenses

- † 1. The reservation fee of \$50.00 will be credited to the first installment of the first semester.
- § 2. An additional deposit of \$60.00 is required of freshman students who elect engineering drawing.
- * 3. Those Fourth Classmen (Freshmen) and Third Classmen (Sophomores) formally enrolled under the Army or Air Force R.O.T.C. Basic Program will receive a credit of \$21.00 uniform allowance on the installment due on January 29, 1968 and April 1, 1968, respectively.
- Those Second Classmen (Juniors) and First Classmen (Seniors) formally enrolled under the Army or Air Force Advanced Program will receive a \$50.00 uniform allowance credit on the installment due on January 29, 1968 and April 1, 1968, respectively.

For particulars see page 64.

Explanation of Fees

Reservation Fee: A reservation fee of \$50.00 is required of all cadets. This fee is not an additional charge but is an advance payment toward the fees due for the Fall Semester. It assures a cadet a place in the Corps of Cadets and barracks for the following September.

All new cadets are required to pay this fee within fifteen days after notice of acceptance has been received from the Registrar.

A cadet currently enrolled who plans to continue his education at The Citadel is also required to pay the reservation fee not later than July 1 for the semester beginning in September. If this fee is not paid

by July 1, The Citadel is in no way obligated to permit him to continue his education at The Citadel.

The reservation fee will be refunded to old students who notify the Registrar in writing not later than July 1 to cancel their reservations at The Citadel. After July 1 but prior to registration for the Fall Semester, this fee will be refunded only to those upperclassmen (sophomores, juniors, and seniors) who have been dropped from enrollment at The Citadel due to academic deficiencies or other causes.

Those students who complete registration for the fall semester will receive credit on the first installment for the reservation fee previously paid.

Tuition. — The Board of Visitors of The Citadel has established the following tuition fees:

South Carolina Students — For all students whose guardians or parents reside in South Carolina the tuition fee has been established at \$100.00 per academic year or \$50.00 per semester.

Out-of-State Students — All students whose guardians or parents are non-residents of South Carolina will pay an out-of-state tuition fee.

The out-of-state tuition fee has been established at \$350.00 per academic year or \$175.00 per semester.

This fee is not refundable.

College Fee.—A college fee of 362.00 is assessed South Carolina students and \$662.00 for out-of-state students per academic year. This fee is used in the support of the Library, general overhead and maintenance of the college, and Student Activities. That portion of the fee going to the Student Activities is used in the support of student publications and organizations such as The Sphinx, cadet annual; The Brigadier, cadet newspaper; The Shako, cadet literary magazine; The Guidon, an information and orientation handbook; Religious Activities; social functions, including dances; intramural program, and athletics. That portion of the fee for athletics is not an admission fee to athletic contests, since students are admitted to all athletic games free of charge. The College Fee is not refundable.

Auxiliary Services Fee.—A fee of \$770.00 an academic year is assessed each student. This fee is used to cover room, board, laundry, normal hospital care, and hair cuts. Due to many uncontrollable factors, the college reserves the right to increase this fee at any time to meet current increases in the cost of operation. This fee is refundable on a pro-rated basis upon withdrawal from school.

Breakage. — A \$10.00 deposit will be maintained by all cadets enrolled at The Citadel. When there is insufficient money in the cadet's Account to cover the cost of damages to buildings, rooms, equipment, or loss of R.O.T.C. manuals and government property, this deposit will be used. This deposit is refundable after graduation or withdrawal from The Citadel.

Books and Supplies. — This deposit is used to cover the cost of books, supplies, uniform alterations, dry cleaning and pressing tickets, laboratory fees, engineering drawing equipment and supplies. The amount expended by each student varies. The required deposit is based on the average needs and in most cases is ample. If the deposit is not sufficient an additional deposit should be made. The required deposits are as follows:

Freshman Year	\$125.00
Additional deposits for freshman engineering students	\$ 60.00
(Students who elect engineering drawing will be rendered a supplementary bill for this deposit to cover the purchase of drawing instruments and supplies.)	
Sophomores	\$105.00
Juniors	\$105.00
Seniors	\$105.00

Uniforms. — All cadets are required to wear The Citadel uniform which is issued by the college. New cadets should not bring a supply of civilian clothes other than those which are worn upon reporting to the college as they are not permitted to wear civilian clothes except during authorized furloughs. It is also advisable to bring inexpensive trunks or suitcases since it is not permissible to retain them in the cadet's room; luggage must be stored in a warehouse provided for such at the risk of the owner.

Cost of uniforms should not be considered as an educational expense but rather a clothing expense which is incidental to attending any college. With proper care, the uniform should last for several years. Of course, the requirements during the subsequent years will depend on the manner in which the cadet has cared for his uniform. Small deposits are made in the sophomore, junior and senior years to replace worn-out uniforms. The overall cost of the uniform should not exceed that which would be incurred in purchasing clothes to attend a civilian college. The uniform deposit requirements are as follows:

Freshman Year	\$600.00
Sophomore Year	175.00
Junior Year	150.00
Senior Year	100.00

The woolen uniforms issued to cadets are custom-made for The Citadel. Once the uniforms have been fitted and issued to a cadet the entire cost will be charged to him.

Since the full dress uniform is tailor-made to the measurements of each cadet after enrolling at The Citadel, those cadets withdrawing from the school will be charged a cancellation fee of \$10.00 for cancelling the purchase of the full dress uniform during its manufacture. The deadline for cancelling the purchase of the full dress uniform

is November 15, 1967. After this date no cancellations will be accepted and the cadet will be charged the entire cost of the full dress uniform.

The cost of articles and uniforms issued to the freshmen during the 1966-67 academic year was as follows:

<i>Quantity</i>	<i>Article</i>	<i>Cost</i>
1	Bed Spread, Citadel	\$ 8.45
1	Blanket, Citadel	8.42
1	Blouse, Dress, wool	48.83
1	Blouse, Full Dress, wool	64.73
1	Cap, dress	7.43
1	Cap, field, @ \$2.48	2.48
1	Cap, white with covers	6.53
1	Coat, Overcoat, wool	52.19
1	Coat, rain	23.80
2	Coat, white and accessories	38.96
4	Cuffs, pairs, @ \$.47	1.88
2	Covers, mattress, @ \$2.92	5.84
2	Gloves, pairs dance, @ \$.65	1.30
6	Gloves, pairs, drill, @ .99	5.94
1	Gloves, pair, leather	3.00
1	Jacket, grey	16.01
1	Muffler	1.08
1	Shako, with pom pon chain	12.71
6	Shirts, grey cotton, @ \$3.30	19.80
6	Shirts, grey cotton, short sleeve, @ \$2.79	16.74
2	Shirts, athletic, @ \$.99	1.98
2	Shorts, athletic, @ \$.67	1.34
1	Suit, sweat	3.49
10	Trousers, grey cotton, @ \$3.40	34.00
4	Trousers, White, full dress, @ \$7.09	28.36
2	Trousers, Dress, wool, @ \$20.48	40.96
1	Trousers, Full Dress, Wool	20.79
3	Laundry Bags	2.16
1	Bathrobe	5.43
Miscellaneous Items:		
1 Belt, waist; 8 Collars; 1 Cover, rain cap		
2 Letters, company; 1 Links, pair, cuff; 2		
Numerals, class; 1 Plate, breast; 1 Plate,		
waist; Rental, cartridge box or music pouch;		
supplies; 2 Tags, Name; 2 Ties; Shine Kit, Clothes		
Hangers; Suspenders; Webbing		19.44
Total		\$504.07
S. C. Sales Tax		15.12
		<u>\$519.19</u>

The above prices were in effect during the 1966-67 academic year and are subject to changes in accordance with the contract prices at the time of purchase by the cadets. Extra shirts, trousers, or other articles of uniform in excess of the above quantities are not included in the required deposit. Additional deposits should be made if extra shirts, trousers, or other articles of uniform are desired.

In order to keep the appearance of the Corps of Cadets at the highest level, an additional issue of one dress blouse, one pair dress trousers, has been prescribed. Cadets in the Third Class (Sophomore Year) will be measured for these articles of uniform in November with delivery being made not later than March 15 of the next year.

Cadets in the Second Class (Juniors) will be issued four cotton shirts during the first semester.

The policy of The Citadel does not permit the use of used uniforms. Entering freshmen are advised not to procure such uniforms since they will not be approved.

In accordance with the above policy the college does not operate a second-hand uniforms department. Parents should not send used uniforms to the college tailor with the request that they be sold. Such uniforms when received will be returned at the expense of the sender.

Diploma Fee.—The charge for the diploma is \$10.00.

Transcript Fee.—Official transcripts of scholastic records will be furnished upon request. There is no charge for the initial transcript, but a fee of \$1.00 is charged on all subsequent ones. Remittances for transcripts should be made payable to The Citadel. The payment should accompany the application for the transcript and should be mailed directly to the Registrar.

Laboratory Fee.—A laboratory fee of \$10.00 a semester is charged students taking courses involving laboratory work in biology, chemistry, civil engineering, electrical engineering, geology, modern languages, and physics. These laboratory fees are used to cover the added expense of supplies and costly equipment used in the teaching of these courses. This fee is not collected but is included in the estimated deposit for books and supplies, and is chargeable against the deposit.

A laboratory fee of \$5.00 a semester is charged to students of the junior and senior classes majoring in physical education. A fee of \$2.00 a semester is charged to students in Business Statistics and Senior Accounting.

A laboratory fee of \$5.00 is charged to students taking the 1620 computer course.

Refunds

Since the college fees are paid to The Citadel in four equal installments during the Academic Year, no refunds for registration, tuition,

and college fees will be made when a cadet withdraws during the period for which his fees have been paid. Refunds will be mailed approximately 30 days after discharge. However, if a cadet should withdraw prior to the date on which an installment is due the amount of any installments paid in advance will be refunded. On the other hand, a cadet who is enrolled on the date on which an installment is due, the entire amount of the installment will be due and will not be refunded.

Auxiliary services fee will be refunded on a pro-rata basis. All unused portions of the book and uniform deposit will be refunded.

The uniform and book deposits are estimated to cover the needs of the cadet for such purchases during the entire academic year. It should not be expected that the school refund this money to the cadet for his personal needs. The unexpended balances of these deposits will be returned upon request in June at the close of the academic year; otherwise, they will be held to the cadet's credit until the next academic year or until he withdraws from The Citadel.

Additional Information

Unsatisfactory Accounts. — When a cadet's account is in an unsatisfactory condition, no honorable discharge will be made, no diploma will be awarded, and no transcript of credits will be provided until a satisfactory settlement of the account has been made.

Pocket Money. — The college does not handle pocket money accounts. All allowances for pocket money should be sent directly to the cadet. No estimate is made of this requirement, for the amount varies among the cadets and can best be determined by the cadet and his parents.

Cadets who receive substantial allowances for their personal needs should deposit this money in The Citadel Depository which is maintained for the accommodation and convenience of the cadets. This depository is located in Mark Clark Hall.

Clothing and Bedding

All cadets are required to furnish their own bedclothes except a bedspread and blanket which will be issued to each cadet. Both the bedspread and the blanket are in Citadel colors and have The Citadel seal imprinted thereon. These items can be used after graduation on single beds.

Beds and mattresses are provided by the college, but pillows are not. Two mattress covers will be issued at cost to each cadet. Cadets *must* come provided with the following articles:

Three pajamas	One pair white tennis shoes
Twelve white tee shirts and twelve short drawers	Ten white towels
	One pillow
Twelve pairs of black socks	Three white pillow cases
Four pairs of white athletic socks	Four white sheets for single bed

Twelve white handkerchiefs
One pair bedroom slippers or
shower shoes

Two pairs, plain toe black
oxford shoes (with rubber
heels)

One Army style blanket for
single bed
Toilet articles

Since the school does not furnish bed linens, it is advisable that each cadet who ships his belongings to The Citadel bring with him two sheets, one pillow case, and one pillow for his use until he is able to get access to his belongings.

New cadets are advised to break in their cadet uniforms shoes at least three weeks prior to reporting to The Citadel.

Before the opening of the First Semester a New Cadet is assigned an identification number, which he retains as long as he remains at The Citadel. This five-digit number will be used by the cadet as an identification number and as his laundry number. All clothing should be marked with his name and full initials, as well as the identification number, as follows: sheets, towels, and handkerchiefs, in the corner; pillow cases, in the corner at open end; collars, on inside near center; shirts, on bands at back of neck; socks, on leg near top; other articles, where most practicable.

Accommodations for Cadets During Holidays

Cadets who cannot go to their homes during the Christmas and Easter holidays may remain on the campus and occupy the visiting teams' dormitory. The barracks and the dining hall will be closed during vacations.

Employment

The time of a cadet at The Citadel is so taken up with his duties that there is no opportunity for outside employment for the purpose of financial assistance. However, there are a limited number of part-time jobs available from time to time with various campus activities. These jobs are not of a substantial nature which can be relied upon to pay a cadet's college fees. To be eligible for such work a cadet must be an upper classman and must be proficient in both his academic work and conduct.

Hospital

The hospital facilities at The Citadel are excellent, and all ordinary cases of sickness are treated by the surgeon and the nurses of the college without expense to the parent. Surgical cases requiring the removal of a cadet to an infirmary in the city, services of a special nurse in the college hospital, and special treatment of eyes, ears, teeth, etc., must be at the expense of the parents or guardian.

R.O.T.C. Allowances

Students formally enrolled (see pages 99 or 151 for particulars) in Military or Air Science I and II are paid by the Government \$21.00

per semester as a uniform allowance. Fourth Classmen (freshmen) and Third Classmen (sophomores) must be enrolled at least through the sixth week to receive this allowance. Students formally enrolled in the Advanced Course are paid \$50.00 per semester as a uniform allowance. The above uniform allowances are not paid directly to the students but are credited to the students' Quartermaster accounts.

In addition to the uniform allowance a retainer pay of approximately \$40.00 per month is paid directly to those students formally enrolled in the Advanced Course.

Students formally enrolled in either the Army or Air ROTC Programs must attend a summer camp between their junior and senior years. At this camp students receive the pay rate of \$120.60 per month while attending, plus travel pay to and from camp computed at a rate of six cents per mile. During the camp period the retainer pay is not paid.

Summary of Estimated R.O.T.C. Allowances

Fourth Class year (Freshmen) (formally enrolled):

Commutation of Uniforms Allowance	\$ 42.00
-----------------------------------	----------

Total	\$ 42.00
-------	----------

Third Class Year (Sophomores) (formally enrolled):

Commutation of Uniforms Allowance	\$ 42.00
-----------------------------------	----------

Total	\$ 42.00
-------	----------

Second Class Year (Juniors) (formally enrolled):

Commutation of Uniform Allowance	\$100.00
----------------------------------	----------

* Retainer Pay (estimate)	\$400.00
---------------------------	----------

Total	\$500.00
-------	----------

First Class Year (Seniors) (formally enrolled):

Commutation of Uniform Allowance	\$100.00
----------------------------------	----------

Retainer Pay (estimate)	\$400.00
-------------------------	----------

Total	\$500.00
-------	----------

— Summer Camp:

Air Force Cadets (four weeks) (taxable)	\$120.60
---	----------

Army Cadets (six weeks) (taxable)	\$180.90
-----------------------------------	----------

Travel - six cents a mile to and from camp (formally enrolled)	_____
---	-------

* Retainer Pay: Paid at \$40.00 per month not to exceed 20 months.
(Paid only while under contract)

— Summer Camp: \$120.60 per month.

Summer Session

A summer session is conducted for students who wish to accelerate their work or to make up conditions or failures.

The summer session must be self-supporting, and the same fees must

be charged to both South Carolina and out-of-state students. Fees for the summer session are as follows:

	<i>First Term</i>	<i>Second Term</i>
Tuition - \$15 per semester credit hour
Summer Term Fee	\$ 15.00	\$ 15.00
Room, Board and Laundry	150.00	125.00
Hospital*	7.00	7.00
Laboratory - for laboratory courses in biology, chemistry and physics	10.00	10.00

* Charged only to students living in barracks.

During the summer session all purchases of books and supplies will be on a cash basis. There will be no charging to the student's account since no book or supply deposits will be collected.

It is pointed out that bills for the summer session will not be sent to the parents by the Comptroller. It is impossible for the Comptroller to compute these bills since the tuition fee is based on the number of credit hours of work which is scheduled by the student. The student should come supplied with sufficient cash to take care of his fees for the summer session.

EVENING PROGRAM

The Citadel has established an evening program of college courses. This program is designed to meet the needs of individuals who are interested in continuing their college education, who need more formal education, or who desire education for the purpose of broadening their cultural, business, professional, or avocational interests.

The program maintains the same academic standards that prevail in the regular program. All courses carry full college credits. The content of all courses is the same as that presented during the regular college session. Courses are under the jurisdiction of the regular academic department heads.

High school graduates and present or former students in good standing with an accredited institution of higher learning are eligible for admission to the evening program.

A tuition fee of \$20 per semester hour is charged for all credit courses. The fee for auditing a course is \$10 a semester hour. A laboratory fee of \$10 per semester is charged for all science courses which have laboratory periods and for languages courses using the language laboratory.

Courses will be offered during two semesters. The fall semester is from September to December and the spring semester, January to May.

Scholarships

Beginning with the fall term of 1967, several Citadel Scholarships will be available. Each year some of these are given to cadets entering The Citadel for the first time, and others are awarded to cadets presently in the college, based on accomplishments in the Corps both academically and militarily. The scholarships listed below fall under four categories:

- Category I — Authorized by the Scholarship Board of Trustees of the Board of Visitors and selected by The Citadel Scholarship Committee.
- Category II — Authorized by the Scholarship Board of Trustees of Association of Citadel Men and selected by The Citadel Scholarship Committee.
- Category III — Authorized by the President of the College and selected by The Citadel Scholarship Committee.
- Category IV — Given by individuals or companies directly to recipients without any selection by The Citadel Scholarship Committee.

The Citadel exercises the responsibility for scholarships given under the first three categories. Listed below are some of the current scholarships:

Category I

The Joseph D. Aiken Scholarships cover all expenses for the first three years and are supported by a trust fund made possible by a bequest of the late Joseph D. Aiken. It is anticipated that several scholarships will be available each year, but they are limited to applicants from the New England states with some preference being given to Rhode Island and Connecticut residents.

Baruch Scholarships, with a value of \$400 each for one year, were inaugurated from the income of a fund donated to The Citadel by Mr. Bernard Baruch.

The Alton H. Bryant Memorial Scholarships are worth \$800 a year for four years. They are in memory of Alton H. Bryant, a graduate of the Class of 1940, who lost his life in the service of his country. Applicants are limited to residents of Orangeburg County, South Carolina.

The Richard P. Cardwell Scholarship was established by General and Mrs. Eugene F. Cardwell in memory of their son, Cadet Richard P. Cardwell, a member of the Class of 1957. It is given in alternate years to a member of the sophomore class and has a value of \$400 a year for one year.

The Frank W. Cayce Memorial Scholarships are four-year scholarships and pay all college expenses. These scholarships were made possible by his grandmother, the late Mrs. Zulale J. Dowling, who

bequeathed to The Citadel her entire estate for the purpose of establishing an educational scholarship fund in memory of her grandson, Cadet Frank W. Cayce.

The Crouch-Lee Scholarship has a present value of \$400 for four years. The James R. Crouch award was founded in 1925 by the late James R. Crouch of Greenville, South Carolina. *The William States Lee Scholarship* was founded the same year by the late William States Lee of Charlotte, North Carolina. The deed provided that the beneficiary shall be limited to residents of South Carolina.

The Daniel Scholarships are derived from the income of a fund donated to The Citadel by R. Hugh Daniel and his brother, the late Charles E. Daniel.

The Toney B. Jackson Scholarship, established by Toney B. Jackson of the Class of 1915, is given in alternate years to a member of the sophomore class and has a value of \$400 a year for one year.

The Edgar A. Terrell Scholarship is worth \$800 a year for four years. It was made possible by a donation from Edgar A. Terrell, Class of 1915, and is limited to candidates from Mecklenburg County, North Carolina, or, in case there is no qualified candidate, to the geographical boundary of the state of North Carolina.

The James Ripley Westmoreland Scholarship has a value of \$400 a year for four years. This scholarship is to assist worthy South Carolina young men who are in need of financial assistance to obtain a college education. This scholarship is in memory of Colonel James Ripley Westmoreland, a graduate of the Class of 1900, who served as Chairman and a member of the Board of Visitors for many years.

Category II

Association of Citadel Men Scholarships.—The Association of Citadel Men maintains several scholarships in the amount of \$100 to \$200 each. The scholarships are awarded for one year only to both entering cadets and upperclassmen.

The Oliver J. Bond Scholarship is supported by the income from a trust fund established by alumni as a memorial to the late Colonel Oliver J. Bond, President of The Citadel, 1908-1931. The present value is \$300 a year for four years.

The Mark Clark Scholarships are \$800 and \$1,000 a year awards, derived from an income made possible by General Mark W. Clark, President Emeritus of The Citadel.

The Star of the West Scholarships were awarded for the first time in 1952. They cover all college expenses and are supported by the income from an anonymous trust fund. These scholarships are available only to students of outstanding ability and attainment without reference to financial need or geographical limitations.

The Summerall Scholarships are supported by the income from a trust fund established by alumni as a memorial to the late General

Charles Pelot Summerall, president of The Citadel, 1931-53. At present, there are two scholarships, each worth \$500 a year for four years.

Category III

The W. W. Benson Scholarship pays all expenses; it is named in honor of the late Major W. W. Benson, Class of 1907, and is supported by his friends from Greenwood County, South Carolina.

Cadet Insurance Aid Plan consists of several scholarships maintained by the Cadet Insurance Aid Plan from revenue derived from the dividends of life insurance policies voluntarily purchased by members of graduating classes since 1953.

The Renie Clark Scholarship is \$1,000 a year and is awarded each year to a member of the senior class who best exemplified the traits Mrs. Clark demonstrated in assisting students to adjust to cadet life. This scholarship is a memorial to Mrs. Mark W. Clark, who was the first lady of The Citadel for more than eleven years.

The First Field Artillery Brigade, A.E.F., and the *Fifth Field Artillery Scholarships* cover all expenses at The Citadel for four years. They were established in 1934 by Colonel Robert R. McCormick of Chicago and are limited to candidates from the State of Illinois.

The P. P. Leventis Scholarships cover all college expenses for four years and are supported by the income from a trust fund as a memorial to the late P. P. Leventis, Sr. of Charleston. This scholarship is available to students of outstanding leadership ability, without reference to financial need or geographical limitations.

The Freddie Levine Scholarship was established from funds contributed by friends of Lieutenant Freddie Levine, who died in the service of his country. It pays \$500 a year for four years.

The Broadus R. Littlejohn Scholarship was established in 1963 by Broadus R. Littlejohn, Jr., Class of 1949, in honor of his father. It pays \$500 a year for four years.

The Orphanage Fund Committee Scholarships, awarded for the first time in 1959, cover all college expenses for four years. The recipients are limited to high school seniors who are orphans. The Orphanage Fund Committee was started by the Corps of Cadets in 1952 for the purpose of fulfilling certain needs of the children living in the orphanages of Charleston. Excess donations within the Corps of Cadets have resulted in some of the money being set aside for these scholarships.

President's Honorary Scholarships. Each year General Hugh P. Harris gives several scholarships to outstanding high school graduates and outstanding members of the current junior, sophomore, and freshman classes of The Citadel. Each scholarship has a value of \$200 a year for one year.

The Sears Roebuck Scholarships, worth \$1,000 a year for four years, were established by Sears, Roebuck and Company in 1955.

The South Carolina Electric and Gas Scholarship is \$500 a year for one year awarded to an outstanding member of the Corps of Cadets from South Carolina.

The West End Dairy Scholarship was established in 1964 by Greswold Gwynette, Class of 1936, and pays \$200 a year.

The Western Electric Scholarship is awarded each year to an outstanding senior majoring in engineering. The value is from \$500 to \$700.

The General Robert E. Wood Scholarships, valued at \$500 a year for one year, were established by General Robert E. Wood, retired chairman, Board of Directors, Sears, Roebuck and Company.

The Judge C. C. Wyche Scholarships are made possible by a gift from the late Judge C. C. Wyche of the Class of 1906.

Category IV

There are numerous scholarships of this type. Applicants must apply directly to the individual or organization donor. Listed below are a few that have been continuous for many years.

The Charleston Air Force Base Officers' Wives Club Scholarship is a yearly award of \$750 to an outstanding member of the Corps of Cadets.

The Charleston City Scholarships are worth \$500 a year for four years. Appointments are made by the Committee on Ways and Means of the City Council on the basis of a competitive examination. Applicants must be residents of the City of Charleston.

The Cogswell Scholarships of the Washington Light Infantry pay \$500 a year for four years and are limited to candidates who are members of the Washington Light Infantry or, in the event no member is qualified, a son of a member of the Washington Light Infantry in good standing.

The Andy Griffith Scholarship for \$1,000 a year to a resident of Orangeburg County, South Carolina, is made possible by Mr. Andrew D. Griffith, a loyal friend of The Citadel.

The North Charleston Citizens' Scholarship Committee each year gives numerous awards to worthy young men attending The Citadel from that area.

Post-Courier Scholarships are awards given by the Charleston newspapers. They are limited to residents of South Carolina.

Sottile Foundation Scholarships. The Albert Sottile Foundation of Charleston, S. C., in accordance with its policy of furthering educational opportunities, offers several scholarships worth from \$100 to \$500 a year. Some scholarships are limited to young men in the employ of companies contributing to the Foundation, or to sons of the employees of said companies. Others are limited to Charleston County and ap-

pointments are made by the Foundation on the basis of competitive examinations.

General

Each year the Departments of the Army and Air Force award scholarships to the most outstanding members of the rising junior class. These scholarships provide for tuition, books, laboratory fees, and \$50 per month for the period of the scholarship.

Applicants for scholarships need not specify any particular scholarship. All applicants will be evaluated and the best applicants selected for the scholarships available. Selections are made on the basis of comparative evaluations of high school records, with all attributes desirable in a well-rounded cadet being considered. Entrance examination scores will be given some weight in the evaluation of an application.

The Star of the West and *Leventis Scholarships* were established primarily for the purpose of attracting to The Citadel outstanding young men and are not restricted by either financial need or geographical limitations.

Scholarship application forms may be obtained from the Registrar, and completed applications should be submitted to the Chairman of the Committee on Scholarships prior to March 15. Application for admission to The Citadel must be on file with the Registrar at the time the scholarship application is filed. The Scholarship Committee screens the applications and make awards by the middle of April. In certain cases, applicants may be asked to appear for a personal interview.

National Defense Student Loans

The Citadel participates in the student loan program established by the National Defense Education Act of 1958.

Both currently enrolled cadets and new cadets who have been accepted for admission may apply for these loans. To be eligible for favorable consideration, applicants must establish financial need and give evidence of likely academic success. In accordance with the law, preference is given those applicants majoring in engineering, sciences, modern languages, or education.

To assist them in determining financial need, The Citadel National Defense Student Loan Committee requires the parents of all applicants to complete the Parents' Confidential Statement published and analyzed by the College Scholarship Service, Princeton, New Jersey. The Citadel is one of the colleges holding membership in the College Scholarship Service. The committee also gives favorable consideration only to those new cadets whose academic promise is above average as shown by their entrance examination and high-school record.

For more detailed information and for loan application forms, one should write to the Registrar, The Citadel.

Educational Opportunity Grants Program

The Citadel during the 1966-67 academic year will participate in the Educational Opportunity Grants Program as established under Title IV, Part A of The Higher Education Act of 1965, Public Law 89-319. This program provides assistance to eligible qualified high school graduates of exceptional financial need, who for lack of financial means of their own or their families would be unable to enter or remain in college.

Grants will be awarded to a student who:

(1) is a national of the United States, or is in the United States for other than a temporary purpose and intends to become a permanent resident thereof;

(2) has been accepted for enrollment as a full-time undergraduate student, or is in good standing and in full-time attendance as an undergraduate student;

(3) shows evidence of academic or creative promise and capability of maintaining good standing in his course of study;

(4) is of exceptional financial need, as determined by the institution in accordance with criteria and schedules prescribed by the Commissioner, which take into account such factors as the income and assets of, and number of dependent children in, the student's family; and

(5) would not, but for an educational opportunity grant, be financially able to pursue a course of study at such institution of higher education.

Information concerning the grant program may be had by writing the Registrar.

Academic Honors and Awards

The Scholarship Medal is presented annually by the Board of Visitors to the cadet graduating at the head of his class.

General High Honors are awarded to those cadets in the graduating class whose average academic standing for the four years carries a grade point ratio of 3.60 or higher.

General Honors are awarded to those cadets whose average academic standing for the four years carries a grade point ratio between 3.50 and 3.59, inclusive.

Departmental Honors are awarded on recommendation of heads of departments to those cadets of the graduating class who have established a grade point ratio of 3.50 or better in at least 36 semester hours' work in a department, including all departmental work in the junior and senior years.

The Dean's List is a recognition given to those students registered for eleven or more semester hours whose grade point ratio is 3.00 or higher, with no grade below C, for the work of a semester. Medals are awarded and worn on the uniform the following semester.

Gold Stars are awarded to those students on the Dean's List who

have made a grade point ratio of 3.60 or higher for the work of a semester. Stars are worn on the collar of the uniform during the following semester.

The Citadel Honorary Society. Membership in The Citadel Honorary Society is limited to members of the first class whose standing is in the upper eight per cent of their class.

The Francis Marion Cup is awarded by the Rebecca Motte Chapter, D.A.R., to a cadet of the June graduating class for outstanding achievement in American History.

The Granville T. Prior Award consists of key and scroll presented annually by The Citadel History Club to the student whose first-class essay is selected by a joint faculty committee as the best in the departments of English, History, Modern Languages, and Political Science. It is named in honor of the late head of The Citadel History Department.

William E. Mikell Award, a cash award donated by the late William E. Mikell, is awarded to that member of the graduating class having the highest average in English over a three-year period.

The Wall Street Journal Student Achievement Award is donated by the *Wall Street Journal* and awarded to the student having the greatest achievement in Business Administration during the school year.

The Charles P. Summerall Cup is donated by the European Citadel Association and awarded annually for one year to the company of cadets which makes the greatest improvement in scholastic work during the college year.

The Post-Courier Awards are given by the Post-Courier to the three best writers on *The Brigadier Staff*.

The Peter Gaillard Memorial Award is given annually by Colonel and Mrs. St. Pierre Gaillard in memory of Peter Gaillard of the Class of 1948 to a graduating first classman majoring in electrical engineering on a basis of scholastic attainment, leadership, and participation in extracurricular activities.

The Charles T. Razor Memorial Award is given annually in memory of Colonel Charles T. Razor to a graduating cadet selected by the Head of the Department of Electrical Engineering on the basis of scholastic achievement and ability and willingness to help others.

The Colonel Louis Sheppard LeTellier Award is given annually to a member of the graduating class attaining the highest academic average in Civil Engineering.

The George Walker White, Class of 1904, Award is given annually by Mrs. James Boyd Strawn and Mrs. Robert Neal Garrison in memory of their father. This monetary award goes to a member of the graduating class for outstanding achievement in Civil Engineering.

The Colonel Christopher Schultz Gadsden Memorial Award, in mem-

ory of Colonel Gadsden, Class of 1852, is given annually to the "Best all around Civil Engineering graduate" as selected by the Civil Engineering faculty.

The Reuben Burton Pitts III, Memorial Award is given annually in memory of Cadet Reuben Burton Pitts III, Class of 1963, to the graduating first classman who is selected as the friendliest in his class, and the one who has brought the most happiness to other cadets.

The Carlisle Norwood Hastie Award is given annually to the graduating first classman who has been selected by his classmates as having shown the most tact, consideration, and courtesy to his fellow students.

Henry J. Taylor Cup is presented annually to the graduating first classman who has demonstrated the greatest journalistic improvement.

The Colonel James K. Coleman Award, in honor of Colonel Coleman who established the Department of Political Science, is given annually by Pi Sigma Alpha, the National Political Science Honor Society, to the first classman in Political Science with the highest scholastic record for the four years.

Military Honors and Awards

R.O.T.C. Distinguished Military Student Program — Students whose proficiency in military training and whose qualities of leadership and attention to duty have merited the approbation of the Professor of Military Science are designated Distinguished Military Students.

Distinguished Military Students are eligible to apply for appointment as Second Lieutenants in the Regular Army when they have registered for their last academic year.

Distinguished Air Force Reserve Officer Training Corps (AFROTC) Cadets and Graduates. The Professor of Aerospace Studies (PAS) may designate as Distinguished AFROTC Cadets at the start of the second year of the Professional Officer Course (POC) of AFROTC. Those cadets who have distinguished themselves by displaying outstanding qualities of leadership, adaptability to military training, and academic ability. Those cadets who are designated Distinguished Cadets and who desire to be considered for Regular appointment, and whom the PAS feels will be designated Distinguished Graduates, may be nominated for Regular appointment. Distinguished Graduate status is a necessary prerequisite for Regular appointment. A board will convene twice each year at Headquarters AFROTC to consider and rank in order the candidates nominated by PAS for Regular appointments. The Air Force ROTC board will review each cadet folder and a listing of all the cadets submitted will be forwarded in "Order of Merit" to the USAF Military Personal Center where they will be administratively screened and forwarded to the Personnel Council for final consideration. Distinguished Graduates not initially selected for Regular appoint-

ment will retain the Distinguished Graduate identification for subsequent consideration under the established line program at the two-year experience level.

The American Legion School Award is donated annually by the Department of South Carolina American Legion to the graduating first classman displaying conspicuous leadership, citizenship, and true Americanism.

The Commandant's Cup, donated by the late Colonel W. C. Miller, is awarded annually for one year to the best-drilled cadet company.

The 103rd Field Artillery Award was established by the veteran organization of that regiment as a trophy to be won each year by the company of cadets which has attained the best record in discipline.

The J. D. Sehorne Trophy is awarded annually to the platoon winning the platoon drill competition.

The Association of U.S. Army Medal is donated by the Association of the United States Army and awarded annually to the outstanding Army second class ROTC cadet.

The South Carolina Reserve Officers Association Awards are donated annually by the South Carolina Reserve Officers Association and awarded to both the outstanding Army ROTC first class cadet and Air Force ROTC second class cadets for demonstrated leadership ability, moral character, academic excellence, and other activities.

Armed Forces Communications and Electronic Association Awards are donated and awarded annually to both the outstanding Air Force and Army ROTC first-class cadet majoring in electrical engineering.

The South Carolina Sons of American Revolution Awards are donated and awarded annually to the outstanding Army and Air Force third-class cadets selected on the basis of leadership ability, soldierly bearing, and excellence in theoretical studies.

A Certificate of Meritorious Leadership Achievement is awarded annually by the Commanding General, Third United States Army, to a graduating cadet selected on the basis of leadership development throughout his ROTC career.

The Major William M. Hutson Award is presented annually by Colonel and Mrs. J. C. Hutson in memory of their son, Major William M. Hutson, USAF, Class of 1939, to a rising senior selected for outstanding leadership ability, academic standing, and devotion to duty.

The Superior Cadet Decoration Awards are awarded annually by the Department of the Army to the outstanding Army ROTC cadet in each academic class.

The Chicago Tribune Award is presented annually to the outstanding member of each AFROTC class, fourth-class through first class.

The National Defense Transportation Association Award is presented annually to a first-class AFROTC cadet, majoring in business ad-

ministration, who qualifies for the Air Force specialty of air or surface transportation officer.

The Convair Cadet Award donated by the General Dynamics Corporation, Convair Division, to The Air Science 2 cadet showing outstanding ability in the AFROTC program.

The 444th Fighter Interceptor Squadron Award is awarded to the AFROTC cadet who has displayed the greatest interest in aviation and has shown outstanding qualities of leadership and military aptitude.

The Armor Association Award is given annually to the outstanding graduate commissioned in Armor.

The American Ordnance Association Key is given annually to the outstanding Army first classman commissioned in the Ordnance Corps.

The Air Force Association Award is presented each year to the outstanding first class AFROTC cadet based on the recommendation of the PAS.

The Washington Light Infantry Marksmanship Trophy and Medals consists of a trophy awarded annually for one year to the organization whose team makes the highest score in small-bore rifle marksmanship; silver medals are awarded to the members of the winning team and a gold medal to the cadet making the highest individual score. All are presented by the Washington Light Infantry.

The Wade Hampton Saber is awarded annually by the South Carolina Division, U. D. C., to the member of the first class who is most outstanding in leadership and who makes the greatest contribution to The Citadel while a cadet.

The Star of the West Medal, originally presented to The Citadel by Dr. B. H. Teague, is awarded annually for one year to the best drilled cadet.

The W. C. White Medal is presented annually by Mrs. W. C. White to the captain of the best drilled company.

Daughters of the American Colonists Award is given annually to the first classman with the best disciplinary record during his four years at The Citadel.

Air Force Times Award of Merit is awarded annually to a graduating Air Force ROTC cadet who has distinguished himself by contributing materially to constructive public attention for his cadet Corps.

The Order of Cincinnati Award is awarded annually to a cadet officer who has exemplified in the highest degree the qualities of soldier and citizen.

The Association of Military Colleges and Schools of the United States, The President's Medal is awarded annually to that member of the Corps of Cadets who exemplifies the finest tradition of The Citadel and best represents the end result of its mission.

AUSA Military History Award is presented annually to the out-

standing Army third class cadet who attains the highest mark in American Military History.

Commencement Honors

The Algernon Sydney Sullivan Awards are bronze medallions presented by the college, through the benefaction of the New York Southern Society, to students or others in recognition of high thought and noble endeavor; established by the Society in 1925, the awards have been made to The Citadel since 1933.

The John O. Willson Ring. — The bequest of Dr. John O. Willson, a ring is given annually to the member of the first class voted by his classmates as the manliest, purest, and most courteous member of his class.

DEPARTMENTS OF INSTRUCTION

The Objectives of The Citadel

The objectives of The Citadel, The Military College of South Carolina, are to offer such courses in the liberal arts and sciences as will develop the minds and characters of the students, increase their likelihood of success in any useful pursuit, and fit them to discharge the duties of citizenship; to provide concentration in certain professional and technical fields which will enable its graduates to compete successfully in business or the professional practice of their specialties; to see that its graduates are adequately equipped in their respective fields of concentration to enter in full standing postgraduate, professional, or technical schools; and to qualify them for commissions in the Armed Forces through participation in a system of military training second only in rigor and thoroughness to that available at the national service academies.

Entrusted with young men at a critical stage of their development, the college seeks also to provide wholesome activities, services, and facilities which will contribute to the development in its students of character, physical fitness, and moral and religious principles, thereby preparing them to meet the requirements of citizens and especially of leaders.

Courses

The course of study is essentially the same for most freshmen except those in engineering where drawing is taken in place of a modern language and those in the physics, mathematics, and electrical engineering majors where the study of physics begins in the second semester. Certain subjects are required in the sophomore year of all students, the remaining subjects being determined by the course which the student chooses to follow during his junior and senior years. Major work is offered in the following departments: Biology, Business Administration, Chemistry, Civil Engineering, Education, Electrical Engineering, English, History, Mathematics, Modern Languages, Physical Education, Physics, and Political Science. A thorough premedical program is also available in the A. B. Chemistry and the Biology Majors.

A statement of the courses required each year in each department and a detailed description of the various courses will be found on pages 84 through 97.

Grades

Any Citadel student permitted to take courses at another college must earn a grade of C or better for transfer credit. All transfer credits are provisional. If a department involved finds within four weeks after classes begin that the student is not prepared to take a course for which the course transferred is a prerequisite, the allowance or credit

is withdrawn, and the student must take the prerequisite course at The Citadel.

Grade reports are mailed to parents or guardians at the end of each semester. Mid-semester reports are sent to parents showing the status of the cadet's academic work at that time.

Changes in schedule must be effected during the first seven days of the term. A subject dropped after the first three weeks will receive a grade of WP (Withdrew passing) or WF (Withdrew failing).

Promotions

Conditions for promotion to a higher class are given in the following table:

To Class	Number of Semester Hours Behind in Major Program	Accumulated Quality Points
Third	Not more than eight (8)	40, at least
Second	Not more than eight (8)	115, at least
First	Must be able to graduate in two semesters	190, at least

In addition, for promotion to the second class, the student must have completed all the courses required in his academic major for the fourth class, and for promotion to the first class, he must have completed all the courses required in his academic major for the third class. Exception to the course requirement will be made for the foreign language for those students who transfer at the end of the third-class year from one major to another involving a different foreign language.

For purposes of ascertaining quality points and/or grade point ratio (GPR) to determine class standing or promotion, grades are weighted as follows: A, 4 points; B, 3 points; C, 2 points; D, 1 point; F, zero points. The total of the weighted grades divided by the total credit hours attempted by the student is the grade point ratio.

Academic Probation and Discharge

1. Any full-time student who fails to achieve the following minimum requirements for continuance in college will be discharged for academic deficiencies:

Period After September Admission	Requirements for Continuance on September 1 Accumulated Semester Hours	Accumulated Quality Points
12 months	18	27
24 months	45	70
36 months	72	125
48 months	Approval by College Committee on Academic Probation	

2. A student who has twice failed the same course in two regular semesters must pass that course the following summer to be eligible to return to The Citadel the following September. If the course is not offered during the summer, the student must pass the course the next time it is offered.

3. Probation. If, in any semester after the first 12 months, a student fails to pass twelve semester hours, he will be on probation. Probation

may be removed by meeting the minimum requirements for continuance in college.

Readmission Policy

A student wishing to return to The Citadel, having withdrawn, must file an application for readmission with the Registrar. Action on this application is determined by the Committee on Admissions, who will consider not only the applicant's past academic record, but also his suitability as a member of the Corps of Cadets. The recommendation of the Committee on Admissions is to have the approval of the President.

Cadets who withdraw due to academic deficiencies will be ineligible for readmission consideration until the lapse of one semester of the regular school year. (The summer session is not considered a semester in this case.) If a cadet who has been discharged for academic deficiencies is accepted for readmission, he will be on probation the following semester.

Any departure from this policy may be made only in cases with extreme extenuating circumstances.

Requirements for Graduation

For graduation a student must complete satisfactorily one of the departmental major courses of study stated in this catalogue. He must also accumulate quality points amounting to twice the number of semester hours required in his course of study. In addition, during his last two years he must accumulate quality points amounting to twice the number of credit hours in those courses required by his department of specialization.

It is also a requisite for graduation that every senior prepare a senior essay on a subject chosen from his field of concentration. This essay is designed as an exercise in the preparation of a formal research paper, measuring up to commonly accepted professional standards, and is wholly apart from the requirements of a particular course in the curriculum. The writing of the senior essay shall be done in residence.

For the sake of uniformity it is recommended that the subject of the senior essay be selected in all departments not later than eight weeks after the opening of college and that the preliminary draft be submitted not more than twenty weeks after the opening of college. The final date for approval of the senior essay shall be two weeks before Commencement.

In addition to the formal credits required for graduation, the candidate must have demonstrated that he is of high character and worthy to receive the diploma of the college. Recommendations for graduation are made by the Academic Board to the Board of Visitors, who in turn award the degrees.

Degrees

The degree of Bachelor of Arts is conferred upon satisfactory completion of the Chemistry, English, History, Modern Language, or Political Science programs of study. The degree of Bachelor of Science is conferred upon satisfactory completion of either the Biology, Chemistry, Education, Mathematics, Physical Education, Physics, or the Premedical programs.

The degree of Bachelor of Science in Business Administration is awarded to students who complete satisfactorily the course in Business Administration.

Graduates in Civil Engineering receive the degree of Bachelor of Science in Civil Engineering. Graduates in Electrical Engineering receive the degree of Bachelor of Science in Electrical Engineering.

Classification of Cadets

The cadets are arranged in four distinct classes, corresponding with the four years of study. Cadets pursuing the first year's course constitute the Fourth or Freshman Class; those taking the second year's course, the Third or Sophomore Class; those in the third year's course, the Second or Junior Class; and those in the fourth year's course, the First or Senior Class.

Courses of Study

In the following pages will be found a detailed schedule of the curriculum required for each degree according to the major subject elected. The clock hours and the credit value of each course are noted. The individual courses are described under the appropriate departmental heading in the pages following the schedules.

The biology and geology courses are offered in the Department of Chemistry; the drawing, in the Department of Civil Engineering; the psychology, philosophy, and sociology, in the Department of Education.

The courses of the fourth class are numbered from 101 upward, of the third class from 201 upward, of the second class from 301 upward, and of the first class from 400 upward.

DEPARTMENT OF AEROSPACE STUDIES

Professor of Aerospace Studies: Whitmire

Assistant Professors of Aerospace Studies: Anderson, Tuten, Ward, Strong, Adrian, Gilmore, Sotire, Williams, Forrester, Martin

The mission of The Citadel's Air Force ROTC Detachment is to provide instruction, experience, and motivation to each cadet choosing the Air Force Program; and to insure that he possesses the knowledge, character, and qualities of leadership essential to his progressive development as a career officer and good citizen.

Modern weapons systems and technology in combination with a constantly changing world situation have removed the emphasis on "Reserve" from Air Force ROTC. The "Force-in-being" concept demands that the emphasis be on the dedicated career professional officer who accepts responsibility readily, thinks critically and creatively, writes and speaks effectively. The Air Force ROTC program at The Citadel has become a major source for this kind of officer. Each year approximately one hundred cadets receive their Air Force commissions at The Citadel. During Fiscal Year 1966 The Citadel commissioned more second lieutenants than any other AFROTC unit in the United States.

The Citadel Air Force ROTC cadet course of instruction in Aerospace Studies features a wide variety of instruction and training opportunities. During the freshman and sophomore years the curriculum is designed to provide students with an understanding of aerospace power's relation to national defense as well as aerospace power's past, present, and future role in world affairs. The course covers the nature of war and traces the development of aerospace power.

During the junior and senior years the Air Force ROTC Program draws on many academic disciplines, and deals with professionalism in leadership and management. It includes the meaning of professionalism, professional responsibility, the military justice system, leadership—its functions and practice, management principles and functions, and problem-solving.

Citadel graduates have served the Air Force and the Nation well in both War and Peace. Today's Citadel cadets can be expected to assume important command and managerial positions in the Air Force's Aerospace Forces of the future.

Formal Enrollment Requirements

General Military Course

1. Being a citizen of the United States.
2. Being physically qualified. The most frequent disqualifying item is failure to meet vision standards. Some minimum acceptance vision standards are: Pilot, 20/20 uncorrected in both eyes; Navigator, 20/50 correctable to 20/20 in both eyes; Non-rated, 20/400 correctable to 20/30 in one eye and 20/40 in the other.
3. Maintaining satisfactory academic standards.
4. Having good moral character. (Convictions by civil or military court for offenses other than minor traffic violations are disqualifying; excessive minor traffic violations may also cause disqualification.)
5. Signing a certificate of loyalty to the United States Government.

Professional Officer Course

1. Completion of the Basic Course.
2. Passing the physical requirements.
3. Passing Air Force Officer Qualification Test (AFOQT).
4. Contracting to serve on active duty for five years if qualified for pilot or navigator. Other categories are for four years.
5. Enlisting in the Enlisted Reserve of the Air Force for a specified period of time. A cadet who is selected for the Professional Officer Course under this program who willfully evades the terms of his Advanced Course contract, or who completes the course but declines to accept a commission when offered, may be ordered to active duty by the Secretary of the Air Force to serve in his enlisted grade for a period not to exceed two or four years depending on whether or not the cadet is enrolled under the financial

assistance program. Under the latter program enlisted service may extend to four years.

6. Maintaining satisfactory academic standards and graduating with class.

Since four years of ROTC are required by The Citadel for graduation, any cadet not eligible for formal enrollment in the Professional Officers Course in accordance with the criteria given above, may take the POC course for academic credit only. A cadet in this category is not entitled to a subsistence allowance nor will he be offered a commission upon graduation.

Course of Instruction

Aerospace Studies 100. *World Military Systems* Two Credit Hours
(Freshman Year)

An introductory course exploring the causes of the present world conflict, the role and relationship of military power to that conflict, and the responsibility of an Air Force officer.

The course begins with a discussion of the factors from which differing political philosophies have evolved. It continues with a tri-dimensional analysis of the three prime political philosophies which have guided segments of society in the twentieth century. This is followed by a discussion of the means that nations develop to pursue their objectives and how they confront each other in the use of these means. The course then treats individual military systems with emphasis upon the U. S. Department of Defense and the U. S. Air Force. An average of not less than two classroom hours per week for the full academic year.

Aerospace Studies 200. *World Military Systems* Two Credit Hours
(Sophomore Year)

Aerospace Studies 200 continues the study of world military forces and the political-military issues surrounding the existence of these forces. This includes a study of the United States Army, and the United States Navy, their doctrines, missions and employment concepts; a study of the military forces of NATO, CENTO, SEATO, and their role in Free World security; and an investigation of the military forces of the USSR, the Soviet Satellite Armies, and the Chinese Communist Army. The Aerospace Studies 200 phase concludes with an analysis of the trends and implications of world military power. An average of not less than two classroom hours per week for the full academic year.

Aerospace Studies 300. *Growth and Development of Aerospace Power* Three Credit Hours
(Junior Year)

A survey course about the nature of war; development of airpower in the United States; mission and organization of the Defense Department; Air Force concepts, doctrine, and employment; astronautics

and space operations; and the future development of aerospace power. Includes the United States space programs, vehicles, systems, and problems in space exploration. Three class hours per week are required.

Aerospace Studies 400. *The Professional Officer* Three Credit Hours
(Senior Year)

A study of professionalism, leadership, and management. Includes the meaning of professionalism, professional responsibilities, the military justice system, leadership theory, functions and practices, management principles and functions, problem solving, and management tools, practices and controls. Three class hours per week are required.

AFROTC ACTIVITIES

Field Training

Normally during the summer between their junior and senior years, Citadel Cadets enrolled in AFROTC are required to attend a four-week Field Training Course at an Air Force Base. To most cadets this is a memorable experience, for here, the cadet gets a closeup look at Air Force life and realistic operations. Each cadet receives practical guidance in aircraft and aircrew indoctrination, small arms familiarization, physical training, survival training, career officer orientation, as well as training in many other areas needed by the Air Force Professional.

Flight Instruction Program

In Air Force ROTC, FIP spells flying. All qualified senior cadets interested in becoming Air Force pilots participate in the Flight Instruction Program. Those who complete this program and pass the Federal Aviation Agency (FAA) examination and the flight check are eligible to receive their private pilots license . . . all at Air Force expense.

Each potential pilot receives up to 36½ flying hours at an FAA approved flying school located near The Citadel. This includes twenty hours of dual flying instruction and 16½ hours of solo time. Aircraft with engine ratings between one hundred and two hundred horsepower are used in the program. The ground school portion, including weather, navigation, and federal air regulations, is taught by Air Force Pilots in the AFROTC classrooms. FIP is a highly motivating experience for cadets, serving as an excellent test of the cadet's aptitude and interest in flying.

Field Trips

The vast scope of the United States Air Force is difficult to portray in the classroom. In partial compensation, the Air Force ROTC detachment at The Citadel takes selected cadets to the Air Force—in the form of field trips to Air Force bases. On these trips the cadets receive briefings on base activities, observe firsthand Air Force operations and as a highlight, are given an orientation ride in a large jet transport. The Cadet returns to school with a more accurate per-

spective of the global nature of the organization in which he will serve. Experience has shown that these visits are of considerable value in developing a cadet's appreciation of the challenging Air Force officer's career that lies ahead.

Air Force ROTC Distinguished Graduate Program

The Air Force ROTC Distinguished Graduate Program provides an opportunity for highly qualified cadets to be selected for appointment in the Regular Air Force.

The Professor of Aerospace Studies may designate as Distinguished Graduates, those seniors who possess outstanding qualities of leadership and have demonstrated these qualities both in their academic classwork and military activities. Distinguished Graduate status is a necessary prerequisite for Regular appointment. Twice each year a review board is convened at Headquarters AFROTC to consider candidates nominated by the PAS for Regular appointments. Distinguished Graduates not initially selected for regular appointment will retain the Distinguished Graduation identification for subsequent consideration after they have entered the Air Force.

ROTC ALLOWANCES

Uniform Allowance

Students formally enrolled in Aerospace Studies I and II are paid by the Government \$21 per semester as a uniform allowance. Fourth Classmen (freshmen) and Third Classmen (sophomores) must be enrolled at least through the sixth week to receive this allowance. Students formally enrolled in the Advanced Course are paid \$50 per semester as a uniform allowance. The above uniform allowances are not paid directly to the students but are credited to the students' Comptroller accounts.

Subsistence Pay

A cadet selected for the Professional Officer Course will be provided subsistence pay at the rate of \$40 per month beginning on the day he starts advanced training and ending upon the completion of his instruction, but in no event shall any cadet receive such pay for more than twenty months.

Financial Assistance Program - Scholarships

To attract top-quality students, Air Force ROTC is authorized to grant up to 5,500 scholarships, which give selected cadets full tuition, laboratory fees, incidental fees, and allowance for books. Additionally, they are paid a subsistence of \$50 per month. Selections are made on the basis of the cadet's college grades and officer aptitudes as reflected by the Air Force Officers Qualifying Test, demonstrated performance, and an interview by an Air Force officer. At the present time The Citadel has twenty-six AFROTC Cadets receiving Financial Assistance Grants.

DEPARTMENT OF BUSINESS ADMINISTRATION

Professors: Adden, Tibbetts, Mettler

Associate Professors: Young, Infinger, Kuhlman, Bunch.

Assistant Professors: Lucas, Wilson, Masters, Stockton, Whitney, Marjenhoff, Thornton, Watts, Buckley, Wittschen, Rebber

Modern business has become so large in the size of industrial units and so complex in organization that a mastery of its theory and practice can no longer be acquired through apprenticeship. Today no single industry or business can give so adequate a training to its beginners as can be obtained in the department of business administration of a good college. Such college training is now considered the best method of equipping a man for success as a business and economic leader.

The purpose of the Department of Business Administration is to prepare the student to take his place in a business enterprise with such general knowledge of business that he can forego many of the years of experience which would be required of an apprentice, to prepare him to enter in full standing the graduate schools of business administration, to pursue further professional business studies, and to take his place in economic society as does a professional man in other fields of endeavor with sufficient knowledge to make sound decisions on economic problems.

The courses described below are not all pure business courses; rather they are designed to offer instruction in subjects commonly given in schools of arts and science, in schools of social science, and in schools of business administration.

201. *Economic Origins and Principles* Three Credit Hours
Required of all Business Administration Sophomores.

A study of the origins of capitalism and the development of economic institutions; an introduction to economic principles, including an analysis of the determination of national income and its fluctuations, an introduction to money, banking, and government finance.

202. *Economic Principles and Problems* Three Credit Hours
Required of all Business Administration Sophomores.

A study of value and price, including factors affecting short and long-run adjustments of the individual firm with respect to prices, costs, and levels of production; value and price determination; market adjustments in competition and monopoly; distribution of income; and current economic problems. Prerequisite: B. Ad. 201.

203. *Economics of American Industries* Three Credit Hours
Elective for Non-Business Administration Majors.

A study of how wealth comes into existence from raw materials; the location, the quantity, the quality, the values before and after manufacturing; manufacturing processes; relative importance to economic society.

204. *Business Psychology*
Elective for Non-Business Administration Majors.

Applied psychology as an aid to the business executive; statistical measures as an aid to the psychologist; vocational psychology; industrial psychology, including an understanding of employee behavior patterns through the adjustment concept, psychological testing, selection, and performance appraisal.

205. *Business Statistics* Three Credit Hours
Required of all Business Administration Sophomores.

A study of the basic theory and methodology of statistics as applied to economic and business situations, including the sources and collection of data, tabular and graphic presentation, and the interpretation and criticism of statistical data.

Prerequisite: Completion of Required Freshman Mathematics.

303. *Accounting Principles and Practice I* Three Credit Hours
Required of all Business Administration Juniors.

A study of the fundamentals of accounting, including the analysis and recording of business transactions and the preparation of financial statements; practical problems given in the laboratory. Lecture: two hours; laboratory: two hours.

304. *Accounting Principles and Practice II* Three Credit Hours
Required of all Business Administration Juniors.

A continuation of B. Ad. 303 with emphasis on partnerships, corporations, cost accounting theory, modern methods of data processing, and the Statement of Sources and Application of Funds.

Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 303.

305. *Business Law* Three Credit Hours

Required of all Business Administration Juniors.

A study of the law as it relates to business, including contracts, agency, negotiable instruments, sales, bailments, and personal and real property; class discussion of court procedure, cases, and decisions.

Prerequisite: B. Ad. 202.

306. *Business Organization* Three Credit Hours

Required of all Business Administration Juniors.

The legal relations of a business unit; kind of organization best adapted to various sorts of business activity; internal organization for maximum efficiency; the legal nature of mortgages, bonds, stocks; a study of combinations as administrative units.

Prerequisites: B. Ad. 303 and 305.

307. *Principles of Labor* Three Credit Hours

Required of all Business Administration Juniors.

An analysis of the worker's position in modern industry and the effects of industrial production on the worker's social position; introduction to the problems of wages, hours, working conditions, child labor, industrial accidents, unemployment, trade unions, and collective bargaining; economic problems of the worker under current labor legislation.

Prerequisite: B. Ad. 202.

308. *General Insurance* Three Credit Hours

Elective for Business Administration Juniors and others.

A course in predictable business risks and the methods of minimizing these risks through insurance; intelligent planning of a program of coverages, and rates of life, fire, casualty, marine insurance, and fidelity and surety bonds.

309. *Marketing Principles* Three Credit Hours

Required of all Business Administration Juniors.

The activities necessary to effect the distribution of goods from producer to consumer, consumption and consumer behavior, the marketing institutions, the marketing functions, examination of important marketing policy and problem areas.

Prerequisite: B. Ad. 202.

310. *Foreign Trade* Three Credit Hours

Required of all Business Administration Juniors.

The channels of distribution used in exporting and importing, the theory of international trade, foreign trade promotion activities; the commercial organization and policies governing foreign trade practices; trade methods and problems; financial arrangements.

Prerequisite: B. Ad. 202.

311. *Government Finance* Three Credit Hours
Required of all Business Administration Juniors.

A study from the point of view of the businessman of the amount and purposes of government expenditures; scope of government financial activity; public budgets; principles of public borrowing; sources of revenue; theories of tax distribution; general principles and practices of property taxes, commodity taxes, income taxes, corporation and other business taxes.

Prerequisite: B. Ad. 202.

312. *Taxation* Three Credit Hours
Required of all Business Administration Juniors.

A study of the basic principles of income taxation, including a thorough analysis of the present federal law dealing both with persons and corporations.

Prerequisite: B. Ad. 303.

314. *Intermediate Economics* Three Credit Hours
Elective for Business Administration Juniors and others.

A course designed to give the student a comprehensive understanding of national income, its measurement and analysis, including a study of business cycles, economic growth, and economic policies.

Prerequisite: Economics 202.

400. *Intermediate Accounting* Three Credit Hours
Required of all Business Administration Seniors.

An analysis of the balance sheet and the income statement with particular emphasis on the technique of evaluation of items comprising these statements; practical problems given in the laboratory.

Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 304.

401. *Industrial Accounting* Three Credit Hours
Elective for Business Administration majors and others with the necessary prerequisites.

A course in the principles of industrial accounting, including the accounting for materials, labor, and overhead under the job-order, process, and standard cost systems; practical problems given in the laboratory.

Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 400.

402. *Advanced Accounting Problems* Three Credit Hours
Elective for Business Administrative majors and others with the necessary prerequisites.

A study of advanced accounting problems, including the technical procedures in the organization and liquidation of partnerships; special problems in mergers and consolidations, estates, trusts, and receiverships;

practice problems done in the laboratory. Lecture: two hours; laboratory: two hours.

Prerequisite: B. Ad. 400.

403. *Corporation Finance* Three Credit Hours

Required of all Business Administration Seniors.

A survey of corporate financial policies and methods of planning and control; an analysis of factors affecting the capital structure of corporations and the proper use of different types of securities; management decision-making and control through use of budgetary procedures.

Prerequisites: B. Ad. 304 and 306.

404. *Investments* Three Credit Hours

Elective for Business Administrative majors and others with the necessary prerequisites.

A study in personal finance and security analysis; buying and selling procedure; stock exchanges; and the relative merits of the various types of securities as an investment or speculation.

Prerequisites: B. Ad. 304 and 403.

405. *Marketing Management* Three Credit Hours

Required of all Business Administration Seniors.

Marketing management primarily for the manufacturer; planning the product; planning for promotion; investigation of the market; pricing and price policy; planning the sales organization; management of sales personnel.

Prerequisite: B. Ad. 309.

406. *Transportation* Three Credit Hours

Elective for Business Administration majors and others with the necessary prerequisites.

A study of the history, geography, and economics of all forms of transportation; transport pricing; public regulation; public policy; current problems such as competition between modes of transportation.

Prerequisite: B. Ad. 405.

407. *Money and Banking* Three Credit Hours

Required of all Business Administration Seniors.

The nature and functions of money; the various monetary standards; the development of our monetary system; the factors affecting the value of money; methods and objectives of money and credit control; international exchange; analysis of recent development in money and credit.

Prerequisite: B. Ad. 311.

408. *Bank Management* Three Credit Hours

Elective for Business Administration majors and others with the necessary prerequisites.

A study of the development and structure of the commercial banking system; a description and analysis of the operations of our commercial

banks and an investigation of the techniques and principles followed by commercial banks in the performance of their many functions.

Prerequisite: B. Ad. 407.

409. *Personnel Management*

Three Credit Hours

Required of all Business Administration Seniors.

The principles and practices in the management of employees; introducing positive stimuli into industrial endeavors and promoting the industrial efficiency of labor, treating such factors as selection and placement, training programs, job analysis, labor turnover, merit rating, job evaluation, and wage analysis.

Prerequisite: B. Ad. 307.

410. *Production*

Three Credit Hours

Required of all Business Administration Seniors.

The problems of the production manager; location and design of plants; internal and external transportation; inventory control; methods of measuring activities of personnel; incentives, efficiencies, budgets, and organization.

Prerequisites: B. Ad. 202, 304 and 313.

412. *General Insurance* — Offered now as General Insurance 308.

414. *Data Processing*

Three Credit Hours

Elective for Business Administration majors and others.

An introduction to business information processing systems, including the fundamentals of data processing, systems of data processing, methods and equipment used in processing systems, and relationships of data processing systems to the management function. Emphasis is on modern systems utilizing electronic computers.

Prerequisites: Accounting 304 and Computer Programming, E.E. 203.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

DEPARTMENT OF CHEMISTRY

Professors: Wideman, Wilkinson, Hummers

Associate Professors: Ballentine, Clark, Boase, Jumper, Timmerman, Medbery, Leopold

Assistant Professors: Durkee, Browning, Dunmire, Wagener, Brewer, Baldwin

The objectives of this department are:

1. to offer to all freshmen majoring in the sciences or engineering a course in the fundamentals of general chemistry, and to freshmen majoring in the arts, business, and education a terminal course of elementary general chemistry.
2. to provide for students majoring in chemistry a B.S. in Chemistry course of study which will meet the educational requirements of the American Chemical Society for the professional chemist.
3. to offer an A.B. in Chemistry course of study to accommodate:
 - a. candidates for admission to medical, dental, and veterinary schools
 - b. candidates for high school chemistry teaching certification
 - c. men seeking careers employing chemical training as a background.
4. to offer a B.S. in Biology course of study to accommodate:
 - a. candidates for admission to medical, dental, and veterinary schools

- b. candidates for high school biology teaching certification
- c. candidates for admission to graduate schools in biological science
- d. those men seeking careers using biological training as a background.

B. S. Chemistry Major

The course of study for students majoring in chemistry is designed to prepare them to fill positions as chemists in commercial laboratories or as control chemists in industrial plants, and to provide the basic training for them to enroll as graduate students in full standing at the leading universities.

The courses of study embody training in the four fundamental subdivisions of the science: inorganic, organic, analytical, and physical chemistry.

The department occupies ten commodious laboratories, eleven lecture rooms, and one large lecture and demonstration room, all located in the west wing of Bond Hall. The laboratories are equipped with modern apparatus which is well adapted to the work.

The department maintains a centrally-located library with selected reference books and scientific journals. A number of the journals of the American Chemical Society may be found on the shelves of the reading room. Current periodicals and scientific magazines are kept up to date on the reading room tables.

A chapter of Student Affiliates of the American Chemical Society is active at The Citadel.

Students majoring in chemistry are required to take all of the courses offered by the department for Chemistry Majors and also Mathematics 119, 121, 122 and 220; German 101, 102 and 203, 204, and Physics 110, 211, and 212.

Premedical, Predental, and Preveterinary Preparation

Students who plan to qualify themselves for admission to these professional schools may choose either the B.A. Chemistry or the B.S. Biology courses of study. Those electing the B.A. Chemistry degree should take: General Biology (201-202), Comparative Anatomy (301), and Vertebrate Embryology (401), and it is strongly recommended that they take if possible: Genetics (306), Histology (402), General Physiology (403), General Psychology (301), Abnormal Psychology (304), and Mathematics 119 and 121 (in lieu of Mathematics 101, 102.) Those electing the B.S. Biology degree should take: Chemical Principles (203), Quantitative Analysis (202), and it is strongly recommended that they take if possible: General Psychology (301), Abnormal Psychology (304), and Mathematics 119 and 121 (in lieu of Mathematics 101, 102.)

A student must not only complete certain prescribed work for admission to a medical college but must show also an aptitude for medical studies. The Medical Aptitude Test, prepared by the Assoc-

iation of American Medical Colleges, must be taken by all students who expect to apply for admission to a medical college.

Unusually well qualified students who wish to apply for early admission to dental, medical, pharmacological, or veterinary medical schools may arrange a special program, subject to approval by the department head. This program should be planned to meet the minimum requirements of the particular professional school to which early application is to be made.

Students are cautioned that the professional schools impose higher than normal admission standards upon applicants from the Sophomore or junior class levels. Further, if admission is not achieved, it may be difficult to schedule a program of study to meet the requirements for graduation in the normal four years.

A. B. Chemistry Major

A number of students may wish to pursue higher education in medicine, dentistry, or veterinary medicine; or a career in secondary school chemistry teaching, or other areas which use a background of chemical training. The department offers an A.B. Chemistry course of study which permits many electives and great flexibility to the student to select courses which will provide him with the particular education suited to his needs. The candidate must take 32 credits in chemistry, namely 101, 102, 203, 202, 303, 304, 420, and two chemistry electives; 15 credits in English, namely 101, 102, 201, 202, and 205; 12 credits in physics, namely 205, 206, and 207; Mathematics 101, 102; History 101, 102; 12 credits in either French, German, or Russian; and 42 credits in approved electives. Mathematics 119 and 121 and Physics 110, 211, and 212 are welcomed as substitutes for Mathematics 101, 102 and Physics 205, 206, and 207, respectively.

B. S. Biology Major

The ever increasing importance of biological science, and the attractive career opportunities which require a biological science background cause the department to offer a B.S. Biology course of study. There are a number of electives in the program (24 credits) which permit flexibility in training for a number of goals: graduate biology; admission to medical, dental, or veterinary professional school; secondary school teaching certification; or other careers with a biological science background. The candidate must take 31 credits in biology: 201, 202, 301, 302, 306, 401, 403, 402; 16 credits in chemistry: 101, 102, 303, 304; 15 credits in English: 101, 102, 201, 202, and 205; 12 credits in physics: 205, 206, and 207; History 101, 102; Mathematics 101, 102; and 12 credits in either French, German, or Russian. General Parasitology (405) and Animal Ecology (406) are available in alternate years as electives in biology. Chemical Principles (203) and Quantitative Analysis (202) are recommended electives in chemistry. Mathematics 119 and 121 are suggested substitutes for 101 and 102.

101, 102. *General Chemistry*Four Credit Hours
Each Semester

Required of all freshmen majoring in the sciences, engineering, or mathematics.

Theoretical and descriptive chemistry, including the elements of modern chemical theory and discussion of some of the more common industrial processes. Slide rules are required. Lectures and recitations: three hours a week; laboratory: two hours a week.

103, 104. *Introduction to General Chemistry*Four Credit Hours
Each Semester

Required of all freshmen majoring in the arts, business, and education courses.

A terminal course designed for students who do not expect to take any other course in chemistry. The fundamental principles of chemistry and methods of science applied to the experiences of daily life; less comprehensive than Chemistry 101, 102.

Lectures and recitations: three hours a week; laboratory: two hours a week.

203. *Chemical Principles*

Four Credit Hours

Required of all chemistry majors; prerequisite for Organic Chemistry (303) for B.S. Biology majors and others unless the student has made a C or better grade in Chemistry 102.

The course provides lecture treatment of ionic equilibria (weak electrolytes, buffer solutions, pH, K_{sp}, complexation, hydrolysis) acid-base theory, redox theory, elementary kinetics and thermodynamics, and other topics of an elementary physical chemical nature. The laboratory work includes ionic reactions, preparation and properties of buffer solutions, measurements of pH, pH titrations, spectrophotometric standardizations and measurements, some emission spectroscopy, and several types of chromatographic separations.

Lectures: three hours a week; laboratory: three hours a week.

202. *Quantitative Analysis*

Four Credit Hours

Required of all sophomores majoring in chemistry, elective to others. The theory and practice of quantitative analysis, with emphasis on volumetric determinations. Instruments will be used for some procedures.

Lectures: Two hours a week; laboratory: four hours a week.

Prerequisites: Chemistry 203 or at least a C grade in Chemistry 102, or permission by the department head for superior students in special situations.

302. *Instrumental Methods*

Four Credit Hours

Required of all juniors majoring in B.S. Chemistry; elective to others. The student is acquainted with the theory and practice of methods involving such instruments as colorimeters, electrophotometers, infrared, visible and ultra-violet spectrophotometers, polarographs, pH meters, titrimeters, electrodeposition apparatus, recorders, vapor phase chroma-

tographs, gamma ray scintillation spectrometer, calorimeters, and other modern instruments including those used for detecting and measuring radioactive materials. Lectures: two hours a week; laboratory: four hours a week.

Prerequisites: Chemistry 305. Corequisite: Chemistry 306.

303, 304. *Organic Chemistry* Four Credit Hours
Each Semester

Required of all juniors majoring in chemistry or biology. The aliphatic and aromatic series and heterocyclic compounds; classroom discussions, lectures, and laboratory training in general reactions and synthetic methods.

Lecture: three hours a week; laboratory: three hours a week.

Prerequisites: Chemistry 203 or at least a C grade in Chemistry 102; or permission by the department head for superior students in special situations.

305, 306. *Physical Chemistry* Four Credit Hours
Each Semester

Required of all juniors majoring in B.S. Chemistry; elective to others. A study of the properties of solids, liquids, and gases, and of their relation to chemical constitution. Lecture: three hours a week; laboratory: three hours a week.

Prerequisites: Chemistry 202, Mathematics 122, and Physics 212.

Corequisite: Mathematics 220.

308. *Chemical Literature* One Credit Hour

Required of all juniors majoring in B.S. Chemistry; elective to others. An introduction to the effective use of chemical literature. One lecture hour a week.

401, 402. *Inorganic Chemistry* Three Credit Hours
Each Semester

Required of all seniors majoring in B.S. Chemistry; elective to others. A study of the principles and reactions of inorganic chemistry; atomic theory, valence, chemical bonds, the periodic system, acid-base theories, complex ions, radioactivity and nuclear relationships. Lectures: Three hours a week.

Prerequisites: Chemistry 304 and 306.

403, 404. *Advanced Topics in Organic Chemistry* Three Credit Hours
Each Semester

Required of seniors in B.S. Chemistry; elective to others.

A course designed to familiarize students with the survey of complicated molecules and their reactions, thus contributing to their facility for undertaking the study of biochemistry and other complicated fields of organic chemistry. Lecture and recitations: three hours a week.

Prerequisites: Chemistry 303, 304.

407. *Organic Preparations* Three Credit Hours

Required of all seniors majoring in B.S. Chemistry; elective to others. Advanced organic syntheses and technique with emphasis on purity and

yield of products. Lecture: one hour a week; laboratory: four hours a week.

Prerequisites: Chemistry 303, 304.

408. *Qualitative Organic Analysis*

Four Credit Hours

Required of all seniors majoring in B.S. Chemistry; elective to others. The classification, the study of type reactions, and the identification of pure organic compounds and mixtures of organic compounds. Lecture: two hours a week; laboratory: four hours a week.

Prerequisites: Chemistry 304 and 308.

411. *Physical Chemistry Topics*

Three Credit Hours

Required of all seniors majoring in B.S. Chemistry.

Further exploration of problems and theory of physical chemistry in areas not fully treated in Physical Chemistry 305, 306.

Lectures: three hours a week. Prerequisites: Chemistry 304 and 306.

412. *Inorganic Preparations*

Two Credit Hours

Required of all seniors majoring in B.S. Chemistry.

Techniques employed in several widely different inorganic syntheses.

Lecture: one hour a week; laboratory: two hours a week.

Prerequisites: Chemistry 302, 305.

Biology and Geology

No attempt is made at The Citadel to maintain separate departments in these two subjects. The courses are under the administration of the Department of Chemistry.

The courses in biology offered to students majoring in premedicine meet the requirements of the more exacting medical colleges. However, since biology and geology have made a great contribution to modern philosophy, a knowledge of at least their elemental aspects is a distinct contribution to the general culture of any student. Accordingly, Biology 201, 202 and Geology 301, 302 are made available for election to all upper classmen. Geology 303 is limited to students majoring in civil engineering.

201. *General Biology*

Four Credit Hours

Required of all sophomores majoring in biology, education, and physical education; elective to others.

A study of biological principles common to plant and animal life: protoplasm, cells, development, genetics, ecology, evolution, and systematics, followed by a general survey of the major plant groups.

Lectures: two hours a week; laboratory: four hours a week.

202. *General Biology*

Four Credit Hours

Required of all sophomores majoring in biology, education, and physical education; elective to others.

A general survey of the major animal phyla including taxonomy, morphology, physiology, reproduction, phylogeny, and ecology. General structure and function of the vertebrates is stressed.

Lecture: two hours a week; laboratory: four hours a week.

Prerequisite: General Biology 201.

301. *Invertebrate Zoology* Four Credit Hours
Required of all juniors majoring in biology; elective to others.
A general study of the invertebrate animals including taxonomy, biology, and ecology.
Lecture: two hours a week; laboratory: four hours a week.
Prerequisite: General Biology 202.
302. *Comparative Vertebrate Anatomy* Four Credit Hours
Required of all juniors majoring in biology; elective to others.
Comparative anatomy of certain vertebrate forms.
Lecture: two hours a week; laboratory: four hours a week.
Prerequisite: General Biology 202.
303. *Human Anatomy and Physiology* Three Credit Hours
Required of juniors majoring in physical education and elective to juniors and seniors other than biology majors. Cytology, metabolism, anatomy, and physiology of the integumentary, skeletal, muscular, and nervous systems of man.
Lecture: three hours a week.
Prerequisite: General Biology 202.
304. *Human Anatomy and Physiology* Three Credit Hours
Continuation of Human Anatomy and Physiology 303. Required of juniors majoring in physical education and elective to juniors and seniors other than biology majors. Those aspects of human anatomy and physiology that are related to circulation, digestion, kidney reaction, respiration, endocrine activities, and reproduction.
Lecture: three hours a week.
Prerequisite: Human Anatomy and Physiology 303.
306. *Genetics* Three Credit Hours
Required of all juniors majoring in biology; elective to others.
The course presents in a relatively non-technical manner the basic facts essential for an understanding of the mode of inheritance in plants and animals with the major emphasis on animals. It is strongly suggested by many medical colleges.
Lecture: two hours a week; laboratory: two hours a week.
Prerequisite: General Biology 202.
401. *Embryology* Four Credit Hours
Required of all seniors majoring in biology; elective to others.
Embryology of representative vertebrates, including the amphibian and bird, with additional material on mammals.
Lecture: two hours a week; laboratory: four hours a week.
Prerequisite: Comparative Vertebrate Anatomy 301.
402. *Descriptive Histology* Three Credit Hours
Required of all seniors majoring in biology; elective to others.
A detailed study of the chief types of animal tissues and a description of the histology of organs. Laboratory work includes microscopic study of cells, tissue and organs of mammals, and training in the preparation of microscopic slides.

Lecture: two hours a week; laboratory: two hours a week.

Prerequisite: General Biology 202.

403. *General Physiology*

Three Credit Hours

Required of all seniors majoring in biology; elective to others.

A systematic study of the general physiology of skin, skeleton, muscle, nervous system, special senses; digestive, circulatory and respiratory systems, kidney function, hormonal control, and reproduction with emphasis on man.

Lecture: two hours a week; laboratory: two hours a week.

Prerequisite: General Biology 202.

405. *General Parasitology*

Three Credit Hours

Elective to all juniors and seniors.

Taxonomy, morphology, adaptation, and ecology of parasites affecting man and domestic animals. Life history, vectors, and controls are emphasized. Offered in alternate years with Animal Ecology (406).

Lecture: two hours a week; laboratory: two hours a week.

Prerequisite: General Biology 202.

406. *Animal Ecology*

Three Credit Hours

Elective to all juniors and seniors.

A survey of the principles and methods used in the study of relationships between the environment and living organisms. Offered in alternate years with General Parasitology (405).

Lecture: two hours a week; laboratory: two hours a week.

301, 302. *Elementary Geology*

Three Credit Hours
Each Semester

Elective to all juniors and seniors.

The various processes, such as crust movements, igneous influences, weathering, erosion, denudation, and transportation which have been instrumental in shaping the earth; the composition, structure, and arrangement of igneous and sedimentary rocks; and a survey of the historical aspects.

Lecture: three hours a week.

303. *Engineering Geology*

Three Credit Hours

Required of and limited to juniors majoring in Civil Engineering.

The origin and occurrence of the three major groups of rocks, their composition, resistance to weathering, and employment in engineering construction, the various processes of dynamic geology considered with special reference to their application to engineering practice.

Lecture: two hours a week; laboratory: two hours a week.

All Candidates For Graduation

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation.

A research problem and accompanying report are required for all B.S. Chemistry majors and urged for A.B. Chemistry and B.S. Biology majors. See page 82.

DEPARTMENT OF CIVIL ENGINEERING

Professors: Himelright, Myers, Causey

Associate Professors: Hutto, Mellard

Assistant Professors: Key, Middleton, Rutland, Ingram

The objective of the Civil Engineering Department is to give a course that will meet the basic educational requirements of the profession of civil engineering. This objective is sought through a co-ordinated program of liberal, scientific, and technological courses designed to broaden and enrich the student's general education as well as to lay the foundation for technical competence.

Included in the curriculum is a number of liberal arts courses so that students may achieve a well-rounded general education. Courses in the basic sciences have been broadened.

The program in the freshman class does not differ essentially from liberal arts programs in most undergraduate courses. In the sophomore class, limited specialization begins with the introduction of courses in surveying and mechanics. In the junior and senior years the time is devoted essentially to basic professional courses. Throughout the four years the program is taught with the primary emphasis upon inculcating habits of orderly study, investigation, and sound reasoning

rather than upon the mere acquisition of factual information. Constant attention, too, is given to engineering procedure in its wider sense, that is, the characteristic methods by which engineers conceive, design, and construct engineering projects.

Seminars in various engineering specialties are held several times a year at which time educators and practicing engineers from other areas are invited to present lectures and moderate discussions. These give the students the opportunity to gain new concepts from others than the departmental staff.

Such a curriculum, ably taught, should prepare the better students to develop a mastery of such special fields as their subsequent employment may lead to or to pursue more advanced work in the graduate schools of engineering. In general educational value, if properly adapted to the student's interests and aptitudes, it should meet the educational demands of good citizenship in whatever field the graduate enters.

The new concept of the engineer is that of a professional man thoroughly grounded in technology but also alive to the social and economic implications of his professional activities. It clearly appears to be the duty of engineering schools to fashion their graduates in this mold in so far as limitations of time will permit.

The civil engineering curriculum is accredited by the Engineers' Council for Professional Development.

There is a successful student chapter of the American Society of Civil Engineers.

For students having an especial interest in highway engineering there is a student chapter of The American Road Builders Association.

There is an active chapter of Sigma Epsilon Pi, a local honorary engineering society.

DEGREE: The degree of Bachelor of Science in Civil Engineering (B.S. in C.E.) is awarded to those who successfully complete the program of studies on page 88.

BUILDINGS: The department is housed in its own buildings on the north end of the campus. The main building was designed specifically for the needs of civil engineering instruction, and it contains the necessary laboratories, drafting rooms, classrooms, and other rooms needed to carry on the work of the department. An auxiliary building houses a portion of the soils laboratory. In addition this department has classrooms and a drafting room in the Physical Education Building.

JOHN ANDERSON MEMORIAL LIBRARY: The department maintains a small but well-selected and arranged library that is open to students at all hours. Current copies and files of leading engineering magazines are available in the reading room. A Geodex reference locating system in the library affords a quick and easy method of locating articles and research papers on structural members, materials, processes and theories.

EQUIPMENT: Well-equipped laboratories are maintained for work in cement and concrete, bituminous materials, soils, fluid mechanics, sanitary engineering and structural materials. For the work in cement and concrete a curing room with temperature and humidity controls and another room for steam curing are available.

In the concrete laboratory there is an adequate supply of equipment for every student to prepare his individual test specimens. The equipment includes a large supply of molds, platform scales, mixing tables, a two-cubic-foot concrete mixer, concrete block machine, air entrainment measuring apparatus, and the usual minor articles.

In the materials testing laboratory the main items of equipment are a 400,000 pound Baldwin-Southwark universal hydraulic testing machine with a clearance of ten feet for column testing and a 36-inch wide working table; a 60,000 pound Tinius-Olsen hydraulic universal testing machine; a 150,000 pound Olsen screw-power universal testing machine; a 10,000 inch pound torsion machine; a Rockwell hardness testing machine; a Sonntag fatigue machine; Brinell, cold bend, shearing, and transverse testing attachments, three spherically seated bearing blocks, and a variety of specimen grips for tensile testing; S R-4, Berry Whittemore, Riehle, and G. F. Moore strain gauges; compressometers, deflectometers, and other instruments for measuring deformation; a Beggs deformer for use in model analysis; machined bearing blocks and I-beam with adjustable supports for transverse tests. This laboratory is equipped with an overhead crane for handling heavy specimens in any part of the room.

In the bituminous materials testing laboratory there is adequate equipment for making routine tests of asphalt cements, cut-back asphalts, and emulsified asphalts as well as tests of road tars. The equipment includes a Saybolt-Furol viscosimeter, an Engler viscosimeter, distillation apparatus, a penetrometer, a Cleveland open-cup flash point apparatus, ring and ball softening point apparatus, a Rotorex extraction machine and float test apparatus. In addition there is a Marshall Stability Testing machine and accessory equipment for design and analyzing asphalt paving mixtures by the Marshall method. Also there is complete equipment of 2" and 6" Hubbard-Field apparatus for molding specimens for design of bituminous mixtures. Supplemental equipment includes ample glassware, thermostatically controlled electric and gas ovens, constant temperature water bath, a cold water circulating apparatus and cleaning tank with special solvent for quick and easy cleaning of equipment.

The soils laboratories are equipped with both scale and dead-weight consolidometers, triaxial and direct shear machines, unconfined compression machines, permeameters, Atterberg limit equipment, Proctor and modified A.A.S.H.O. compaction apparatus, standard sieves and soil hydrometers, C.B.R. apparatus, and other equipment needed for tests and experiments with soils.

The fluid mechanics laboratory is equipped for a variety of experiments in the flow of water through pipes and orifices and over weirs. Water is supplied by a 500-gpm centrifugal pump to a constant head tank, from which it is distributed to the various test units and returned through floor channels to the pump intake. A fluid circuit apparatus with an analog simulator for measuring flow characteristics in pipe systems has been recently added. Other equipment includes Venturi meter, orifices, weir, parshall flume, pipe ranges, differential gauges, hook gauges, weighing tanks, and scales.

The sanitary engineering laboratory is equipped for experiments according to "Standard Methods," which represent the current practice for ordinary problems in water and sewage analysis. For water analysis, pH, alkalinity, acidity and bacteriological examinations may be made. For sewage analysis, tests for pH, biochemical oxygen demand, and solids content may be made. The equipment includes incubator, muffle furnace, balances, pH meters, and constant temperature refrigerator.

Adequate equipment is available for the courses in surveying. This includes fourteen transits, one micro-optical reading transit, nine levels, four plane tables, two sextants, aneroid barometer, several compasses, standardized tapes, and a complete supply of level rods, tapes, and pins. For photogrammetric work there is a rectoplanograph, stereocomparagraph, stereoscope radial plotter, extended eye base stereoscope, parallax bar, "Lazy Daisy" mechanical triangulation set, forty pocket stereoscopes, thirty-nine height finders and about five hundred aerial photographs of various sections of the United States including a complete stereoscopic coverage of Charleston County, South Carolina. This equipment is used in both the surveying and the photogrammetry courses.

All drafting rooms, laboratories, classrooms, and the library are equipped with fluorescent lighting. Two of the larger classrooms and one drafting room may be darkened at any time to show motion pictures, for which a sound or slide projector is available. The drawing rooms are furnished with tables, and there are available drafting machines, parallel rules, planimeters and necessary minor items. A printing room is equipped with an Ozalid dry printing machine.

A computation room in the center of the building, open to students at all times, is equipped with Monroe calculating machines. This facility has done much to expedite numerical calculations and thus saves much of the students' time. Also in this room is an IBM card punch machine for use by the staff and students. An IBM 1620 computer center is maintained elsewhere on the campus.

An assembly room equipped with black-out shades, a large projection screen, and raised speaker's platform, and having a seating capacity of one-hundred-forty persons, provides a meeting room for student societies, instruction with visual aids, and other meetings.

The electives must be in the field of humanities and must have the approval of the Department of Civil Engineering. Also the requirements of the department offering the elective must be met.

101, 102. *Graphic Science*

Four Credit Hours

Required of all Civil and Electrical Engineering Freshmen.

Use and care of drawing instruments; proper weights and types of lines for clear, clean-cut, and complete graphical representation; useful geometrical construction; freehand sketching; orthographic projection; auxiliary, revolved, and sectional views; pictorial representation with emphasis on isometric drawing; dimensioning; true lengths and shapes; intersections and developments; problems on points, lines, and planes to be solved by the method of auxiliary planes in third angle projection; also specifications of fastenings, and typical engineering drawing of a steel truss. Problems selected with a view to emphasizing practical applications and developing the ability of the student to think in three dimensions. Development of reasonable skill in lettering.

Laboratory: four hours.

202. *Statics*

Four Credit Hours

Required of all Civil Engineering Sophomores.

Analytic and graphic solutions of problems in statics; principles of statics; resultants, reactions, and equilibrium of forces; analysis of simple trusses; friction; centroids and centers of gravity; moments of inertia. Laboratory period used for graphical solutions. Lecture: three hours; laboratory: two hours.

Prerequisites: Phy. 110; Graphic Science 102; eligible for Math. 122.

204. *Photogrammetry*

One Credit Hour

Required of all Civil Engineering Sophomores.

An elementary course in aerial photography and topographic mapping; methods of topographic projection; planning topographic flights; basic photo-interpretation; geometric properties of photographs; radial line plotting; photographic measurements. Laboratory: two hours.

Prerequisites: C.E. 205; Concurrent with Surveying 206.

205, 206. *Surveying*

Eight Credit Hours

Required of all Civil Engineering Sophomores.

Linear measurements; leveling; compass and transit; slide rule and calculating machines; theory of errors; land surveying and boundary laws; latitudes and departures; areas and volumes; stadia; plane table; route surveys; vertical, circular, and transition curves; State plane coordinates; standard map projections; Polaris and solar observations; introduction to the use of electronic computers and the solution of problems related to surveying and other fields of civil engineering. During the 206 semester there is a one-day, eight-hour field trip on a designated Saturday for the purpose of making a complete topographic survey from which a topographic map is drawn. Also required is one

night-time Polaris observation during the 206 semester. Required student equipment: "log-log" duplex slide rule.

Lecture: three hours. Field two hours in addition to the field trip and Polaris observation.

Prerequisites: Graphic Science 102; Math. 121; Concurrent with or following Math. 122.

301. *Dynamics*

Three Credit Hours

Required of all Civil Engineering Juniors.

Types and principles of motion in relation to rigid bodies; rectilinear translation; curvilinear translation; rotation; work and energy; impulse and momentum. Lecture: three hours.

Prerequisites: C.E. 202; Math. 122.

303. *Mechanics of Materials*

Four Credit Hours

Required of all Civil Engineering Juniors.

Elastic properties of structural materials; internal stresses and strains in beams, columns, shafts; riveted and welded joints; shear and moment diagrams; combined bending and direct stress. Supplemented by materials Laboratory, C.E. 307, which is to be taken either before or concurrently with C.E. 303. Lecture: four hours.

Prerequisites: Math. 122; C.E. 202.

304. *Mechanics of Materials*

Three Credit Hours

Required of all Civil Engineering Juniors.

Deflection of beams; unsymmetrical bending; principal stresses; fundamental theory and principles of pre-stressed concrete. Lecture: three hours.

Prerequisites: Math. 220; C.E. 303.

305. *Highway Engineering*

Three Credit Hours

Required of all Civil Engineering Juniors.

Highway economics; road costs and road user costs; economic comparison of alternates by benefit-cost ratio method; planning and financing; legislation and administration; location and geometric design; basic principles of traffic surveys; method of predicting future traffic volumes; basic highway soils engineering; drainage; grading. Lecture: three hours.

Prerequisite: C.E. 206.

306. *Highway Engineering*

Three Credit Hours

Required of all Civil Engineering Juniors.

Alignment and earthwork drawings and computations; routine tests of highway materials, bituminous and non-bituminous; pavement and base thickness design; design and testing of asphalt paving mixtures; construction of roadway elements; construction surveys; contracts and specifications. Lecture: two hours; laboratory: two hours.

Prerequisite: C.E. 305.

307. *Materials Laboratory*

One Credit Hour

Required of all Civil Engineering Juniors.

Laboratory supplement to Mechanics of Materials C.E. 303. Introduction to the use of testing machines and equipment; strength and deformation measurements of ferrous metals and concrete; properties of materials as determined by test results; compression; tensile and bending specimen tests; use of SR-4 electric strain gauge; the determination of stresses and strains in models of structural frames; use of ASTM Specifications and Test Procedure. Laboratory: three hours. Prerequisites: C.E. 202; Math. 122, concurrent with C.E. 303.

308. *Structural Analysis I*

Three Credit Hours

Required of all Civil Engineering Juniors.

Analytic analysis of simple structures: force systems in space; shear and moment for static and moving loads on beams and trusses; forces in various types of statically determinate framed structures; influence line diagrams; plastic theory and analysis of elementary structures. Prerequisites: C.E. 301, C.E. 303; Math. 220.

310. *Engineering Law and Specifications*

Three Credit Hours

Required of all Civil Engineering Juniors.

An elementary course in law in relation to engineering practice, beginning with a brief study of the Constitution of the United States; contracts, agency, real and personal property, sales, mechanic's liens, workman's compensation laws; construction contract documents; advertising and awarding contracts; writing and interpretation of standard specifications. Lecture: three hours.

Prerequisite: Completion of all Freshman Work, English 202, and Surveying 206.

401. *Concrete Laboratory*

One Credit Hour

Required of all Civil Engineering Seniors.

Design, preparation and testing of portland cement concrete mixes for a desired quality of concrete using both plain portland cement concrete and concretes containing the various commonly used admixtures; test specimens cured under controlled temperatures and moisture conditions; close attention given to the influence of the quality and grading of the aggregates and to other features affecting the properties of the concrete ultimately forming a structure; study and discussion of specifications governing good construction practice in handling and placing aggregates and concrete, and the control and inspection of same.

Laboratory: two hours.

Prerequisite: C.E. 307.

402. *Soil Mechanics Laboratory*

One Credit Hour

Required of all Civil Engineering Seniors.

Classification, control, and soil strength tests to predict suitability of soil for use in earth dams, roads, and foundations; to include specific

gravity, combined mechanical analysis, Atterberg limits, permeability, compaction, unconfined compression, consolidation, triaxial, direct shear, and C.B.R. tests; field tests to consist of field density tests, soil borings, and load tests. Laboratory: two hours.

Prerequisites: C.E. 401; C.E. 410 to be taken concurrently.

403, 404. *Reinforced Concrete Design*

Three Credit Hours
Each Semester

Required of all Civil Engineering Seniors.

Theory and design of reinforced concrete structures, including the ultimate theory as applied to beams and columns. Design of footings; retaining walls; combined stress members; theory and design of pre-stressed concrete structures; design of selected portions of concrete structures with special attention to current specifications for design and construction. Lecture: three hours.

Prerequisites: C.E. 304, C.E. 308.

405. *Structural Analysis II*

Four Credit Hours

Required of all Civil Engineering Seniors.

Theory of statically indeterminate structures, using method of work, three moment theorem, slope deflection, moment distribution; analysis of multistoried steel frame building; model analysis using Beggs De-formeter. Lecture: three hours; laboratory: two hours.

Prerequisites: C.E. 304, C.E. 308.

406. *Steel Design*

Four Credit Hours

Required of all Civil Engineering Seniors.

Two different philosophies of analysis and design: First, by the elastic theory, the design of tension and compression members, beams, plate girders; analysis and design of highway bridge trusses; analysis, design, and structural drawing of a steel mill building. Second, by the plastic theory, the analysis and design of continuous beams and single-story rigid frames. Lecture: three hours; laboratory: two hours.

Prerequisite: C.E. 405.

407. *Fluid Mechanics*

Four Credit Hours

Required of all Civil Engineering Seniors.

Fluid characteristics, properties and definitions; fluid statics; fluid dynamics; fluid flow and measurements, and application in meters, orifices, weirs, pipes, and open channels; laboratory period for experimental demonstration of theory and for supervised computation work.

Lecture: three hours; laboratory: two hours.

Prerequisite: C.E. 301.

408. *Sanitary Engineering*

Three Credit Hours

Required of Civil Engineering Seniors

Relationship of water supply and sewage disposal to public health; hydrology; water consumption; quality standards; collection, treatment and distribution of water; sewers and sewerage; quantity and characteristics of sewage; methods of treatment and disposal of sewage;

laboratory period for experimental demonstration of theory and for supervised computation work. Lecture: two hours; laboratory: two hours.

Prerequisites: Completion of all work of the junior year and C.E. 407.

409, 410. *Soil Mechanics and Foundations* Three Credit Hours
Each Semester

Required of all Civil Engineering Seniors.

Soil physics; nomenclature and field identification; grain shape and soil structure; classification systems; soil capillarity; Atterberg limits; permeability; seepage; flow nets; piping; subsurface drainage; frost action; permafrost; stresses in soils; consolidation; shear strength; stability of slopes; earth dams; bearing capacity; shallow foundations; pile foundations; earth pressure; retaining walls and open cuts; underpinning; caissons and cofferdams; subsurface exploration; soil stabilization. Lecture: three hours.

Prerequisites: Geol. 303, C.E. 304, C.E. 301, C.E. 306, C.E. 402 to be taken concurrently with C.E. 410. C.E. 407 to be taken concurrently with or preceding C.E. 409.

420. *Senior Essay* Two Credit Hours
Required of all seniors as a prerequisite to graduation. See page 82.

DEPARTMENT OF EDUCATION

Professor: Blanding

Associate Professor: Wimpey, Bowman

Assistant Professors: Lenhardt, Berryhill, Weston

1. *TEACHER-TRAINING*

The Department of Education provides professional training for students who plan to teach in secondary schools. The curriculum meets the requirements for South Carolina teacher certification and the requirements of most other states.

The department also offers elective courses, which are available to majors in other departments, in the related fields of psychology, sociology, philosophy, and fine arts.

THE EDUCATION MAJOR

The following courses are offered by this department:

301. *Philosophy of Education*

Three Credit Hours

An orientation course; a survey of the history, philosophies, and theories underlying organized education; the significance of the dissemination of knowledge in a democracy.

303. *Guidance* Three Credit Hours
Philosophy, principles, and techniques to provide teachers with competencies needed for participation in guidance programs; theories and practices of guidance; mental, vocational, and aptitude testing.

400. *Directed Teaching* Six Credit Hours
A requirement for certification; observation and teaching in approved high schools under approved supervising teachers; supervision by college instructor.

The student must reserve for this teaching internship the same three consecutive hours daily, Monday through Friday, and must be enrolled concurrently in Education 403—Seminar in Secondary Education. He provides his own transportation. He must make formal application for Directed Teaching not later than two weeks prior to the beginning of the semester.

Limited to seniors majoring in Education.

401. *Methods and Materials of Secondary School Teaching* Three Credit Hours

Study of the aims, methods and materials employed in secondary school teaching; organization of subject-matter; motivation and direction of learning; development of attitudes, appreciations and ideals; classroom presentation of formal materials; conducting informal activities; provision for individual differences; measuring educational outcomes; reports; discussion.

402. *Principles and Problems of Secondary Education* Three Credit Hours

Definition and analysis of issues in American secondary education; the principles most applicable to the solution of these problems; the aims, curriculum, scope, and organization of the secondary school. Secondary education in a changing America; the impact of world conditions upon the secondary school; American secondary schools and the future.

403. *Seminar in Secondary Education* Three Credit Hours

Definition and discussion of principles, methods, and problems arising from experience in directed teaching; consideration of practical problems of secondary school teaching and administration; discovery of specific professional interests; observation of teaching; reading and observation reports.

Must be taken concurrently with Education 400, Directed Teaching.

406. *Educational Tests and Measurements* Three Credit Hours

Theories, principles, and practices of mental and educational measurements. The construction and use of the various types of objective instruments of evaluation. Elements of statistics needed in the interpretation and use of examination results.

407. *Audio-Visual Aids* Three Credit Hours

The aims and scope of audio-visual instruction; techniques underlying their use; projects and practice in the uses of objects, specimens, models, and pictures; the opaque projector, the motion picture, film strips, and slides; radio, television, the public address system, and the various types of recorders; selection and care of equipment; administration and supervision of the audio-visual program.

420. *Senior Essay* Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

II. RELATED FIELDS

In addition to the electives listed below, any of the Education courses except Education 400—Directed Teaching and Education 403—Seminar in Secondary Education, may be elected by qualified students in other departments.

Psychology**301. *General Psychology* Three Credit Hours**

Elective for juniors and seniors. Required of premedical students. An introduction to the scientific study of behavior; emphasis upon experimental investigation of such fields as attention, perception, learning, intelligence, emotion, and personality.

302. *Educational Psychology* Three Credit Hours

This course seeks to bring the principles of educational psychology to prospective teachers in order that they may teach effectively. A vast body of educational research and practice is brought to bear on the following areas: psychology and school problems; learning readiness and its development; learning skills, ideas, and attitudes; planning, motivation, and evaluation of learning; and emotional and mental health for learning.

304. *Abnormal Psychology* Three Credit Hours

Required of premedical students.

Findings based upon experimental investigation of such fields as attention, perception, and association; theories of personality; discussion of the common neuroses and psychoses.

Prerequisite: Psychology 301.

305. *Social Psychology* Three Credit Hours

A study of the individual in relation to his social environment with special attention to group behavior, social motivation, and individual adjustment to group situations. May be considered a social science course.

306. *Theories of Personality* Three Credit Hours

A study of major contemporary theories of personality with special emphasis on the biological and psychological foundations and integrative aspects of personality.

307. *Mental Hygiene* Three Credit Hours
Science of preserving psychological health. The causes and prevention of mental abnormalities.

401. *Psychology of Adolescence* Three Credit Hours
Required of Education majors.
The physical, psychological and social development of the adolescent; emphasis on personality formation and problems of social adjustment.

404. *Applied Psychology* Three Credit Hours
Application of the principles of psychology to such topics as education, mental health, industry, crime, advertising, and personal problems. Emphasis will be upon a practical system of psychology and the well-integrated personality.

Philosophy

306. *Logic* Three Credit Hours
The principles of valid thinking; laws of reasoning; common fallacies; deductive and inductive methods.

307. *Ancient Philosophy* Three Credit Hours
A brief survey of Greek philosophy; primarily a study of Plato's *Republic* and Aristotle's *Politics*.

308. *Medieval and Early Modern Philosophy* Three Credit Hours
A study of the ideas most important to the contemporary world which developed in the period from the fourth to the eighteenth century. These will include the philosophies associated with the medieval church, the Renaissance and Reformation, the rise of scientific thought and rationalism, and the eighteenth century enlightenment.

309. *Modern Philosophy* Three Credit Hours
A study of some of the most important and representative ideas of the nineteenth and twentieth centuries. These will include conservatism, liberalism, Darwinism, and nationalism.

Sociology

301. *Introduction to Sociology* Three Credit Hours
The scientific study of principles and comparisons in society and culture as these relate to population and communities, behavior systems, group collectivity and structure, social change, and institutions.

302. *Social Problems* Three Credit Hours
A study of the breakdown of society in its various forms with consideration of the causation as well as the resultant problems; special emphasis given to contemporary problems such as the broken family, juvenile delinquency, unemployment, and individual personality maladjustment.

303. *The Contemporary American Family* Three Credit Hours

A frank and comprehensive analysis of the problems confronting the modern American family, with case studies treating the various phases of conflict within the family.

401. *Criminology* Three Credit Hours

A study of crime, its causes, conditions prevention, and treatment; a presentation of theories and hypotheses, supported by concrete facts, designed to assure the student that the theories proposed are based upon realities and exact observation.

Recommended only for students who have completed Sociology 301, Introduction to Sociology.

- Soc. 402. *Social Anthropology* Three Credit Hours

The nature of social organization and the processes of social interaction characterizing different societies; stress on culture in relation to the society which is the creator and bearer of that culture.

Fine Arts

305. *Music Appreciation* Three Credit Hours

A non-technical course to enhance the student's understanding and enjoyment of music by a two-fold approach: first, to gain fundamental knowledge of style, content, and form of the more outstanding works of the great composers; and, second, to study the evolution of musical art up to the present time; particular emphasis placed upon the latter.

306. *Art Appreciation* Three Credit Hours

The theory of abstract principles and material techniques as applied in the evaluation of works of art. The employment of such theory in an introductory study of famous art works.

307. *Art History* Three Credit Hours

Survey of the history of art, with emphasis upon Western civilization. A chronological sequence of the major creators of art, from prehistoric to modern times, identifying, evaluating, and comparing their works in terms of styles, schools and periods against their respective backgrounds—political, economic, geographic, educational and social.

DEPARTMENT OF ELECTRICAL ENGINEERING

Professor: Herring

Associate Professors: Cory, Johnson

Assistant Professor: Faulk

In 1941 the Board of Visitors authorized the establishment of a Department of Electrical Engineering at The Citadel. The department was founded to meet the needs of many students who are attracted to the type of education which The Citadel offers, but who were formerly compelled to go elsewhere to obtain training in the field of their special interest.

The first graduating class of eight men received degrees in September 1948. Since then, the facilities and curriculum have been steadily improved. A chapter of Student Members of the Institute of Electrical and Electronics Engineers is active at The Citadel.

It is the purpose of the department to prepare men for professional work or for graduate study in the field of electrical engineering and to give them training in as many of the elements of a broad education as can be included in a program of professional study leading to the degree of Bachelor of Science in Electrical Engineering.

The classrooms and laboratories of the department are located in the east wing of Bond Hall. The electronics laboratory is equipped with modern instruments and an efficient breadboarding system for the study of vacuum-tube and solid-state circuits. The apparatus used in the electrical measurements laboratory permits precise measurement of electrical parameters, time and frequency. An instrument storeroom and shop adjoins the electrical measurements laboratory and the electronics laboratory.

Three analog computers and a breadboard servomechanism system are available in the computer and control system laboratory. A twenty-amplifier analog computer along with such peripheral equipment as a low-frequency function generator, an X-Y plotter, a digital voltmeter and an oscilloscope camera is used extensively in simulation of physical systems.

The machines laboratory is equipped with a flexible power distribution system and representative machines of moderate size. A Westinghouse generalized machine is also available. The department shop has adequate facilities for instrument repair and for construction of special apparatus.

For a tabulation of the course requirements for electrical engineering majors, see "Courses of Study," page 90. With the approval of the department head, up to six credit hours of Professional Electives may be elected from courses numbered above 300 in the department of chemistry, civil engineering, mathematics, or physics.

101. *Engineering Orientation* One Credit Hour
Required of Electrical Engineering Freshmen.

A course describing the responsibilities and problems facing professional engineers. Guidance and counseling in effective study methods.
Lecture: one hour.

201,202. *Introduction to Electrical Engineering* Three Credit Hours
Each Semester

Required of Electrical Engineering Sophomores.

D. C. circuit theory; simple networks; introduction to electric and magnetic fields; circuit components and their ratings; A. C. circuit theory; basic measuring instruments. A "Take-Home Laboratory Kit" is used to verify basic laws and relations.

Lecture: three hours, two semesters.

Prerequisites: To be preceded or accompanied by Physics 110-211; Math. 122.

203. *Computer Programming* One Credit Hour
Required of Electrical Engineering Sophomores; open to others.

The application of mathematical methods and digital computers to basic problems in engineering and science; practice in writing programs in Fortran II-D.

Lecture: one hour.

301,302. *Electrical Laboratory*One Credit Hour
Each Semester

Required of Electrical Engineering Juniors.

A two semester sequence of laboratory work which is coordinated with the lecture courses in the Junior year.

Laboratory: two hours.

305. *Introduction to Electronics*

Three Credit Hours

Required of Electrical Engineering Juniors.

Electron ballistics and basic semiconductor physics; characteristics of vacuum and solid-state devices; analysis of active networks.

Lecture: three hours.

Prerequisites: Math. 220; Physics 212; E.E. 202.

308. *Elements of Electrical Engineering*

Three Credit Hours

Required of Civil Engineering Juniors.

Electric and magnetic circuits and fields; electrical machinery; measurements, instrumentation and control; basic electronics.

Lecture: two hours; laboratory or demonstration: two hours.

Prerequisites: Math. 220; Physics 211.

309. *Linear Circuit Analysis*

Five Credit Hours

Required of Electrical Engineering Juniors.

Solution of network equations; network theorems; Fourier series; transient response and the complex frequency plane; Laplace transforms; balanced and unbalanced polyphase circuits.

Lecture: five hours.

Prerequisites: Math. 220; Physics 212; E.E. 202.

310. *Electromagnetic Energy Conversion*

Five Credit Hours

Required of Electrical Engineering Juniors.

A study of the principles and characteristics of static and dynamic energy conversion devices.

Lecture: five hours.

Prerequisites: E.E. 309.

401. *Electronic Circuits*

Three Credit Hours

Theory and design of electronic circuits; narrow-band, wideband, and D. C. amplifiers; oscillators, modulators, and detectors; pulse circuits.

Lecture: three hours.

Prerequisites: E.E. 305, 309.

402. *Electronic Systems*

Three Credit Hours

A.M., F.M., and pulse communication systems; instrumentation.

Lecture: three hours.

Prerequisites: E.E. 401.

405. *Electrical Measurements*

Three Credit Hours

Modern methods of measuring resistance, inductance, capacitance, current, electromotive force, frequency, and magnetic quantities.

Lecture: three hours.

Prerequisites: E.E. 309.

407. *Logical Design of Digital Computers* Three Credit Hours
 Boolean algebra; synthesis of switching circuits; basic logic circuits; digital computer structure; instruction codes; input-output and memory devices.

Lecture: three hours.

408. *Electric Power Systems* Three Credit Hours
 A study of electric power generation, transmission and distribution circuits. System economics. Study of load-flow, faults and system stability.

Lecture: three hours.

409,410. *Seminar* One Credit Hour
 Each Semester

Required of Electrical Engineering Seniors.

A study of current literature in electrical engineering and related fields. Oral and written reports on topics of interest to electrical engineers.

411,412. *Electrical Laboratory* One Credit Hour
 Each Semester

Required of Electrical Engineering Seniors.

A two semester sequence of laboratory work which is coordinated with the lecture courses in the senior year.

Laboratory: two hours.

413,414. *Circuit Networks* Three Credit Hours
 Each Semester

Analysis and synthesis of electrical circuit networks using matrix and transform techniques; filter design; transient response of linear circuits. Lecture: three hours, two semesters.

Prerequisites: E.E. 309, Math. 322.

415,416. *Automatic Control Systems* Three Credit Hours
 Each Semester

Electrical, mechanical, and hydraulic control system components; feedback theory; analysis and design of automatic control systems.

Lecture: three hours, two semesters.

Prerequisites: E.E. 310, Math. 322.

417,418. *Electromagnetic Theory* Three Credit Hours
 Each Semester

Required of Electrical Engineering Seniors.

Vector algebra; electrostatic and magnetostatic fields; Maxwell's equations; boundary conditions; wave propagation and radiation.

Lecture: three hours, two semesters.

Prerequisites: E.E. 309, Math. 322.

419. *System Simulation* Three Credit Hours

A study of simulation methods for physical systems on analog and digital computers.

Lecture: three hours.

Prerequisites: E.E. 309, Math. 322.

420. *Senior Essay* Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

DEPARTMENT OF ENGLISH

Professors: Achurch, Harrison, Doyle, McCoy, McDowell

Associate Professors: Carpenter, Weile

Assistant Professors: Whitney, Morris, Peurifoy, Harvey, MacLeod,
Alexander, Holbein, Mathis, Brennan, Bargainnier, Stutler, Riley,
Halpin, Ashley, Redd

Courses in English composition and literature are required of all freshmen and sophomores, regardless of their major fields of study.

Advanced standing with credits is given entering cadets who complete the College Entrance Board Advanced Placement Test in English with a grade of three or better.

The course of study for the English major is designed to give the student a thorough grounding in the English language and in the literature of England and America and at the same time to give additional breadth to the student's development through prescribed courses in the physical sciences, mathematics, history, a modern foreign language, and selected courses from other departments related to the career or to the field of graduate study the student expects to follow after his graduation.

Since the student majoring in English has the opportunity during his junior and senior years of selecting at least four, and in some

instances five, full-year courses in other specialized fields of study, many students select the English major as a liberal arts background for careers in business, journalism, and creative writing, or for graduate study of business, law, dentistry, theology, and similar fields.

The required courses in the department for the English major are English 203, 204 (The English Language), English 301 (Chaucer), English 400 (Milton), English 401, 402 (Shakespeare), English 403, 404 (American Literature), and English 420 (Senior Essay, a research paper). In addition, the student must elect six semester courses from the department other than English 205, 206, 409, and 410.

The foreign language requirement for the English major is French or German 101, 102, 201, 202. Entering freshmen with two or more units in either of these languages complete their modern language requirement in one year and hence acquire another elective course.

For a tabulation of the requirements for the English major, see "Courses of Study," page 91.

101, 102. *Composition and Literature* Three Credit Hours
Each Semester

Required of freshmen who, on the basis of nationally approved tests, show some real understanding of the fundamentals of English writing. The course stresses the development of the basic skills of writing and reading and of literary evaluations through the study of five types of literature. English 101 is a prerequisite for English 102. Lecture: three hours.

103, 104. *Composition and Literature* Three Credit Hours
Each Semester

Required of freshmen who, on the basis of tests, show a lack of fundamental skills in writing. The same course as English 101, 102, but with an additional class hour each week for teaching fundamentals. English 103 is a prerequisite for English 104. Lecture: four hours.

201, 202. *Major British Writers* Three Credit Hours
Each Semester

Required of all sophomores. A study in depth of major writers in British literature from the medieval period to the present. English 201: Chaucer, Shakespeare, Milton, Pope, and Swift. English 202: Wordsworth, Keats, Tennyson, Browning, Hardy, Yeats, and Eliot. Several themes on the literature studied. Lecture: three hours. Prerequisite: English 101, 102 or 103, 104.

203, 204. *The English Language* Three Credit Hours
Each Semester

Required of sophomores majoring in English. Open as an elective to others.

A survey of the history of the English language, beginning with the Indo-European backgrounds, tracing the development of Old, Middle,

and Modern English through major phonological, morphological, and syntactical changes, with some attention to dialectal variations, and concluding with emphasis on standard and current grammar and usage.

205. *Introduction to Public Speaking* Three Credit Hours

Open to sophomores, juniors, and seniors.

The general principles of speech composition and speech presentation; practice in expository speaking. Lecture: three hours.

206. *Persuasive Speaking* Three Credit Hours

Open to sophomores, juniors, and seniors.

Logic, rhetoric, and psychology of securing desired reactions from friendly, neutral, and hostile audiences; sources of speech material and planning the speech; improvement of volume, diction, rate, and platform manners in extemporaneous and manuscript delivery of classroom speeches. Lecture: three hours.

Prerequisite: Public Speaking 205.

210. *General Semantics* Three Credit Hours

Open to sophomores, juniors, and seniors.

A psychological approach to the study of language as an abstracting process employing a system of verbal symbols for informative, directive, and affective purposes. Lecture: three hours.

Except for Chaucer (301), Milton (400), Shakespeare (401, 402) and American Literature (403, 404), which are offered every year, the followed courses are usually offered in alternate years. Starred courses are offered in 1966-67.

*301. *Chaucer* Three Credit Hours

Required of all English majors. Open as an elective to other juniors and seniors.

An introduction to Chaucer's language, narrative skill, and mastery of poetic forms through reading in the original "The General Prologue" and selected tales from *The Canterbury Tales* and some of the shorter poems. Lecture: three hours.

302. *Seventeenth Century Poetry and Prose* Three Credit Hours

Exclusive of Milton

Open to juniors and seniors.

A study of representative prose prior to the Restoration, of representative poetry of Ben Jonson and his "sons," and of John Donne and the metaphysical poets. Lecture: three hours.

303. *Neoclassicism, 1660-1744* Three Credit Hours

Open to juniors and seniors.

Dryden, Addison, Swift, and Pope, with some attention to the lesser writers of the period. Lecture: three hours.

304. *The Romantic Movement* Three Credit Hours

Open to juniors and seniors.

A study of the chief features which culminated in the Romantic writings of the early nineteenth century, with special emphasis on the five major poets: Wordsworth, Coleridge, Byron, Shelley, Keats. Lecture: three hours.

*305. *Victorian Poetry and Prose* Three Credit Hours
Open to juniors and seniors.

A study of the period from 1830 to 1900, showing the effects of the Industrial and Scientific Revolutions on traditional attitudes toward art and life through the works of the major writers of the period, with emphasis upon the poetry of Tennyson, Browning, and Swinburne and upon the prose of Carlyle, Arnold, Huxley, and Pater. Lecture: three hours.

306. *Modern British and American Poetry* Three Credit Hours
Open to juniors and seniors.

Study of the poetry of Yeats, Robinson, Frost, Eliot, and Auden from as extensive a reading of their work as time permits; lectures planned to provide a foundation for future reading in these five and other poets; term essay and class report on a twentieth-century poet other than the above five, each member of the class studying a different poet. Lecture: three hours.

*307. *A Survey of English Drama to 1890* Three Credit Hours
Open to juniors and seniors.

A tracing of the course of English drama from its origin in medieval times to the beginnings of modern drama in the middle of the nineteenth century; detailed study of representative plays. Lecture: three hours.

*308. *Modern British and American Drama* Three Credit Hours
Open to juniors and seniors.

A detailed study of a few representative plays to show the major trends in British and American drama since the time of Ibsen. Lecture: three hours.

*309. *The Development of the English Novel to 1900* Three Credit Hours

Open to juniors and seniors.

Lectures on narrative forms which preceded the novel and on lives and works of major eighteenth and nineteenth century novelists; reading and discussion of selected novels. Lecture: three hours.

*310. *Modern Novel in English* Three Credit Hours

A course in the reading and critical analysis of selected English and American novels by James, Conrad, Schreiner, Lawrence, Anderson, Lewis, Cather, Hemingway, and Faulkner. A term paper on a novel other than those studied in class. Lecture: three hours.

311. *Advanced Composition* Three Credit Hours
Open to selected juniors and seniors.

The development of effective styles of writing through analysis and imitation of masters of English prose.

Prerequisite: English 202 and departmental approval. Lecture: three hours.

312. *Contemporary British Literature* Three Credit Hours

A study of selected works by major British novelists and poets whose writings are representative of the ideas, literary techniques, and cultural patterns of England and Ireland from World War I to the present. Poets studied: Hardy, Hopkins, Housman, Graves, Spender, Thomas; novelists: Maugham, Joyce, Forster, Huxley, Lawrence, Waugh. Lecture: three hours.

313,314. *Journalism* Three Credit Hours
Each Semester

A study of the fundamentals of journalism and workshops in news-writing, copyreading, feature writing, layout and makeup, and other aspects of journalism. Lecture: three hours.

Prerequisite: English 201, 202 with C average or higher.

*400. *Milton* Three Credit Hours

Required of all English majors. Open as an elective to other juniors and seniors.

A study of *Paradise Lost* entire, of *Samson Agonistes*, and of representative prose works, with special attention to the philosophical content. Lecture: three hours.

*401,402. *Shakespeare* Three Credit Hours
Each Semester

Required of all English majors. Open as an elective to other juniors and seniors.

An intensive study of representative plays—comedies, histories, tragedies, and dramatic romances—to give the student insight into the greatness of Shakespeare as dramatist, poet, and illuminator of life. Lecture: three hours.

*403,404. *American Literature* Three Credit Hours
Each Semester

Required of all English majors. Open as an elective to other juniors and seniors.

A study of some of the best writing done in America from the time of the first settlements to the time of Henry James: the first semester covering writers of the colonial and revolutionary periods and Irving, Cooper, Bryant, Hawthorne, and Poe; the second semester beginning with transcendentalism and concluding with Howells. Lecture: three hours.

405. *Backgrounds of English Literature* Three Credit Hours
Open to juniors and seniors.

An examination of the great literary traditions—epic, lyric, romantic,

dramatic, narrative, philosophical—in the literature of both the Orient and the Occident from the beginnings to the Fifteenth Century with emphasis on their contributions to English literature. Lecture: three hours.

406. *Backgrounds of English Literature* Three Credit Hours
Open to juniors and seniors.

A continuation of English 405. A consideration of great literary traditions from the Fifteenth Century to the present with emphasis on their contributions to English literature. Lecture: three hours.

*407,408, *Principles of Literary Criticism* Three Credit Hours
in English Each Semester

Open to departmental seniors and to any student who has completed two full-year courses in English, or the equivalent, above the sophomore level.

A study of the classical tradition in criticism, the Renaissance restatement, and neoclassic developments; and of the development of modern criticism. Lecture: three hours.

409. *Writing Poetry* Three Credit Hours
Open to juniors and seniors.

Analysis of and practice in writing poetry; varied in accordance with the experience and expectation of the students registered. Lecture: three hours.

410. *Writing the Short Story* Three Credit Hours
Open to juniors and seniors.

Analysis of short stories, followed by practice in writing them. Lecture: three hours.

*420. *Senior Essay* Two Credit Hours
Required of all seniors as a prerequisite to graduation. See page 82.

DEPARTMENT OF HISTORY

Professors: Anger, Phillips, Lee, Martin

Associate Professor: Addington

Assistant Professors: Fortunato, Goodhart, Coussons, Nichols, Devine,
John, Harris

The Department of History endeavors to give to the student an acquaintance with and an appreciation of our heritage; to enable him to see causes and effects, contrasts and comparisons as shown in the development of civilization; to give him an accurate knowledge of the history of his own country and to familiarize him with its institutions and the democratic ideals which have influenced American life; to acquaint the student who elects this subject with the standard works in its various fields and to prepare him to pursue graduate and professional studies.

A graduate with a major in history will, with his twenty-one hours of selected electives, be well-qualified not only for the responsibilities of citizenship but will also have the broad background necessary for a successful career in business, law, the armed services, the church, and certain fields of science.

Students electing history as a major are required to take in addition to the freshman survey (History 101, 102) the following courses:

History 201, 202; History 301, 302; and a total of twenty-one semester hours selected from the junior and senior courses offered by the department. They are also required to take two years of a modern language, Economic Origins, Principles, and Problems, American Government, and either International Politics or Constitutional Law. Juniors majoring in History are required to take either History 303, 304; History 305, 306, or History 313, 314. For further details see the tabulation of the curriculum for a History Major, page 92.

Courses marked with an asterisk () are usually offered in alternate years or on demand.*

101, 102. *A Survey of American History* Three Credit Hours
Each Semester

Required of all cadets either in their freshman and/or sophomore year.

Survey of American history from the period of discovery to the present; a brief treatment of the colonial period, followed by a more detailed study of such subjects as the causes of the Revolution, the framing of the Constitution, the development of political parties, the sectional conflict, economic progress and problems, and foreign relations; special emphasis placed on understanding the nature of American democracy and the role of the United States in world affairs from 1789 to the present.

201, 202. *A Survey of European Civilization* Three Credit Hours
since 1500 Each Semester

Required of sophomores majoring in history, political science, education, English, and modern languages. The historical background of contemporary civilization, emphasis on movements and developments of enduring significance; the evolution of national states; the growth of representative and democratic institutions of government; the development of modern capitalism; the origins of current international conflicts; the progress of science, art, and literature.

301, 302. *History of England* Three Credit Hours
Each Semester

Required of all History majors.

A survey of English history from earliest times to the present. Special attention is given the formation of the English people, the continuity of their social and political experience, and the English legacy to Americans. The institutional development of parliament, monarchy, legal system and local government is constantly viewed against the changing background of society and economic activity.

303, 304. *The United States since 1900* Three Credit Hours
Each Semester

American social, cultural, economic, and political development in the twentieth century; emphasis on the increasing importance of the United States in world affairs and significant political and economic changes.

- *305, 306. *European History since 1870* Three Credit Hours
Each Semester

A study of the development of liberalism and democracy in Western Europe; international politics and the revival of imperialism; the origins of World War I; efforts toward international organization and collective security; the rise of totalitarian states and their aggression; World War II and its aftermath, the Cold War.

- *307. *Studies in Biography* Three Credit Hours
The study of significant personalities in European or American history; lectures, reports, and discussion.

- *309. *The American Civil War and Reconstruction* Three Credit Hours

Emphasis on the political, economic, and social developments of the period, with some attention to the military aspects of the war.

- *310. *The Era of the French Revolution and Napoleon* Three Credit Hours

A survey of the Old Regime and the causes of the Revolution, followed by an examination of the principal events of the period, stressing the innovations of the Revolutionary governments, the causes of Napoleon's rise to power, his achievements in France and in Europe, the reasons for his eventual downfall.

- *311. *The Old South* Three Credit Hours
The political, social, and economic characteristics of the South before 1860 with emphasis on the role of this area in the national scene.

- *312. *The New South* Three Credit Hours
The political, economic, and social development of the South since 1877; emphasis on contemporary regional problems and their impact on American life.

- *313, 314. *Social and Intellectual History of the United States* Three Credit Hours
Each Semester

A survey of American social and cultural developments and their relationship to each other. Emphasis will be upon the intellectual aspects of American life and their impact upon society as a whole.

- 315, 316. *History of Modern Warfare* Three Credit Hours
Each Semester

A survey of the development of modern warfare, emphasizing the impact of social, economic, political, and technological forces upon military theory and practice.

Seniors majoring in History are required to take either History 401, 402, History 403, 404 or History 409, 410.

- *401, 402. *History of American Diplomacy* Three Credit Hours
Each Semester

An examination of the heritage, fundamental principles, and progress-

sive development of American foreign policy from colonial times to the present.

- *403, 404. *Latin American History* Three Credit Hours
Each Semester

Survey of the economic, cultural, and political development of Latin America; study of the nations as a unit, with special attention to the individuality of each; concentration by each student in his collateral reading on some one country.

Seniors majoring in history are required to take either History 405, 406 or History 407, 408.

- 405, 406. *History of Colonial America* Three Credit Hours
Each Semester

A more detailed treatment of the foundations of American civilization than in History 101; the motives of colonization, the evolution of self-government, the extension of the frontier; economic, social, and religious life, the causes of the Revolution, the problems of the Confederation.

- 407, 408. *History of the Ancient World and the Middle Ages* Three Credit Hours
Each Semester

The Ancient World in the first semester, the Middle Ages in the second: a survey of the history of the Greeks, the Romans, and the people of the Middle Ages, their wars and political institutions, their economic and social life, their cultural and intellectual achievements.

409. *History of the Far East in Modern Times* Three Credit Hours
A survey of the Far East from the first contacts with the West to the present.

410. *History of Modern Russia* Three Credit Hours
A survey of Russian society, politics, and culture from the early modern era to the present. Intensive treatment beginning with the Great Emancipation through the twentieth-century revolutions and the consolidation of Soviet rule.

- *411. *South Carolina History* Three Credit Hours
A survey of the political, economic, social, and intellectual developments of South Carolina from its discovery to the present, with emphasis on the relation of the state to the South and to the nation.

420. *Senior Essay* Two Credit Hours
Required of all seniors as a prerequisite to graduation. See page 82.

Geography

309. *Elementary Geography* Three Credit Hours
An introductory course dealing primarily with the elements and principles of geography. Familiarity with important global features and locations is stressed. Topics include: maps, oceans, atmosphere and winds, climate (elements and patterns), landforms, soils and agriculture, mineral resources and industry.

*310. *Cultural Geography*

Three Credit Hours

An application of geographic principles to human activities in selected regions of the world. Cultural patterns are contrasted and compared in the light of the physical environment.

*311. *Economic Geography*

Three Credit Hours

The geographic foundations and distribution of economic activities in different parts of the world.

*312. *Historical Geography*

Three Credit Hours

A survey of geographic influences in prehistory and history. Various theories of geographical determinism are evaluated against the backdrop of historical realities.

DEPARTMENT OF MATHEMATICS

Professors: Reves, Dye, Hutchison

Associate Professors: Sutton, Thompson, Brown

Assistant Professors: Hull, Crumley, Kirkland, Hill, McIntyre, Ingraham, Roughton, Hathaway

The stated purpose of The Citadel is the training of young men for service to their country as civilian leaders or as officers in the armed forces, if the need arises. To meet the demands of this modern scientific age such a program of education must include basic studies in chemistry, physics, and mathematics. To this end all students at The Citadel are required to take at least one year of mathematics. In the science and engineering majors two or more years of mathematics must be scheduled.

There is today an ever-increasing demand for college graduates trained in mathematics, on the part of government and industrial laboratories as well as schools and colleges. At The Citadel, students who elect mathematics as a major field of study have 33 semester hours of electives in related fields of their choice and 44 semester hours of mathematics. The mathematics courses required in the junior and senior years are Advanced Calculus (321-322), Senior Essay (420), and 18 additional semester hours of courses numbered in the

three and four hundred range with the exception of Number Theory (309) and History of Mathematics (310). These two courses may, however, be taken as electives.

The customary mathematical techniques are developed in all the courses of the department, but students are encouraged to obtain results through reasoning processes rather than by stereotyped use of formulas.

101, 102. *Fundamental Mathematics* Three Credit Hours
Each Semester

Required of all Arts freshmen.

A modern treatment of the essential topics of college algebra and trigonometry including the elementary theory of sets, vectors, and matrices.

111. *College Algebra* Three Credit Hours
Offered on demand.

A brief review of elementary algebra is followed by the study of the binomial theorem, progressions, theory of equations, and determinants. Prerequisite: Two years of high school algebra.

112. *Trigonometry* Three Credit Hours
Offered on demand.

Definition and applications of the trigonometric functions; identities; equations; solution of right and oblique triangles. Prerequisite: Two years of high school algebra.

119. *College Algebra and Trigonometry* Five Credit Hours
Required of all Physical Science and Engineering freshmen.

A modern treatment of the essential topics of college algebra and trigonometry including the elementary theory of sets, vectors, and matrices.

121, 122. *Analytic Geometry and Calculus* Five Credit Hours
Each Semester

Required of all Physical Science and Engineering majors.

A unified treatment of the theory and applications of plane analytical geometry and the differential and integral calculus of functions of one variable.

Prerequisite: Mathematics 119 or Mathematics 101, 102.

201, 202. *Introduction to Calculus and* Three Credit Hours
Analytic Geometry Each Semester

Offered on demand.

A basic course in the calculus designed to provide a background for an understanding of the mathematics essential in the fields of modern social science and education. Fundamental ideas are emphasized so that some skill in the formation of new problems in the language of mathematics may be acquired.

Prerequisite: Mathematics 111, 112 or their equivalent.

220. *Intermediate Calculus*

Five Credit Hours

Required of all Chemistry, Physics, Mathematics, and Engineering majors.

The analytical geometry of three dimensions; the differential and integral calculus of functions of two or more variables; differential equations of the first order and degree; linear differential equations; with constant coefficients; miscellaneous differential equations; applications.

Prerequisite: Mathematics 121, 122.

Starred courses are offered in 1966-67.

301. *Introduction to Set Theory*

Three Credit Hours

Offered on demand.

The notation and terminology of sets; the algebra of sets; relations and functions.

Prerequisite: Mathematics 111, 112 or their equivalent.

302. *Introduction to the Theory of Matrices*

Three Credit Hours

Offered on demand.

The interpretation and applications of matrix theory are presented as an essential phase of the algebra of matrices.

Prerequisite: Mathematics 111, 112 or their equivalent.

*303, 304. *Modern Algebra*

Three Credit Hours

Each Semester

Structure of the number system; integral domains; fields; groups; vector spaces; matrices; determinants.

Prerequisite: Mathematics 220.

305, 306. *Modern Geometry*

Three Credit Hours

Each Semester

Special topics from axiomatic geometry; Euclidian geometry; projective geometry; non-Euclidean geometry; metric projective geometry; topology.

Prerequisites: Mathematics 119 or 101, 102.

307, 308. *Projective Geometry*

Three Credit Hours

Each Semester

Homogeneous point and line coordinates; principles of duality; cross ratio; projective forms; the conics and their properties.

Prerequisite: Mathematics 220.

*309. *Number Theory*

Three Credit Hours

The Euclidean Algorithm; prime and composite integers; elementary Diophantine equations; Pythagorean triples; Euler's phi-function; congruences; Euler-Fermat theorems; exponents and primitive roots; quadratic residues.

Prerequisite: Freshman Mathematics and the approval of the department head.

*310. *History of Mathematics*

Three Credit Hours

A survey of the development of mathematics from the time of the

ancients to the present; analysis of causes for the retardation of the advancement of mathematics in different centuries; selected readings from significant areas of mathematics used to show the contributions of mathematics to the development of science.

Prerequisite: Freshman Mathematics and the approval of the department head.

*321, 322. *Advanced Calculus* Three Credit Hours
Each Semester

Required of all Physics, Mathematics, and Electrical Engineering majors.

Vector calculus; Bessel's functions; partial differential equations, Fourier series; LaPlace transforms; functions of a complex variable. Prerequisite: Mathematics 220.

403, 404. *Functions of a Complex Variable* Three Credit Hours
Each Semester

Real and complex numbers; differentiation and integration of a function of a complex variable; mapping; the linear fractional transformation; infinite series; properties of single-valued and multiple-valued functions. Prerequisite: Mathematics 321, 322.

405, 406. *The Mathematical Theory of Statistics* Three Credit Hours
Each Semester

Frequency distribution; averages; measures of dispersion; correlation; probability; the normal curve; theory of sampling. Prerequisite: Mathematics 321, 322.

*407, 408. *Numerical Analysis* Three Credit Hours
Each Semester

Roots of equations; calculus of finite differences; interpolation formulas; numerical differentiation and numerical integration; numerical solution of ordinary differential equations; simultaneous equations and determinants.

Prerequisites: Mathematics 321, 322, E.E. 203.

*409, 410. *Topology* Three Credit Hours
Each Semester

Sets and functions; metric spaces; topological spaces; compactness; separation; connectedness; Banach spaces; Hilbert spaces.

Prerequisite: Mathematics 303, 304.

415, 416. *Reading Courses* Three Credit Hours
Each Semester

Directed reading on assigned topics in mathematics; weekly conferences with the instructor; a term paper.

Prerequisite: Exceptional ability and background, and approval of the department head.

*420. *Senior Essay* Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

DEPARTMENT OF MILITARY SCIENCE

Professor (acting): Zolner

Associate Professor: Cofield

Assistant Professors: Chandler, Fox, Greer, Patterson, Thompson, Weiskirch, Motley

The four-year General Military Science Course of Army ROTC is designed to offer instruction in subjects common to all branches of the U. S. Army. Many of the subjects taught in this department, however, have a close relationship to subjects taught by other departments in the school; such as, U. S. Army and National Security, American Military History, Military Law, and The Role of the United States in World Affairs. In addition, the Department of Military Science organizes and supervises all Army ROTC activities at The Citadel.

The objective of the United States Army Detachment at The Citadel is to provide military science instruction to develop the qualities and attributes required by successful reserve or regular officers of the United States Army. As a result of this instruction, The Citadel cadet receives not only an academic education but a well-rounded background including the best features of the military: a high sense of honor and duty, self discipline, personal integrity, and the ability to lead men. This training provides The Citadel graduate with the high

personal standards and character traits that are continually demonstrated by Citadel Alumni as leaders in the armed services, or in their civilian community.

The four-year course is divided into a Basic Course and an Advanced Course. The first two years comprise the Basic Course, and the last two years, including a six-week summer encampment at a U. S. Army Installation, comprise the Advanced Course. Credit for prior military training may be granted, if appropriate, but the new cadet must report such training to the Military Department as soon as possible on his arrival. Although all students are required by school regulations to take four years of ROTC, not all cadets qualify for commissions in the Armed Forces.

Formal Enrollment Requirements

The basic requirements for formal enrollment in Army ROTC are shown below. These must be fully met before the Professor of Military Science can consider a cadet for formal enrollment in the Army program. Cadets who do not meet these requirements are not entitled to ROTC allowances and will be ineligible for a commission.

Be a citizen of the United States.

Be physically qualified under Department of the Army standards. For the Basic Course, a statement by The Citadel Surgeon that a cadet can perform "normal military duties" usually suffices. An Army-administered physical examination, required for formal enrollment in the Advanced Course, is given to all third classmen (sophomores) in the spring. Waivers of physical defects are granted only in exceptional cases, and then only by authority of the Department of the Army. Any degree of uncorrected vision is acceptable provided visual acuity is correctable to 20/40 in one eye, and 20/70 in the other eye, to 20/30 in one eye and 20/100 in the other eye, or to 20/20 in one eye and 20/400 in the other eye. Both eyes must be free from any disfiguring or incapacitating abnormality and from acute or chronic disease.

Maintain satisfactory academic standards with his class.

Maintain a satisfactory leadership rating. This rating is determined by the Commandant of Cadets, the Professor of Military Science, and other appropriate Citadel officials.

Be of good moral character. Cadets convicted by civil or military court for offenses other than minor traffic violations are not eligible for formal enrollment without specific approval of the Department of the Army. A cadet may apply for a waiver of conviction, provided the offense was non-recurring and did not involve moral turpitude.

Pass ROTC Qualifying Examination. This examination is administered during the third-class year. Failures cannot be formally enrolled unless a waiver is received, and these are granted only in exceptional circumstances. No repeat examinations are authorized.

Pass Physical Fitness Test. The physical fitness tests administered by the Physical Education Department will be used as basis for determining eligibility for enrollment. The fundamental requirement is that any cadet competing for an Army Commission must meet the physical fitness requirements established for active duty officers.

Advanced Course

Formal enrollment in the Advanced Course involves both signing a contract with the Government and enlistment in the U. S. Army Reserve. Under the terms of the contract, the signer agrees to accept a commission if it is offered and to serve on active duty for two years or six months, depending upon the needs of the Army. (Current legislation at the time of publication of this bulletin has temporarily suspended the six-month period of active duty, but this may be reinstated at a later date.) As long as the cadet continues his enrollment in the advanced course, he will not be required to participate in Reserve training nor will he be ordered to active duty for training or active duty. If as a result of willful evasion of the terms of his advanced course contract he does not complete the Senior Officers' Training Corps program or if he completes the course of instruction and declines to accept a commission when offered, the cadet may be ordered to active duty in his enlisted grade for not more than two years. Disenrollment by reason of physical or academic deficiency is not construed as "willful evasion," and in such cases, disenrolled cadets will not be ordered to active duty under the terms of their contract.

Army Aviation Flight Training

A small number of first classmen (seniors), selected after a highly competitive physical, mental, and leadership evaluation, will be permitted to participate in the Army Flight Training Program as part of their ROTC instruction. This program is extracurricular and serves to motivate students to seek a career in Army Aviation, and also serves as a program for screening applicants for Army Aviation training. The program consists of approximately seventy-one hours of ground and flight instruction. Students may be awarded the Federal Aeronautical Agency private pilot's certificate upon completion of this training.

Emoluments

The Department of the Army provides certain reimbursements to cadets enrolled in the Army ROTC program. Those cadets enrolled in the Basic Course will have \$42 uniform allowances credited to their account each year. Those cadets formally enrolled in the Advanced Course (which includes signing a contract with the Government and enlistment in the Army Reserve) will have \$100 uniform allowance credited to their account each year in addition to \$40 subsistence allowance each month. During their summer camp they

will receive one-half the base pay of a second lieutenant plus \$0.06 per mile travel pay to and from camp.

Those cadets who are attend The Citadel on an Army scholarship (two year or four year) are paid \$50 each month for subsistence in addition to tuition and other fees.

Distinguished Military Students

Certain cadets who, at the start of their first-class (senior) year, have clearly demonstrated high moral character and outstanding leadership and academic ability may be selected as Distinguished Military Graduates and have the option of applying for direct appointment in the Regular Army.

Course of Instruction

MS 101, 102. *First Year Basic* (Freshman Year) Two Credit Hours

This course is designed to provide the student with the fundamentals and background necessary to pursue later courses of military instruction. In the first semester, the student receives instruction on the weapons of the infantry platoon and company to include marksmanship training on the school's indoor and outdoor ranges. Later in the semester he learns the organization of the Army from the squad to the division. During the second semester, the freshman learns the relationship between the U. S. Army and the other services and the national government, the organization of the Department of Defense, its relationship to national policy making, and how policy is translated and transmitted to action units in the armed forces. The student receives a minimum of two academic hours per week during the academic year.

MS 201, 202. *Second Year Basic* Two Credit Hours
(Sophomore Year)

The sophomore course provides a continuation of instruction in fundamentals, a military history course that reviews American history with emphasis on political and military aspects, and an introduction to Army operations and basic tactics. The American military history course is a study of the causes of and wars of the United States and the strategy and tactics involved. During this course the student analyzes the different battles utilizing established military principles and determines the lessons to be learned from them. During the second semester the student is introduced to map and aerial photograph reading, one of the basic tools of a military leader, and begins his study of military tactics by learning the tactics employed by the basic Army unit, the squad.

MS 301, 302. *First Year Advanced* Three Credit Hours
(Junior Year)

The Courses presented in the junior year include military leadership and instructor's training, a study of the different branches of the U. S.

Army, communications and counterinsurgency instruction, and a detailed study of small unit tactics. The military leadership and military instructor's training presents the principles involved and requires the student to act as a small unit leader in practical exercises and to present military instruction to his class. During the spring semester the students participate in field training exercises that provide the opportunity for the student to apply the leadership principles and tactical training he has received in the classroom. The field training and classroom instruction during the spring semester prepare the student for the training he will receive during his six weeks summer encampment.

MS 401, 402. *Second Year Advanced*
(Senior Year)

Three Credit Hours

During the senior year the student gets detailed instruction in the fields of administration, operations, logistics, and military law, continues his leadership training, and studies the role of the United States in world affairs. In addition, he reviews map reading and receives an orientation on military service to prepare him to take his place as an officer in the U. S. Army. The subjects during this last year of ROTC are designed to provide the student with the basic knowledge and techniques utilized by the junior officer in carrying out his duties and responsibilities. He learns the latest Army regulations and their application to the military unit, and he participates in practice courts which require him to function as a member of a court in a court martial. In his study of the role of the United States in World Affairs, the student receives an orientation in geographical and economical factors, their influence on the division of people into nations, and the causes of war. The course orienting the student on military service teaches him the customs of the service, conduct and code of the officer corps, responsibilities and obligations of an officer, and the Army Career Management Program as it pertains to the officer.

DEPARTMENT OF MODERN LANGUAGES

Professors: Van D'Elden, H. D. G. Smith

Associate Professors: R. L. Smith, Pappas

Assistant Professors: Brown, Mattos, Warren, Pieper, Aldrich, Crespil,
DeMille

Instructors: Frohlich, Gundel

A student majoring in Modern Languages must attain a thorough knowledge of one language, spoken and written, a reasonable degree of competence in a second, and a good understanding of the important writers, the literary developments, and the cultures which these languages represent. Upon successful completion he is prepared to do graduate work in the language chosen for his major work.

In a world being rapidly drawn together by improved means of communication, yet with its parts still sharply differentiated in language, customs, and ways of thinking, the ability to communicate directly with speakers of other languages has become increasingly important. A premium is placed upon it by industry and in government service.

The five modern languages offered by the department are among the most important because of the wealth of material, both literary and scientific, which has been published in them, and because of the

fact that most educated individuals, no matter what their mother tongue may be, are fluent in either English or one of these five.

Students who elect languages as their major field must satisfactorily complete eight courses in language, including, for one language, at least two courses above the intermediate level. They must complete the Survey of either French Literature, German Literature, or Spanish Literature. The exact sequence of their courses may vary according to the language chosen for their major work and the point at which their college work in languages was begun. Students wishing to take a language course as an elective may take any course for which they have done the prerequisite work.

The Language Laboratory constitutes an integral part of the Elementary and Intermediate Courses in the Department of Modern Languages. It provides intensive practice in speaking, listening and understanding by means of tape recordings designed to provide greater oral-aural facility in the various modern foreign languages offered. Exercises in the laboratory are closely integrated with classroom work.

In courses above the intermediate level, the work of each semester is a unit, and credit will be given for its successful completion.

French

101, 102. *Elementary French* Three Credit Hours
Each Semester

For students who elect French and have entered The Citadel with less than two units of the language.

Pronunciation and elements of French grammar; written and oral exercises; laboratory exercises.

201, 202. *Intermediate French* Three Credit Hours

For students who have completed French 102, or have entered The Citadel with two or three units of the language.

Composition and conversation based on the reading material; grammar review to correct faults in usage; laboratory exercises.

301, 302. *Introductory Survey of French Literature* Three Credit Hours
Each Semester

A general survey of French Literature from its beginnings to the present time; extensive reading, reports, discussion in French.

Prerequisite: French 202.

305, 306. *Advanced French Composition and Conversation* Three Credit Hours
Each Semester

Advanced instruction in the practical use of French, stressing current topics of interest and striving for oral and written fluency. Emphasis on rapid reading of more difficult prose than in the earlier courses, on the development of style, and, in 306, on the cultural development of French speaking countries, their history, life and thought.

Prerequisite for French 305: French 202 or permission of the department head.

Prerequisite for French 306: French 305 or permission of the department head.

403, 404. *Eighteenth Century French Literature* Three Credit Hours
Each Semester

Political and philosophical thought in the eighteenth century, traced through the writings of Montesquieu, Voltaire, and Rousseau; the beginnings of Romanticism as shown in Rousseau and other writers; lectures in French; collateral readings and reports.

Prerequisite: French 202.

405, 406. *The Classical Period of French Literature* Three Credit Hours
Each Semester

The literature of the seventeenth century, that of France's most distinctive and in many respects finest contribution to the world's literature and culture; special attention given to the plays of Corneille, Racine, and Molière.

Prerequisite: French 202.

407, 408. *Nineteenth Century French Literature* Three Credit Hours
Each Semester

French literature from Chateaubriand to Zola and Anatole France; the Romantic, realistic, and naturalistic movements, with special emphasis on Balzac, Hugo, and Flaubert; lectures in French, discussion, outside reading.

Prerequisite: French 202.

German

101, 102. *Elementary German* Three Credit Hours
Each Semester

For students electing German and having entered The Citadel with less than two units of the language.

Pronunciation and the elements of German grammar; written and oral exercises; laboratory exercises.

201, 202. *Intermediate German* Three Credit Hours
Review of elementary grammar; reading of texts from German literature; conversation in German; laboratory exercises.

Prerequisite: German 102 or two entrance units.

203, 204. *Scientific German* Three Credit Hours
Each Semester

For students taking the chemistry, physics, or pre-medical course. First-year grammar study continued; translation of texts in various sciences; special stress on sentence structure and word-building.

Prerequisite: German 102 or two entrance units.

301, 302. *Introductory Survey of German Literature* Three Credit Hours
Each Semester

Open to students who have completed German 202.

A general survey of German Literature from its beginnings to the

present time; extensive reading, lectures, reports, discussion in German.
Prerequisite: German 202.

303, 304. *German Literature of the Nineteenth Century* Three Credit Hours
Each Semester

Representative works of outstanding poets, novelists, and dramatists, with discussion of the literature of the period; assigned reading and reports. Prerequisite: German 202.

305, 306. *Advanced German Composition and Conversation* Three Credit Hours
Each Semester

Advanced instruction in the practical use of German, stressing current topics of interest and striving for oral and written fluency. Emphasis on rapid reading of more difficult prose than in the earlier courses, on the development of style, and, in 306, on the cultural development of German speaking countries, their history, life, and thought.

Prerequisite for German 305: German 202 or permission of the department head.

Prerequisite for German 306: German 305 or permission of the department head.

401, 402. *Goethe's Faust* Three Credit Hours
Each Semester

Goethe's greatest drama, *Faust*, studied in connection with his life and with regard to his message today; its genesis and growth; reading and discussion of Part I and Part II; *Faust das Puppenspiel* and its relation to Goethe's *Faust*; lectures, reading, and reports.

Prerequisite: German 202.

Portuguese

(Offered when demand justifies)

101, 102. *Elementary Portuguese* Three Credit Hours
Each Semester

Pronunciation and the elements of Portuguese grammar; written and oral exercises; laboratory exercises.

201, 202. *Intermediate Portuguese*

Completion and review of elementary grammar; reading of literary texts; conversation in Portuguese; laboratory exercises.

Prerequisite: Portuguese 102.

Russian

101, 102. *Introductory Russian* Three Credit Hours
Each Semester

Pronunciation and elements of Russian grammar; written and oral exercises; laboratory exercises.

201, 202. *Intermediate Russian* Three Credit Hours
Each Semester

A continuation of Russian 101, 102, with emphasis on vocabulary

building, the development of reading skill, and conversation; laboratory exercises. Offered when demand justifies.

Prerequisite: Russian 102.

Spanish

101, 102. *Elementary Spanish* Three Credit Hours
Each Semester

For students electing Spanish and having entered The Citadel with less than two units of the language.

Pronunciation and elements of Spanish grammar; written and oral exercises; laboratory exercises.

201, 202. *Intermediate Spanish* Three Credit Hours
Each Semester

A course to develop further the general understanding of the language, oral and written; review of grammar; reading of literary texts; laboratory exercises. Prerequisite: Spanish 102 or two entrance units.

*301, 302. *Introductory Survey of Spanish Literature* Three Credit Hours
Each Semester

A general survey of Spanish Literature from its beginnings to the present time; extensive reading, reports, discussion in Spanish.

Prerequisite: Spanish 202.

*303, 304. *Spanish-American Literature* Three Credit Hours
Each Semester

Leading works from Mexico and Central and South America, with both individual and class reading; reports; discussion in Spanish.

Prerequisite: Spanish 202.

305, 306. *Advanced Spanish Composition and Conversation* Three Credit Hours
Each Semester

Advanced instruction in the practical use of Spanish, stressing current topics of interest and striving for oral and written fluency. Emphasis on rapid reading of more difficult prose than in the earlier courses, on the development of style, and, in 306, on the cultural development of Spanish speaking countries, their history, life and thought.

Prerequisite for Spanish 305: Spanish 202 or permission of the department head.

Prerequisite for Spanish 306: Spanish 305 or permission of the department head.

*401, 402. *Spanish Literature of the Golden Age* Three Credit Hours
Each Semester

Literature of the late sixteenth and seventeenth centuries; the age producing the characters of Don Quixote and Don Juan; a study of the works of Cervantes, Lope, Tirso, Calderon, and others; reports; discussion in Spanish.

Prerequisite: Spanish 202.

All Modern Languages

420. *Senior Essay* Two Credit Hours
 Required of all seniors as a prerequisite to graduation. See page 82.

421, 422. *Advanced Individual Reading Course* Three Credit Hours
 Each Semester
 Open to seniors only, and only with permission of the department head.

Classical Languages

(Offered when demand justifies)

101, 102. *Elementary Greek* Three Credit Hours
 Each Semester

Fundamentals of the Greek language.

Recommended for students preparing for the study of medicine or theology.

201, 202. *Intermediate Greek* Three Credit Hours
 Each Semester

Selections from Xenophon or the New Testament.

Prerequisite: Greek 101, 102.

101, 102. *Elementary Latin* Three Credit Hours
 Each Semester

Latin grammar and translation. Course dependent upon the background of the student.

Recommended for pre-law students.

201, 202. *Intermediate Latin* Three Credit Hours
 Each Semester

Translation from Latin prose writers.

Prerequisite: Latin 101, 102 or two entrance units.

DEPARTMENT OF PHYSICAL EDUCATION

Professor: Dellastatious

Associate Professor: Feigl

Assistant Professors: Oshel, Cook, Dillman, Smyth, Stewart

The purpose of the Department of Physical Education is threefold:

(1) Professional Physical Education Program: Prepare and qualify Physical Education majors for secondary-school teaching in the fields of physical education, athletics, and a selected minor.

(2) Required Physical Education Program: Organize and administer a four-year required physical education program for the Corps of Cadets.

(3) Intramural Program: Organize and administer a voluntary intramural program for the Corps of Cadets during their free time.

The Physical Education Major

The Department of Physical Education-Intramural Athletics requires the following physical education courses for its physical education majors:

201. *Introduction to Physical Education*

Three Credit Hours

An introductory survey of physical education; historical background, nature, scope, and function of physical education; its aims, objectives, and principles.

204. *Individual and Dual Sports* Three Credit Hours
Teaching methods with applied techniques in golf, badminton, handball, and wrestling.

301. *Personal and Community Health* Three Credit Hours
A body of knowledge from the biological and social sciences which is essential for sound decisions in health maintenance and conducive to proper sense of health values for the individual and the community.

303. *Basketball* Two Credit Hours
Comparative study of defensive and offensive systems of team play; development of basic individual skills and techniques; teaching and coaching; rules and officiating. Lecture: one hour a week; laboratory: two hours a week.

308. *Gymnastics and Tumbling* Two Credit Hours
Theory and practice of gymnastics, tumbling, and developmental activities with respect to teaching methods, skills, and the conduct of gymnastic meets. Lecture: one hour; laboratory: two hours.

401. *Organization and Administration of Physical Education* Three Credit Hours
Organization: delegation of authority and responsibility; use of the democratic method; formation of teams, tournaments, and leagues; program aims and objectives; curriculum building; course construction; lesson planning.

Administration: selection, purchase, and care of equipment; office policies and systems; budgeting in finances; publicity; team and game management.

404. *Individual Physical Education* Three Credit Hours
Principles and practices in the conditioning and care of athletics. Prevention and care of injuries, first aid, kinesiological analysis of the body, corrective exercise for the physically handicapped student.

405. *Health Education* Three Credit Hours
Organization and administration of a school health program with specific attention to methods and techniques of health instruction.

406. *Spring Sports* Three Credit Hours
Theory and practice in the fundamentals of teaching and coaching baseball, track, soccer, and tennis. Administration and execution of meets and tournaments. Lecture: two hours; laboratory: two hours.

407. *Football Theory* Two Credit Hours
Analysis and evaluation of offensive and defensive tactics, formations, and plays; individual techniques and fundamental skills in position play; teaching materials and methods; coaching; rules and rule interpretations.

412. *Tests and Measurements in Physical Education* Two Credit Hours
The place and importance of tests and measurements in the physical

education teaching process; the use of scientific measurement now available in physical education.

414. *Kinesiology*

Two Credit Hours

The anatomical and mechanical analysis of functional posture and motor performance (physical skills), for the purpose of understanding and recognizing normal and faulty movement as based on the latest available scientific information.

Prerequisite: Biology 303.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

Required Physical Education

All cadets are required to participate actively in the required physical education program during the freshman and sophomore years. A second classman is required to meet his RPE obligation through a prescribed voluntary program. Seniors who fail the fall physical fitness test are required to participate in the RPE program.

FOURTH CLASS (*Freshmen*):

1. *Swimming Test*

Prior to registration, all freshmen must take a swimming test which consists of swimming 100 yards without stopping. Throughout this test a swimmer must execute proficiently any two fundamental swimming strokes and proper breathing techniques. All freshmen who fail the swimming test will be assigned to a beginning swimming class for a five week period some time during the freshman year. If at the end of this period a cadet fails the test a second time, his name will be put on a probational swimming roll. He will then have until the fall of his junior year to pass the swimming test. A re-test can be arranged at any time during a semester by contacting the Physical Education Department for an appointment. If a cadet does not meet this requirement, he will be required to enroll in a special swimming class during his junior year.

2. *RPE Activities*

All fourth classmen must enroll and participate in four of the following activities:

- A. Wrestling
- B. Gymnastics
- C. Track and Field
- D. Physical Conditioning (required of all fourth classmen)
- E. Cadetball
- F. Survival Swimming (required of all fourth classmen unless they can present active Red Cross Instructors certificate)
- G. Basketball

Two classes a week.

THIRD CLASS (*Sophomores*):

All third classmen must enroll and participate in four of the following activities:

- | | |
|--------------|---------------------|
| 1. Archery | 7. Judo |
| 2. Badminton | 8. Paddle Rackets |
| 3. Bowling | 9. Scuba Diving |
| 4. Fencing | 10. Tennis |
| 5. Golf | 11. Volleyball |
| 6. Handball | 12. Weight Training |

If a cadet wishes to repeat one of the above activities the second semester, he may do so provided he is not classified as skilled in that particular activity, and there is room for a repeater. One class a week.

Sophomore Required Physical Education Exemption Program

Sophomores wishing to waive the Sophomore R.P.E. requirement may do so by passing a proficiency test, which consists of two parts, a written test and a performance test. A student must score a passing grade (C or higher) on the written test in order to be proficient. Only after passing the written test on the sport-activity can the student participate in the performance test.

In order to be exempt from Sophomore R.P.E. 201, 202 or both, a student must pass a written and performance test in *two sports-activities* (which are taught in the Sophomore R.P.E. program) for each semester requirement or part of a semester requirement. For example, a student wishing to be exempt from one semester or part of a semester requirement of Sophomore R.P.E. would be required to show proficiency in two sophomore sports-activities. Four sophomore sports-activities would exempt the student from the Sophomore R.P.E. requirement.

Sophomores wishing to use the R.P.E. Exemption Program should register for the program at the beginning of each semester in the Physical Education Department.

Intramural Program

The intramural program is voluntary and consists of seventeen different activities. These activities range from individual to team sports, and lead to physical and mental fitness. Some team activities have been separated for freshman and upperclass participation to give all cadets an opportunity to engage in the more vigorous competitive sports.

Participation will lead not only to the desired leadership qualities, but also to the development of "esprit de corps." The wide variety of activities gives a cadet ample opportunity to develop necessary

skills that will enable him to participate in an activity many years after graduation.

Fall

Flag football
Volleyball
Tennis
Handball (doubles)
Bowling (upper-
classmen)
Basketball (freshmen)
Steeplechase
Table tennis
Track

Winter

Bowling (freshmen)
Basketball (upper-
classmen)
Wrestling
Basketball free throw

Spring

Handball (singles)
Swimming
Softball
Sigma Delta Psi
Gymnastics
Weight lifting

DEPARTMENT OF PHYSICS

Professors: Hanson, Bender

Associate Professor: Johnson

Assistant Professors: Baily, Meeks, Voegeli, Byrne, Darmody, Byrd

Instructor: Hines

It is the purpose of the Department of Physics to offer to all students at The Citadel a fundamental course in one of the basic physical sciences, and to offer to students specializing in other departments such advanced courses in physics as are necessary to meet their needs. To students taking their major work in the department, it offers a program of courses sufficient to enable them to enroll as graduate students in full standing at the leading universities, or to fill positions as physicists in the government service and in industrial laboratories.

The rooms of the department are located in the east wing of Bond Hall. On the first floor is a large, air-conditioned laboratory for advanced physics courses, a photographic dark room, and a machine shop for instrument repair and maintenance. A room containing D. C. generators and the main electric switchboard is also located on this floor. On the second floor are a large air-conditioned lecture room seating 110, four smaller lecture rooms, two of which are air-conditioned, one classroom, and two laboratories for elementary physics. Ad-

ditional laboratories, two of which are air-conditioned, are located on the third floor. At all lecture desks and laboratory tables, electric power, both A.C. and D.C. of the required voltage, is available from direct current generators or the commercial A.C. power supply. Gas, water, and compressed air outlets are also available where needed in lecture rooms and laboratories. Distribution panels, connected with the main electric switchboard, are located in the advanced laboratories. The lecture rooms and laboratories are conveniently arranged and well equipped with modern apparatus to carry out the department policy of frequent student experimental work and extensive lecture demonstrations.

The department sponsors a Student Section of the American Institute of Physics to provide extracurricular activities and training for physics students.

To meet the needs of different groups of students three sequences of courses in beginning physics are offered: (a) Physics 110, 211, 212; (b) Physics 205, 206, 207 for premedical or science majors who do not take the calculus; (c) Physics 203, 204, a terminal science course for liberal arts, business administration, education and physical education students who do not elect one of the other physics programs. The objectives, methods, and, to some degree, the content of these programs are different. It is recommended that students, whenever possible, complete the physics program on which they embark.

Students taking physics as their major work are required to take all courses offered by the department for physics majors. In addition they are required to take Mathematics 321, 322. For valid reasons the study of the modern foreign language, (German, Russian, or French) may be postponed to the junior or senior year. Physics majors are advised to take scientific German and to choose their electives from the advanced courses offered in the Department of Chemistry and the Department of Mathematics.

For physics majors, up to six credit hours in the courses numbered above 300 in mathematics (except 301, 302, 309, or 310), chemistry, or electrical engineering may be substituted for an equal number of required credit hours in physics courses numbered above 300 except Laboratory Physics 313, 315, 316.

**101. Modern Physics Lectures*

One Credit Hour

Required of all freshmen majoring in physics. A non-mathematical course consisting of lectures on modern physics topics. Class notes and library reading will be required.

Lecture: one hour.

110, 211, 212. General College Physics

Four Credit Hours
Each Semester

Required of all students majoring in engineering, mathematics, chemistry, or physics. Mechanics, electricity and magnetism, heat, sound, light and modern physics covered with no assumption of prior knowl-

edge of physics; laboratory of about fourteen individual quantitative experiments each semester based on fundamental principles. Instruction is given in the use of the slide rule which is required equipment. Lecture: three hours; Laboratory: two hours. Prerequisite: Math 121. (May be taken concurrently with Math 121 with permission of the heads of the student's major department and the Department of Physics.)

203, 204. *Introduction to College Physics* Four Credit Hours
Each Semester

Required of all sophomores who do not take Physics 110, 211, 212. A course similar to Physics 110, 211, 212 adapted primarily to the needs of students who expect to take no additional courses in the physical sciences and including the recent developments in physics bearing directly on everyday life; laboratory periods devoted to individual experiments performed by the students, experiments conducted by the instructor, solution of problems. Lecture: three hours; Laboratory: two hours. Prerequisite: Math 102 or 119.

205, 206, 207. *College Physics* Four Credit Hours
Each Semester

Required of all premedical and science students who do not take Physics 110, 211, 212. A course of elementary nature designed to stress the principles and the unifying concepts of classical and modern physics, especially those of particular interest to the medical profession, and to prepare premedical students to meet the requirements for admission to the better medical schools; approximately fourteen two-hour laboratory periods each semester devoted to student experiments dealing with the topics of mechanics, molecular physics, heat, wave motion, optics, electricity and magnetism, and nuclear physics. Lecture: three hours; laboratory: two hours.
Prerequisite: Math. 102 or 119.

303, 304. *Laboratory Physics* Two Credit Hours
Each Semester

Required of all Physics Juniors; open to others.
A study in the laboratory of many of the topics considered in Physics 301, 302; about forty-five more advanced experiments than those in Physics 201, 202 involving the use of most of the standard instruments of physical measurement. Laboratory: four hours.
Prerequisite: To be preceded or accompanied by Physics 301 or 302.

307. *Geometrical Optics* Three Credit Hours

Required of all Physics Juniors; open to others.
Principles of geometrical optics and optical instruments; reflection, refraction, and dispersion in theory and experiment. Lecture: two hours; laboratory: two hours.
Prerequisites: Physics 202; Math. 122.

308. *Physical Optics* Three Credit Hours

Required of all Physics Juniors; open to others.

The general equations of wave motion; interference, diffraction, polarization, and double refraction studied both theoretically and experimentally. Lecture: two hours; laboratory: two hours.

Prerequisites: Physics 307; Math. 122.

309. *Optics* Three Credit Hours

Required of all physics majors; open to others.

Principles of geometrical and physical optics; the general equations of wave motion; reflection, refraction, dispersion, interference, diffraction, and polarization. Lecture: three hours.

Prerequisites: Physics 212, Math. 220.

310. *Heat and Thermodynamics* Three Credit Hours

Required of all Physics Juniors; open to others.

Kinetic theory of gases and transport phenomena, thermodynamics of gases, Maxwell-Boltzmann statistics, thermoelectricity and theory of thermal radiation.

Lecture: three hours.

Prerequisite: Physics 301.

311, 312. *Electricity and Magnetism* Three Credit Hours
Each Semester

Required of all Physics Majors; open to others.

The electrostatic field and its effect on matter, the properties of magnetic fields and magnetic materials, electromagnetic effects, vector potentials, displacement currents, Maxwell's equations, Lorentz force on particles, periodic currents. Lecture: three hours.

Prerequisites: Physics 212, Math. 220.

313, 315, 316. *Laboratory Physics* Two Credit Hours
Each Semester

Required of all Physics Majors; open to others.

Laboratory experiments and/or projects requiring the use of the basic instruments for the measurement of mechanical, electromagnetic, optical, and thermal quantities, and covering the principal branches of physics: mechanics, heat, electricity and magnetism, optics, atomic and nuclear physics; the experiments performed in any semester determined by the interests of the students and the theoretical courses being taken concurrently.

Prerequisites: Physics 212; enrollment in at least one physics course numbered above 300.

318. *Electronics* Four Credit Hours

Required of all Physics Majors; open to others.

Characteristics of electron tubes and transistors and their use as rectifiers, detectors, amplifiers, and oscillators; a course designed to intro-

duce students to the use of electron tubes and transistor circuits in the field of measurement and instrumentation.

Lecture: three hours; laboratory: three hours.

Prerequisites: Physics 212; Math. 220.

401. *Modern Physics*

Three Credit Hours

Required of all Physics Seniors; open to others.

The background of modern atomic physics, Maxwell's equations for electromagnetic waves, charged atomic particles, photoelectricity, X-rays, special theory of relativity, atomic spectra, and atomic structure.

Lecture: three hours.

Prerequisites: Physics 302, 308; Math. 220.

402. *Nuclear Physics*

Three Credit Hours

Required of all Physics Seniors; open to others.

A continuation of Physics 401 to include natural radioactivity, isotopes, artificial radioactivity, and nuclear disintegration, nuclear reactions, detection of charged particles and radiations, cosmic rays and fundamental particles. Lecture: three hours.

Prerequisite: Physics 401.

403, 404. *Advanced Laboratory Physics*

Two Credit Hours

Required of all Physics Seniors.

A course accompanying Physics 401 and 402. Experiments of an advanced nature especially in atomic and nuclear physics to include electron emission, determination of fundamental constants, conduction of electricity through gases, X-rays, radioactivity, detection, counting, and analysis of nuclear radiations. Laboratory: two hours.

406. *Electronics*

Five Credit Hours

Required of all Physics Seniors.

Characteristics of electron tubes and transistors and their use as rectifiers, detectors, amplifiers, and oscillators; a course designed to introduce students to the use of electron tube and transistor circuits in the field of measurements.

Lecture: three hours; laboratory: four hours.

Prerequisite: Physics 413.

407. *Mechanics*

Four Credit Hours

Required of all Physics Seniors.

Selected topics in mechanics extending the treatment given in Physics 301 and using the methods of vector calculus; kinematics, gravitational theory, oscillations, Euler's equations, Hamiltonian and Lagrangian functions, principle of least action, and introduction to fluid dynamics and Laplace's equation.

Lecture: four hours.

Prerequisites: Physics 301; Math. 220.

411, 412. *Mechanics*Three Credit Hours
Each Semester

Required of all Physics Majors; open to others.

Newtonian mechanics treated on an intermediate level, using vector calculus and tensor algebra. Topics covered include: motion of a particle and of systems of particles, moving coordinate systems, rigid body rotation, gravitation, mechanics of continuous media, equations of Lagrange and Hamilton, and theory of small oscillations.

Lecture: three hours.

Prerequisites: Physics 212; Math. 220.

413. *Electricity and Magnetism*

Five Credit Hours

Required of all Physics Seniors.

The electrostatic field and its effect on matter, the properties of magnetic fields and magnetic materials, electromagnetic effects, electrical transients, periodic currents. Lecture: three hours; laboratory: four hours.

Prerequisites: Physics 302; Math. 220.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

Certain of the courses listed above will be discontinued and the contents included in new courses as indicated below:

Former Course	New Course	Effective Date of Change
Advanced Gen. Physics 301-302	Partly in Physics 110, 211, 212 and	September 1968
Lab. Physics 303, 304	partly in advanced courses	September 1968
Geometrical Optics 307	Optics 309	September 1969
Physical Optics 308	Optics 309	
Adv. Laboratory Physics 403, 404	Laboratory Physics 313, 315, 316	September 1968
Electricity and Magnetism 413	Elec. & Magnetism 311, 312	September 1968
Mechanics 407	Mechanics 411, 412	September 1969
Electronics 406	Electronics 318	February 1969

DEPARTMENT OF POLITICAL SCIENCE

Professors: Kline, Hodges

Associate Professors: Arcilesi, Fairchild

Assistant Professors: Moreland, Kingston, Payne, Spar

Instructor: Attaway

The curriculum of political science at The Citadel is planned to give the student a background in the political, social, and economic developments of the modern world. It seeks an understanding and interpretation of tendencies, a breadth of view, and a spirit of scientific inquiry into those fields which will qualify its majors for admission to graduate and professional schools.

While this program undertakes to provide a broad liberal education, it is especially designed as basic preparation for the administration of business enterprises and governmental services both foreign and domestic, and to provide a program for pre-law students. The head of this department is the designated pre-legal curriculum adviser for students interested in the study of law.

The Political Science Department has long been aware of the need for men trained in international affairs and encourages students to prepare for careers in the Foreign Service and Intelligence activities. This

course of study has been reviewed by the State Department. Students entering the Armed Services have also found it useful in their military training and valuable to a military career.

A student who selects political science as his major course of study is required to take Political Science 201 (American National Government) and 202 (State and Local Government) in the Sophomore year. For the requirements in the junior and senior years, see page 94. Two years of a modern language are required. There are fifteen hours of electives which may be chosen according to the individual's requirements and interests, subject to the approval of this department.

201. *American National Government* Three Credit Hours
Required of all Political Science Sophomores; open to others.

The origins and development of the American constitutional system; relations between national and state governments in the American federal system; the political process, with emphasis upon election procedures, public opinion, and pressure groups and political party activity; the individual and his government; the institutional organization of the national government; the national government in action.

202. *State and Local Government* Three Credit Hours
Required of Political Science Sophomores. Open to others.

The historic evolution of state governmental and constitutional systems; the role of the states in the American constitutional system; the institutional organization of state governments; the relationship between states and their political subdivisions; the organization and activities of local governmental units.

Prerequisite: Polit. 201.

301, 302. *International Law and Organization* Three Credit Hours
Each Semester

Required of Political Science Juniors. Open to others receiving permission of the instructor.

A survey of international law as developed through treaties, customs, usages, and decisions of national and international tribunals; a study of the League of Nations, the United Nations, and the international machinery for the settlement of international problems and disputes.

303. *American Foreign Relations* Three Credit Hours
Required of Political Science Juniors. Open to others receiving permission of the instructor.

A study of the organization of the American government for the conduct of foreign relations; the institutions and elements in the making of foreign policy; emphasis on the important problems and developments of the post-war years.

304. *American Parties and Politics* Three Credit Hours
Required of Political Science Juniors. Open to others.

An analysis of the dynamics of American politics, with particular emphasis upon the factors entering into the formation of public opinion,

the role of pressure groups, and the operations of the party system.

305, 306. *Public Administration*

Six Credit Hours

Required of Political Science Juniors. Open to others.

A study of the characteristics of public administration at all levels; the principles and practices of organization; the role of leadership and its process; the management of personnel and finance; the effects of the regulatory process upon administration; the problems of securing administrative responsibility.

Prerequisites: Polit. 201, 202.

312. *Municipal Government*

Three Credit Hours

Open to juniors and seniors.

A study of the legal status of municipalities, their administrative organization; personnel and finance problems; planning and zoning; safety administration; regulatory and management problems.

401, 402. *Constitutional Law*

Three Credit Hours

Each Semester

Required of Political Science Seniors. Open to others receiving permission of the instructor.

A study of the underlying and basic principles of the Constitution as reflected in the leading decisions of the United States Supreme Court.

403. *Comparative Politics*

Three Credit Hours

Required of Political Science Majors. Open to others with permission of the instructor.

An analysis of the political systems of major Western and non-Western Powers in terms of institutions, structure and operations. Emphasis on the development of common criteria for the evaluation and comparison of these divergent systems.

405, 406. *International Politics*

Three Credit Hours

Each Semester

Required of Political Science Seniors. Open to others receiving permission of the instructor.

An analysis of the development and distribution of power among nations; the geographic, demographic, economic, political, psychological, and military bases of national power; emphasis on the problems and policies of the major powers.

407, 408. *Political Theory*

Three Credit Hours

Each Semester

Required of Political Science Seniors. Open to liberal arts seniors.

Major theoretical writing from Plato to Thomas Hill Green; emphasis on a comparison of basic ideas and on the relationship between theories and contemporary problems.

409. *Far Eastern Affairs*

Three Credit Hours

Open to juniors and seniors.

A survey of the Far East and its problems; a study of China and

Japan in terms of power elements; emphasis on role of China and Japan in American foreign policy.

410. *Southeast Asian Affairs*

Three Credit Hours

Open to juniors and seniors.

A study of the development of the area and the problems of the countries involved; emphasis on the importance of the area to the United States and its role in American foreign policy.

412. *Administrative Law*

Three Credit Hours

Open to seniors with adequate background in history, economics, and political science.

414. *Latin American Affairs*

Three Credit Hours

Open to juniors and seniors.

A survey of the Latin American areas; a study of the power elements and related problems; emphasis on the relationships and importance of the area to the United States.

415. *Russian Affairs*

Three Credit Hours

Open to juniors and seniors.

An analysis of the geographic, demographic, economic, political, psychological, and military bases of Soviet power. Emphasis on the objective techniques, and operations of Soviet foreign policy.

416. *National Policy and Administration*

Three Credit Hours

Open to juniors and seniors.

Analytical and critical survey of the process of formulating and administering basic domestic policy; the role and influence of special interest groups; the problems of the President and Congress in formulating general interest programs.

417. *African Politics*

Three Credit Hours

Open to Juniors and Seniors.

An analysis of the Politics of Modernization in Africa; emphasis on the newly independent states of the continent and their political, cultural, demographic, and historical characteristics; and consideration of tribal factors influencing the process of modernization.

418. *Middle Eastern Affairs*

Three Credit Hours

Open to juniors and seniors.

A survey of the Middle East; a study of the power elements and related problems; emphasis on the role of the area in American foreign policy.

422. *Public Opinion and Propaganda*

Three Credit Hours

Systematic analysis of the political process incorporating the technique of opinion survey design and analysis; the analysis of voting behavior; and the study of the mechanisms for influencing opinion through the use of modern techniques of propaganda.

420. *Senior Essay*

Two Credit Hours

Required of all seniors as a prerequisite to graduation. See page 82.

GREATER ISSUES COURSE

The Greater Issues Series was inaugurated in 1954 to bring to The Citadel distinguished individuals who could speak from personal knowledge and experience on current subjects of vital interest. Each speaker is invited to discuss some aspect of public affairs with which he is identified and is especially knowledgeable and on which he can speak with authority. Greater Issues presentations are attended by all cadets.

The 1966-67 Greater Issues Series presented an outstanding group of important persons who discussed from personal knowledge and experience many of the issues that disturb and motivate today's world. Among them were Major General Donald Bennett, Superintendent of the U. S. Military ABCademy; Admiral David L. McDonald, Chief of Naval Operations; Lieutenant General Leighton I. Davis, Commander of the National Range Division of the U. S. Air Force; and The Honorable Solomon Blatt, Speaker of the South Carolina House of Representatives.

COMPUTER CENTER

In recent years many important applications for high-speed digital computers have been found in practically all fields of human endeavor. The Computer Center was established for the purpose of offering training in this increasingly important field.

The depth and extent of a student's activities in this field is largely dependent on his field of study and on his own initiative and interest. The language for communicating with the computer is taught in a one credit hour course in the sophomore year. Computer programs written by the students in this course are processed by Computer Center personnel or by student assistants.

Upon completion of the computer programming course and a brief period of instruction in computer operation a student may process his own programs on the computer.

Equipment: The computer is an IBM 1620 central processing unit with a 1311 disk file which provides a working memory of 20,000 positions and a random access memory of 2,000,000 positions. Peripheral equipment consists of two keypunch machines, a sorting machine, and a 150-line-per-minute printer. This equipment is in addition to an IBM 1401 computer which is used for administrative data processing and for training students majoring in Business Administration.

THE FIRST YEAR

The year begins for new cadets when they first pass through the sallyport of Padgett-Thomas Barracks and report for duty at The Military College of South Carolina. The next few days during Plebe Orientation Week are busier than the new fourth classmen ever believed possible. Selected members of the upper classes who are designated as the training cadre lead the new cadets through the initial rigorous training and supervise every moment of their day.

During this period, the newcomer receives the necessary training to prepare him to take his place in The South Carolina Corps of Cadets. Each day is filled with a variety of activities: the new Plebe attends classes in the customs and traditions of The Citadel, the College and Cadet Regulations, the Cadet Honor System, military courtesy, wearing of the uniform, room arrangement, close order drill, physical training, and the Army and Air Force ROTC programs. Additionally, he accomplishes the numerous administrative tasks to prepare him for cadet life and the academic year to include assignment to his company and room, equipment and clothing issues, fittings for uniforms, conferences with his military and faculty advisors, and class registration for the fall semester. By the end of the first week, the new cadet is no longer a stranger to The Citadel. He is beginning to feel like a cadet; and yes, look like one too. He takes pride in his accomplishments for, even at this early date, he has gained familiarity with military courtesy and discipline through constant prac-

tice under the critical eyes of his training cadre. He is well on the way toward mastering the fundamentals of dismounted drill, and he has stood his first formal inspection in ranks.

He is ready for a change of pace and a moment of relaxation now, and he has the opportunity following chapel services on Sunday. A class outing takes place at The Citadel's beautiful beach house on The Isle of Palms. He will long remember the pleasure of this day for it is his first chance to evade the seemingly constant supervision of his squad leader, to relax from the burden of continually striving for perfection, and to meet his new classmates and enjoy with them the fellowship of the occasion.

With the return of the other upper classmen from summer furlough, the academic year gets underway. Now, the new cadets begin to realize what their four years at The Citadel will be like. As they become immersed in their studies, they begin to appreciate the need for the proper budgeting of their time and the necessity of developing good study habits. The days soon begin to fall into a routine, but never one that permits boredom, for in the classroom as well as in the other facets of their daily life there are always new challenges to be met and additional responsibilities to be assumed.

In early fall the new cadets have progressed sufficiently far in their training to officially join the Corps of Cadets. It is a memorable occasion for the new cadet, and he will always remember the special retreat ceremony at which his class was formally presented to The Corps.

But all is not work for the Plebe. There are numerous activities in which he will participate: intramural and Corps squad athletics, tea dances and formal hops, and, with the advent of football season, the thrill of watching the "Bulldogs" play in Johnson Hagood Stadium on a Saturday. Soon it is Parents' Day, and he has the opportunity to show Mom and Dad how well "their cadet" has progressed. It is a moment of pride for all concerned. In a few short weeks comes Christmas leave and a period of well-earned relaxation with family and friends.

The year is far from over, but the Plebe is well prepared for the second semester. He is fully adjusted to the demands of cadet life, he is confident in his own ability, and he shares in the proud heritage of the Corps of Cadets. The excitement of Graduation Week in the spring means different things to the different classes, but to the Plebe it means the end of a difficult but rewarding year and the achievement of a new status: that of a Citadel upper classman.

TYPICAL WEEKDAY SCHEDULE
